

Studies in Inorganic Chemistry 14

The Chemistry of Inorganic Ring Systems

Edited by

Ralf Steudel

*Institut für Anorganische und Analytische Chemie,
Technische Universität Berlin, D-1000 Berlin 12, Germany*

ELSEVIER

Amsterdam — London — New York — Tokyo 1992

CONTENTS

Preface	V
List of Contributors	VII
Chapter 1	
CLUSTERS, CAGES AND CONCATENATIONS	
N.N. Greenwood, Leeds, England	1
1. Introduction	1
2. Mechanisms of Borane Cluster Formation	2
3. Synthesis of New Cluster Types	5
3.1 Eleven-vertex 24-electron Species	5
3.2 A 12-vertex Cluster with an <i>arachno</i> (30-electron) Count	9
4. Fluxional Cluster Isomerism	10
5. Acknowledgements	12
6. References	12
Chapter 2	
NOVEL DELOCALIZED RINGS INVOLVING HEAVIER MAIN GROUP ELEMENTS	
P.P. Power, Davis, USA	15
1. Introduction	15
2. Synthesis of Novel Potentially Delocalized Rings	18
3. Structures and Properties	18
3.1 Structures	18
3.2 Delocalization	19
4. Rings Comprised of Heavier Main Group Elements Only	20
4.1 General Considerations	20
4.2 Recent Developments	21
5. Conclusion	23
6. Acknowledgement	23

7. References	23
---------------	----

Chapter 3

BINARY CARBON SULFIDES: UNUSUAL MOLECULES AND MATERIALS	
C.P. Galloway, T.B. Rauchfuss, X. Yang, Urbana, USA	25

1. Introduction	25
2. Background	26
3. Anionic Carbon Sulfides	26
3.1 $C_3S_3^{2-}$	26
3.2 $C_4S_4^{2-}$	26
3.3 $C_3S_5^{2-}$ (Two Isomers)	27
3.4 $C_6S_6^{6-}$	27
3.5 $C_6S_8^{2-}$	28
4. Molecular, Binary Carbon Sulfides	28
4.1 C_4S_6 (Three Isomers)	28
4.2 C_3S_8 and C_6S_{12}	28
4.3 C_6S_8	29
4.4 $[\alpha-C_3S_5]_n$ and C_6S_{10}	30
4.5 $[\beta-C_3S_5]_n$	31
4.6 C_9S_9 (Two Isomers)	31
5. Reactivity of Carbon Sulfides	32
6. Summary and Outlook	32
7. Acknowledgment	33
8. References	33

Chapter 4

NOVEL SILICON RING COMPOUNDS FROM DISILENES	
R. West, Madison, USA	35

1. Reactions with Chalcogens	36
2. Reaction with Dioxygen	38
3. Reaction with Nitro- and Nitrosobenzene	40
4. Reactions with Azides and Azobenzene	41

5. Reactions with Phosphorus	44
6. Reaction with Bis(Phosphine)Platinum	48
7. Summary	48
8. Acknowledgements	48
9. References	49

Chapter 5

NOVEL RING SYSTEMS FROM CYCLOTRISILANES AND CYCLOTRISTANNANES

M. Weidenbruch, Oldenburg, Germany	51
------------------------------------	----

1. Introduction	51
2. Synthesis and Reactivity of Cyclotrisilanes	52
2.1 Reactions with Isocyanides	54
2.2 Reactions of Silylenes and/or Disilenes with Nitrogen Containing Bases	57
3. Synthesis and Reactivity of Cyclotrigermanes	64
4. Synthesis and Reactivity of Cyclotristannanes	66
4.1 Distannene Addition Reactions	67
5. References	71

Chapter 6

HOMO- AND HETEROCYCLIC Si-O-SYSTEMS -RINGS AND CAGES-

U. Klingebiel, S. Schütte, D. Schmidt-Bäse, Göttingen, Germany	75
--	----

1. Bifunctional Silanols - Initial Chemical Reagents of Siloxane Synthesis	77
2. Alkali Metal Derivatives of Monomeric Silanols	78
3. Ring Precursors and Ring Systems	84
3.1 Eight-membered Ring Systems	85
3.2 Six-membered Ring Systems	92
3.3 Four-membered Ring Systems	95
4. Summary	99
5. References	99

Chapter 7

**EXOTIC POLYHEDRAL OLIGOGERMANES AND
RELATED MOLECULES****A. Sekiguchi, H. Sakurai, Sendai, Japan****101**

1. Hexakis(trimethylsilyl)prismane: $C_6(SiMe_3)_6$.
Synthesis of Hexakis(trimethylsilyl)tetracyclo[2.2.0.0^{2,6}.0^{3,5}]hexane 103
2. Hexagermaprismane: $Ge_6[CH(SiMe_3)_2]_6$.
Synthesis of Tetracyclo[2.2.0.0^{2,6}.0^{3,5}]hexagermane 107
3. Octagermacubane: $Ge_8[(CMeEt_2)]_8$.
Synthesis of Pentacyclo[4.2.0.0^{2,5}.0^{3,8}.0^{4,7}]octagermane 110
4. Tetrahalogenocyclotetragermane:
A Potential Precursor of Cage and Ladder Systems 111
5. Cage and Ladder Polygermanes:
Synthesis of Tetracyclo[3.3.0.0^{2,7}.0^{3,6}]octagermane and
Tricyclo[4.2.0.0^{2,5}]octagermane 113
6. One Pot Synthesis of Oligogermanes 118
7. Acknowledgment 122
8. References 123

Chapter 8

**NEW HETEROMETALLIC SILYLAMIDES WITH POLYCYCLIC AND
CAGE-LIKE STRUCTURES****M. Veith, S. Müller-Becker, Saarbrücken, Germany****125**

1. Introduction 125
2. Syntheses of Heterometallic Octamethyltrisilazyls 126
3. Molecular Structures of Heterometallic Octamethyltrisilazyls
in the Solid 128
4. General Discussion of the Structural Details in Heterometallic
Octamethyltrisilazyls 137
5. Acknowledgements 143
6. References 143

Chapter 9

**STRAINED INORGANIC HETEROCYCLIC COMPOUNDS AND THEIR
CONVERSION TO MACROCYCLES AND HIGH POLYMERS****H.R. Allcock, University Park, USA 145**

1. The Importance of Ring-Opening Polymerization and Ring Expansion Reactions	145
2. Ring Opening Polymerization of Chlorocyclophosphazenes: The Classical Route to Poly(organophosphazenes)	146
3. Extension of the Ring-Opening Polymerization Process to other Cyclophosphazenes	149
4. Cyclophosphazenes that Resist Polymerization	151
5. Cyclic Trimers that Bear Both Halogeno- and Organic Side Groups	154
6. Two Possible Mechanisms	159
7. Effect of Ring Strain Induced by Transannular Structures	161
8. Ring Strain Generated by the Presence of Heteroelements	163
9. General Implications for the Future	165
10. Acknowledgements	165
11. References	165

Chapter 10

INORGANIC RINGS ON CARBON CHAINS**C.W. Allen, Burlington, USA 171**

1. Introduction	171
2. Co- and Homopolymerizations Reactions	173
3. Reactions of Inorganic Rings on Carbon Chains	185
4. Acknowledgements	189
5. References	189
