## GENETICS

## A Conceptual Approach

Second Edition

Benjamin A. Pierce

**Baylor University** 

## **Contents in Brief**

Chapter 1	Introduction to Genetics	1
Chapter 2	Chromosomes and Cellular Reproduction	17
Chapter 3	Basic Principles of Heredity	47
Chapter 4	Sex Determination and Sex-Linked Characteristics	75
Chapter 5	Extensions and Modifications of Basic Principles	101
Chapter 6	Pedigree Analysis and Applications	132
	INTEGRATIVE CASE STUDY Phenylketonuria: Part I	156
Chapter 7	Linkage, Recombination, and Eukaryotic Gene Mapping	160
Chapter 8	Bacterial and Viral Genetic Systems	197
Chapter 9	Chromosome Variation	235
Chapter 10	DNA: The Chemical Nature of the Gene	266
Chapter 11	Chromosome Structure and Transposable Elements	287
Chapter 12	DNA Replication and Recombination	318
Chapter 13	Transcription	348
Chapter 14	RNA Molecules and RNA Processing	372
Chapter 15	The Genetic Code and Translation	402
Chapter 16	Control of Gene Expression	433
Chapter 17	Gene Mutations and DNA Repair	473
	INTEGRATIVE CASE STUDY Phenylketonuria: Part II	506
Chapter 18	Recombinant DNA Technology	509
Chapter 19	Genomics	552
Chapter 20	Organelle DNA	587
Chapter 21	Advanced Topics in Genetics: Developmental Genetics, Immunogenetics, and Cancer Genetics	607
Chapter 22	Quantitative Genetics	642
Chapter 23	Population and Evolutionary Genetics	676
	INTEGRATIVE CASE STUDY Phenylketonuria: Part III	716

## Contents

Preface	<b>XV</b>	Chapter 3 Basic Principles	
Chapter 1 Introduction to Genetics	1	of Heredity	47
Royal Hemophilia and Romanov DNA	1	Black Urine and First Cousins	47
The Importance of Genetics	4	Mendel: The Father of Genetics	48
•	4	Mendel's Success 49	
The Role of Genetics in Biology 5		Genetic Terminology 49	
Genetic Diversity and Evolution 5 Divisions of Genetics 6		Monohybrid Crosses	50
Model Genetic Organisms 6		What Monohybrid Crosses Reveal 51	
A Brief History of Genetics	7	Connecting Concepts Relating Genetic Crosses to Meiosis	53
Prehistory 8		Predicting the Outcomes of Genetic Crosses 53	
Early Written Records 8		The Testcross 58	
The Rise of Genetics 10		Incomplete Dominance 58	
Modern Genetics 11		Genetic Symbols 59	
The Future of Genetics 11		Connecting Concepts Ratios in Simple Crosses	60
Basic Concepts in Genetics	12	Multiple-Loci Crosses	61
The New Genetics ETHICS - SCIENCE - TECHNOLOGY		Dihybrid Crosses 61	
Choosing the Sex of Your Child by Ron Green	13	The Principle of Independent Assortment 61	
Chanton 2 Chromosomos and Callul	25	The Relation of the Principle of Independent Assortment to Meiosis 62	
Chapter 2 Chromosomes and Cellul		Applying Probability and the Branch Diagram to	
Reproduction	17	Dihybrid Crosses 62	
The Blind Men's Riddle	17	The Dihybrid Testcross 63	
Basic Cell Types: Structure and Evolutionary Relationships	18	Observed and Expected Ratios  The Goodness-of-Fit Chi-Square Test 65	65
Cell Reproduction	21	The New Genetics ETHICS - SCIENCE - TECHNOLOGY	
Prokaryotic Cell Reproduction 21		Rest in Peace, Mr. Lincoln? by Arthur L. Caplan and Ron Green	n 68
Eukaryotic Cell Reproduction 21			
The Cell Cycle and Mitosis 23		Chapter 4 Sex Determination and Se	X-
The Movement of Chromosomes in Mitosis 27		Linked Characteristics	75
Genetic Consequences of the Cell Cycle 27		Sex Wars in Isopods	75
Control of the Cell Cycle 28		Sex Determination	77
Connecting Concepts Counting Chromosomes and		Chromosomal Sex-Determining Systems 77	,,
DNA Molecules	29	Genetic Sex-Determining Systems 79	
Sexual Reproduction and Genetic Variation	30	Environmental Sex Determination 80	
Meiosis 30		Sex Determination in Drosophila melanogaster 8	30
Consequences of Meiosis 32		Sex Determination in Humans 81	
Connecting Concepts Comparison of Mitosis and Meiosis	36	Sex-Linked Characteristics	83
Separation of Sister Chromatids and Homologous	S	X-Linked White Eyes in Drosophila 84	
Chromosomes 37		Nondisjunction and the Chromosome Theory of	
Meiosis in the Life Cycles of Plants and Animals	38	Inheritance 85	

