

# **Thermodynamics and Ecological Modelling**

**Edited by  
S.E. Jørgensen**

**LEWIS PUBLISHERS**

Boca Raton London New York Washington, D.C.

---

# Contents

## Chapter 1

Introduction .....	1
<i>Sven E. Jørgensen</i>	

## Chapter 2

Exosomatic Structures and Captive Energies Relevant in Succession and Evolution .....	3
<i>Ramon Margalef</i>	

## Chapter 3

How Light and Nutrients Affect Life in a Closed Bottle .....	17
<i>S. A. L. M. Kooijman and R. M. Nisbet</i>	

## Chapter 4

Energy Accounting of Human-Dominated, Large-Scale Ecosystems .....	61
<i>Sergio Ulgiati and Mark T. Brown</i>	

## Chapter 5

Thermodynamics and Theory of Stability .....	115
<i>Yuri M. Svirezhev</i>	

## Chapter 6

Application of Thermodynamic Concepts to Real Ecosystems: Anthropogenic Impact and Agriculture .....	133
<i>Yuri M. Svirezhev</i>	

## Chapter 7

The Thermodynamic Concept: Exergy .....	153
<i>Sven E. Jørgensen</i>	

## Chapter 8

Entropy and the Exergy Principles in Living Systems .....	165
<i>Ichiro Aoki</i>	

## Chapter 9

Exergy and the Emergence of Multidimensional System Orientation .....	191
<i>Hartmut Bossel</i>	

## Chapter 10

Thermodynamics and Ecology: Far from Thermodynamic Equilibrium .....	211
<i>Yuri M. Svirezhev</i>	

**Chapter 11**

Imperfect Symmetry: Action Principles in Ecology and Evolution .....229

*Lionel Johnson*

**Chapter 12**

The Third Law of Thermodynamics Applied in Ecosystem Theory .....287

*Sven E. Jørgensen*

**Chapter 13**

A Tentative Fourth Law of Thermodynamics .....303

*Sven E. Jørgensen*

**Chapter 14**

Thermodynamics of the Biosphere.....349

*Yuri M. Svirezhev*

**Index** .....365
