# CONTENTS

|   |    |
|---|----|
| Contributors  | ix |
| Preface   | xi |
| <br>  |    |
| 1. A Practical Guide to the Preparation of $\text{Ca}^{2+}$ Buffers               | 1  |
| <i>Donald M. Bers, Chris W. Patton, and Richard Nuccitelli</i>                    |    |
| I. Introduction   | 2  |
| II. Rationale   | 3  |
| III. Methods  | 6  |
| IV. Materials   | 12 |
| V. Discussion and Summary   | 23 |
| References  | 24 |
| <br>  |    |
| 2. Photorelease Techniques for Raising or Lowering Intracellular $\text{Ca}^{2+}$ | 27 |
| <i>Robert Zucker</i>  |    |
| I. Introduction   | 28 |
| II. Nitr Compounds  | 29 |
| III. DM-Nitrophen   | 35 |
| IV. Diazo Compounds   | 39 |
| V. Introduction into Cells  | 42 |
| VI. Light Sources   | 43 |
| VII. Calibration  | 45 |
| VIII. Purity and Toxicity   | 48 |
| IX. Biological Applications   | 49 |
| X. Conclusions  | 58 |
| References  | 59 |
| <br>  |    |
| 3. Making and Using Calcium-Selective Mini- and Microelectrodes                   | 67 |
| <i>L. Hove-Madsen, S. Baudet, and D. M. Bers</i>                                  |    |
| I. Introduction   | 68 |
| II. Rationale   | 70 |

|   |     |
|---|-----|
| III. Methods  | 71  |
| IV. Discussion  | 86  |
| References  | 87  |
| <br>  |     |
| 4. Construction, Theory, and Practical Considerations for using Self-referencing of $\text{Ca}^{2+}$ -Selective Microelectrodes for Monitoring Extracellular $\text{Ca}^{2+}$ Gradients | 91  |
| <i>Mark A. Messerli and Peter J. S. Smith</i>   |     |
| I. Introduction   | 92  |
| II. CaSM Construction   | 93  |
| III. Properties of CaSMs  | 94  |
| IV. Self-referencing of CaSMs   | 98  |
| V. $\text{Ca}^{2+}$ Flux Measurements   | 107 |
| References  | 109 |
| <br>  |     |
| 5. Practical Aspects of Measuring Intracellular Calcium Signals with Fluorescent Indicators   | 113 |
| <i>Joseph P. Y. Kao, Gong Li, and Darryl A. Auston</i>  |     |
| I. Introduction   | 114 |
| II. Fluorescent $\text{Ca}^{2+}$ Indicators   | 114 |
| III. Loading Indicators into Cells  | 120 |
| IV. Manipulation of $[\text{Ca}^{2+}]$  | 126 |
| V. Conversion of Indicator Fluorescence Signal into Values of $[\text{Ca}^{2+}]$  | 132 |
| VI. Reporting Indicator Fluorescence Intensity Changes without Calibration  | 139 |
| VII. Measuring $[\text{Ca}^{2+}]$ in Mitochondria   | 141 |
| VIII. Concluding Remarks  | 146 |
| References  | 151 |
| <br>  |     |
| 6. Genetically Encoded Probes for Measurement of Intracellular Calcium  | 153 |
| <i>Michael Whitaker</i>   |     |
| I. Introduction   | 154 |
| II. Genetically Encoded Sensors   | 155 |
| III. Applications of Genetically Encoded Sensors  | 167 |
| IV. Use of Genetically Encoded Calcium Sensors  | 176 |
| V. Conclusions  | 177 |
| References  | 177 |

|  |     |
|--|-----|
| 7. Patch Clamp Methods for Studying Calcium Channels   | 183 |
| <i>David L. Armstrong, Christian Exleben, and Jody A. White</i>  |     |
| I. Introduction  | 184 |
| II. Rationale  | 186 |
| III. Methods   | 187 |
| IV. Materials  | 195 |
| V. Discussion  | 195 |
| VI. Summary  | 196 |
| References   | 196 |
| 8. Nuclear Patch-Clamp Recording from Inositol 1,4,5-Trisphosphate Receptors                           | 199 |
| <i>Taufiq Rahman and Colin W. Taylor</i>   |     |
| I. Introduction  | 200 |
| II. Nuclear Patch-Clamp Recording  | 201 |
| III. Choice of Cells for Analyses of IP <sub>3</sub> R   | 205 |
| IV. Methods  | 206 |
| V. Concluding Remarks  | 218 |
| References   | 219 |
| 9. Confocal and Multiphoton Imaging of Intracellular Ca <sup>2+</sup>                                  | 225 |
| <i>Godfrey Smith, Martyn Reynolds, Francis Burton, and Ole Johan Kemi</i>                              |     |
| I. Why Study Ca <sup>2+</sup> Signaling with Confocal and Multiphoton Microscopy                       | 226 |
| II. Confocal Microscopy  | 227 |
| III. Limitations in Speed of Confocal Imaging  | 230 |
| IV. Laser Scanning Confocal Microscopy   | 230 |
| V. Total Internal Reflection Fluorescence Microscopy   | 233 |
| VI. Förster Resonance Energy Transfer Microscopy   | 235 |
| VII. Parallel Scanning Confocal Systems  | 238 |
| VIII. Spinning Disk Confocal Microscopy  | 238 |
| IX. Programmable Matrix Microscopy   | 239 |
| X. Advantages and Disadvantages of Confocal Microscopy   | 241 |
| XI. Multiphoton Excitation Laser Scanning Microscopy   | 242 |
| XII. Ca <sup>2+</sup> Indicators for Use in Confocal and Multiphoton Microscopy                        | 245 |
| XIII. Use of Dyes for Single-Photon Confocal Microscopy  | 248 |
| XIV. Use of Dyes for 2P Excitation Microscopy  | 248 |
| XV. Is It Worth Converting the Intracellular Fluorescence Signal to [Ca <sup>2+</sup> ] <sub>i</sub> ? | 250 |
| XVI. Calibration of Single Wavelength Dyes   | 251 |
| XVII. Estimation of F <sub>max</sub> Values  | 252 |
| XVIII. Estimation of F <sub>min</sub> or the Dynamic Range of the Dye                                  | 253 |
| XIX. Consequence of Errors in Estimation of Intrinsic and Dye Fluorescence                             | 253 |

|  |     |
|--|-----|
| XX. Multimodal and Multiple Fluorophore Confocal and Multiphoton Microscopy  | 255 |
| References   | 259 |
| <br>   |     |
| 10. The Use of Aequorins to Record and Visualize $\text{Ca}^{2+}$ Dynamics: From Subcellular Microdomains to Whole Organisms         | 263 |
| <i>Sarah E. Webb, Kelly L. Rogers, Eric Karplus, and Andrew L. Miller</i>  |     |
| I. Introduction  | 264 |
| II. Expression of Apoaequorin, GFP-Apoaequorin, and Other Apoaequorin-Based Spectral Variants in Cells, Tissues, and Whole Organisms | 268 |
| III. Introducing Coelenterazines into Cells, Tissues and Embryos   | 283 |
| IV. Techniques for Detecting Aequorin Luminescence   | 284 |
| V. Conclusions   | 292 |
| References   | 292 |
| <br>   |     |
| Index  | 301 |
| Volumes in Series  | 307 |