Model Organism: The Fruit Fly Drosophila melanogaster 86		Twin Studies  Concordance 141	141
X-Linked Color Blindness in Humans 88		Twin Studies and Obesity 142	
Symbols for X-Linked Genes 89		•	• • •
Dosage Compensation 90		Adoption Studies	143
Z-Linked Characteristics 92		Adoption Studies and Obesity 144	
Y-Linked Characteristics 92		Adoption Studies and Alcoholism 145	
Connecting Concepts Recognizing Sex-Linked	•	Genetic Counseling	145
inheritance	94	Genetic Testing	146
Chapter 5 Extensions and Modification	ations	Prenatal Genetic Testing 147	
<del>-</del>		Postnatal Genetic Testing 149	
of Basic Principles	101	The New Genetics ETHICS - SCIENCE - TECHNOLOGY	
Birth Weight and Genomic Imprinting	101	Lifesaving Sibling or Designer Baby? by Ron Green	150
Dominance Revisited	102	INTEGRATIVE CASE STUDY Phenylketonuria: Part I	156
Penetrance and Expressivity	104	PKU and Dominance 156	
Lethal Alleles	105	Multiple Alleles at the PAH Locus 157	
Multiple Alleles	105	PKU As a Multifactorial Trait 157	,
Duck-Feather Patterns 105		The Treatment of PKU 157	
The ABO Blood Group 106		PKU As a Genetic Maternal Effect 158	
Gene Interaction	107	Newborn Screening for PKU 158	
Gene Interaction That Produces Novel Phenoty		Genetic Risk and Genetic Counseling for PKU 15	59
Gene Interaction with Epistasis 108	, peo 10.		
Connecting Concepts Interpreting Ratios Production by Gene Interaction	ced	Chapter 7 Linkage, Recombination, a	
·		Eukaryotic Gene Mapping	100
The Complex Genetics of Coat Color in Dogs	112	Eukaryotic Gene Mapping	
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut	112	Alfred Sturtevant and the First Genetic Map	160
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115	112 ations	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and	160
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115 Interaction-Between Sex and Heredity	112 ations 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't	
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic	112 ations 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117	112 ations 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes	160
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119	112 ations 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120	112 ations 115 s 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation	112 ations 115 s 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Muttare at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment	112 ations  115 s 115	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mutter Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity  Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117  Genetic Maternal Effect 119  Genomic Imprinting 120  Anticipation  Interaction Between Genes and Environmental Effects on Gene Expression 1	112 ations  115 s 115  122 c 122 22	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Muttare at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment	112 ations  115 s 115  122 c 122 22	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167	160 161
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mutter Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity  Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117  Genetic Maternal Effect 119  Genomic Imprinting 120  Anticipation  Interaction Between Genes and Environmental Effects on Gene Expression 1	112 ations  115 s 115  122 c 122 22	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167 Connecting Concepts Relating Independent	160 161 163
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics	112 ations  115 s 115  122 c 122 22	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167 Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked	160 161 163
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications	112 ations  115 s 115  122 122 22 123	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167 Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170	160 161 163
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mutter Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals	112 ations  115 s 115  122 t 122  22 123	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167 Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171	160 161 163 169 169
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals The Study of Human Genetic Characteristics	112 ations 115 s 115 122 122 22 123 132 133	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't  Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167  Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171 Gene Mapping with Recombination Frequencies	160 161 163
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Muttare at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals The Study of Human Genetic Characteristics  Analyzing Pedigrees	112 ations  115 s 115  122 t 122  22 123	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167  Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171 Gene Mapping with Recombination Frequencies Constructing a Genetic Map with Two-Point	160 161 163 169
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals The Study of Human Genetic Characteristics Analyzing Pedigrees Autosomal Recessive Traits 135	112 ations 115 s 115 122 122 22 123 132 133	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167  Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171 Gene Mapping with Recombination Frequencies Constructing a Genetic Map with Two-Point Testcrosses 174	160 161 163 169 169
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals The Study of Human Genetic Characteristics Analyzing Pedigrees Autosomal Recessive Traits 135 Autosomal Dominant Traits 136	112 ations 115 s 115 122 122 22 123 132 133	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't  Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167  Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171 Gene Mapping with Recombination Frequencies Constructing a Genetic Map with Two-Point Testcrosses 174  Linkage and Recombination Between	160 161 163 169 169
The Complex Genetics of Coat Color in Dogs Complementation: Determining Whether Mut Are at the Same or Different Loci 115  Interaction-Between Sex and Heredity Sex-Influenced and Sex-Limited Characteristic Cytoplasmic Inheritance 117 Genetic Maternal Effect 119 Genomic Imprinting 120  Anticipation Interaction Between Genes and Environment Environmental Effects on Gene Expression 1 The Inheritance of Continuous Characteristics  Chapter 6 Pedigree Analysis and Applications  Lou Gehrig and Superoxide Free Radicals The Study of Human Genetic Characteristics Analyzing Pedigrees Autosomal Recessive Traits 135	112 ations 115 s 115 122 122 22 123 132 133	Alfred Sturtevant and the First Genetic Map Genes That Assort Independently and Those That Don't Linkage and Recombination Between Two Genes  Notation for Crosses with Linkage 163 Complete Linkage Compared with Independent Assortment 164 Crossing Over with Linked Genes 164 Calculating Recombination Frequency 167 Coupling and Repulsion 167  Connecting Concepts Relating Independent Assortment, Linkage, and Crossing Over Evidence for the Physical Basis of Recombination Predicting the Outcome of Crosses with Linked Genes 170 Testing for Independent Assortment 171 Gene Mapping with Recombination Frequencies Constructing a Genetic Map with Two-Point Testcrosses 174	160 161 163 169 169

