Contents

Physico-chemical Properties of Biofilms – A Short Review <i>H.-C. Flemming, J. Wingender, R. Moritz, W. Borchard and C. Mayer</i>	1
Biofilm Structure and Influence on Biofouling under Laminar and Turbulent Flows <i>P. Stoodley, J. Boyle, A.B. Cunningham, I. Dodds, H.M. Lappin-Scott and Z. Lewandowski</i>	13
The Effect of Substratum Surface Defects upon Retention of, and Biofilm Formation by, Microorganisms from Potable Water <i>J. Verran and T. Hissett</i>	25
Algal-Bacterial Relationships in Streams with Varying DOC Concentration and Source <i>A.P. Hunt, J.D. Parry and J. Hamilton-Taylor</i>	34
Allelochemical Control of Natural Photoautotrophic Biofilms <i>F. Jüttner</i>	43
Physiological Heterogeneity and Biofilm Control <i>G.A. McFeters, P.S. Stewart, C.-T. Huang, E.J. Wentland, K.D. Xu and F.P. Yu</i>	51
Modelling Biofilm Dynamics in Drinking Water Distribution Systems <i>P. Piriou, S. Dukan and Y. Levi</i>	61
Importance of 'Clumps' Shed from Biofilms in a Water Distribution System <i>S.M. McMath, A. Delanoue, D.M. Holt, S. Maier and C.A. Woodward</i>	72
Biofilms in Process and Industrial Waters <i>T.R. Bott</i>	80
The Effect of Extracellular Polysaccharides on the Resistance of <i>Pseudomonas aeruginosa</i> to Chlorine and Hydrogen Peroxide <i>J. Wingender, S. Grobe, S. Fiedler and H.-C. Flemming</i>	93
Practical Experiences of Biofouling in Reverse Osmosis Systems <i>L.Y. Dudley and N.S.J. Christopher</i>	101
Problems Caused by Biofilms in the Oil Industry <i>P. Sanders</i>	109

The Biofilm Ecology of Microbial Biofouling, Biocide Resistance and Corrosion <i>D.C. White, R.D. Kirkegaard, R.J. Palmer Jr., C.A. Flemming, G. Chen, K.T. Leung, C.B. Phiefer and A.A. Arrage</i>	120
Control and Monitoring of <i>Legionella pneumophila</i> Biofouling in a Water System Treated with Silver and Copper Ions <i>J.T. Walker, S. Ives, M. Morales, A.A. West and N. Pavey</i>	131
Problems Associated with Biofilms in Cooling Tower Systems <i>A. Harris</i>	139
Pathogens and Metabolites Associated with Biofilms <i>C.W. Keevil</i>	145
The Effect of Aquatic Biofilm Structure on the Survival of the Enteric Pathogen <i>Campylobacter jejuni</i> in Water <i>C.M. Buswell, Y.M. Herlihy, C.W. Keevil and S.A. Leach</i>	153
Growth of <i>Legionella pneumophila</i> Is Not Dependent on Intracellular Replication <i>S.B. Surman, L.H.G. Morton, A. Skinner, R.B. Fitzgeorge and C.W. Keevil</i>	160
Bacterial Resistance to Chlorine through Attachment to Particles and Pipe Surfaces in Drinking Water Distribution Systems <i>P. Morin, V. Gauthier, S. Saby and J.-C. Block</i>	171
Detection and Characterization of Biofilm by Mass Transport Analysis <i>E. L'Hostis, D. Festy, L. Kiene and B. Tribollet</i>	191
Analysis of Material (Biofilm) Present on the Internal Surfaces of a Drinking Water Distribution System <i>A. Delanoue, D.M. Holt, H.A. Anderson, S.M. McMath, S.E. Smith, C.A. Woodward, A.R. Fraser and M. Roe</i>	202
Standard Method to Evaluate Aquatic Biofilms <i>AGHTM Biofilm European Working Group</i>	210
Biofilms in Water Distribution Systems: Control and Remediation <i>M.W. LeChevallier</i>	220
Relationships between Total Chlorine, Particle Counts and Biofilm Detachment in a Drinking Water Distribution System <i>S.H. Maier, C.A. Woodward, A. Delanoue, D.M. Holt, S.M. McMath and R.S. Powell</i>	231
Subject Index	239