Connecting Concepts Stepping Through the Three-Point Cross Mapping Human Genes 182 Mapping with Molecular Markers 184  Physical Chromosome Mapping	181	Aneuploidy Types of Aneuploidy 248 Effects of Aneuploidy 249 Aneuploidy in Humans 249 Uniparental Disomy 253	247
Deletion Mapping 184 Somatic-Cell Hybridization 185 In Situ Hybridization 186 Mapping by DNA Sequencing 186		Mosaicism 253  Polyploidy  Autopolyploidy 254  Allopolyploidy 255  The Significance of Polyploidy 256	254
Chapter 8 Bacterial and Viral Genetic Systems	197	Chromosome Mutations and Cancer	257
Gutsy Travelers Bacterial Genetics Techniques for the Study of Bacteria 199 The Bacterial Genome 201	197 199	The New Genetics ETHICS • SCIENCE • TECHNOLOGY A Duty to Warn? by Ron Green  Chapter 10 DNA: The Chemical Nature of the Gene	260 <b>266</b>
Plasmids 201 Gene Transfer in Bacteria 202 Conjugation 204 Natural Gene Transfer and Antibiotic Resistance Transformation in Bacteria 211 Bacterial Genome Sequences 212  Model Organism: The Bacterium Escherichia coli Viral Genetics  Techniques for the Study of Bacteriophages 216 Gene Mapping in Phages 217 Transduction: Using Phages to Map Bacterial Genes 218  Connecting Concepts Three Methods for Mapping Bacterial Genes Fine-Structure Analysis of Bacteriophage Genes Overlapping Genes 225 RNA Viruses 226 Prions: Pathogens Without Genes 228	210 213 <b>215</b> 221 222	The Elegantly Stable Double Helix: Ice Man's DNA Characteristics of Genetic Material The Molecular Basis of Heredity  Early Studies of DNA 268  DNA As the Source of Genetic Information 2 Watson and Crick's Discovery of the Three- Dimensional Structure of DNA 273  RNA As Genetic Material 274  The Structure of DNA  The Primary Structure of DNA 275 Secondary Structures of DNA 277  Connecting Concepts Genetic Implications of DNA Structure  Special Structures in DNA and RNA  DNA Methylation 282  Bends in DNA 282	266 267 268
