

Psycholinguistics

Introduction and Applications

Lise Menn, PhD

Contents

<i>Foreword</i>	<i>xi</i>
<i>Introduction: How Psycholinguistics Can Help Us Understand the Kinds of Problems People Can Have With Language</i>	<i>xiii</i>
0.1 Everyday Language Problems	xiii
0.2 What Is the Difference Between Linguistics and Psycholinguistics?	xiv
0.3 What's an Example of a Psycholinguistic Explanation of a Language Problem?	xv
0.4 The Plan of This Book	xvi
0.5 In Defense of My Writing Style: <i>Apologia pro stilo suo</i>	xvii
<i>Acknowledgments</i>	<i>xix</i>
1 Basic Linguistics: How to Describe Language Use and Language Knowledge	1
1A. Introduction, Phonetics, and Phonology	3
1.0 Terminology: Strategy for Learning About Language	3
1.1 Divide and (More or Less) Conquer: Levels of Spoken Language	4
1.2 The Level of Speech Sounds: The Sounds of Spoken Words	4
1.3 Syllables and How to Count Them	37
1B. Meaningful Units of Language	39
1.4 Morphemes: The Meaningful Units of Speech	39
1.5 Words	45
1.6 Utterances: Phrases, Clauses, and Sentences in Speech	46
1.7 Basic Syntactic and Semantic Roles: The Jobs That Words Do in Clauses	51
1.8 Pragmatics	59
1.9 The Gap Between What People Know and What They Do: Kinds of Linguistic Knowledge	59
1.10 Language Families and Language Types	62
2 How Brains Work	71
2.1 Thinking About the Brain: A Quick History	72

2.2 What Does It Mean to Say That the Brain Processes Information?	74
2.3 How Can a Bunch of Cells Learn or Know Something?	76
2.4 Activation and Its Spread	79
2.5 Top-Down and Bottom-Up Processing	87
2.6 Using our Knowledge of Language Patterns in Conversation	93
2.7 Language Areas in the Brain	94
2.8 Summary	95

3 Normal Speech Errors and How They Happen. 101
I. From Idea to Word

3.1 What is Normal? (and Why Don't We Say "Abnormal"?)	102
3.2 Language Production: Describing the Basic Processes	109
3.3 Choosing What to Put Into Words and What to Focus On: The Message Level	110
3.4 The Functional Level, Part I: Lemmas	113
3.5 The Functional Level, Part II: Semantic Functions	123
3.6 Summary of Language Production So Far	126
3.7 Applying Our Model to an Aphasic Speech Production Problem	128

4 Normal Speech Errors and How They Happen. 133
II: Saying Words and Sounds in the Right Order

4.0 High-Speed Grammar: Making Phrases and Sentences in a Few Tenths of a Second	134
4.1 Getting Words Into The Right (And Wrong) Order	135
4.2 Errors in Word-Making: Word-Assembly Crashes	142
4.3 Errors in Word Sounds: A Horrible Mess at the Level of Phonological Encoding or a Foul-Up in Articulation?	145
4.4 Double Whammies and Worse: Multiple-Source Errors Versus Self-Monitoring	149
4.5 Summary of Sentence Production: From Ideas to Articulation	150

5 Experimental Studies of Normal Language Production and Comprehension: 153
An Introduction to Experimental Methods in Psycholinguistics and Neurolinguistics

5.0 The Plan for This Chapter	155
5.1 Introduction to Psycholinguistic Experiments: Why Do People Do Them and How Do People Come Up With the Ideas for Them?	156

5.2	Memory Experiments	159
5.3	Production Experiments I: Finding Needed Words— Or Not	172
5.4	Production Experiments II: Planning Sentences	182
5.5	Comprehension Experiments I: Discriminating Between Similar Speech Sounds and Recognizing Words	185
5.6	Comprehension Experiments II: How Understanding Unfolds in Time	191
5.7	What Brain Imaging Adds to Psycholinguistic Studies: A First Look at Neurolinguistics	196
5.8	Summary	197

6 Analyzing Aphasic Speech and Communication: The Psycholinguistics of Adult Acquired Language Disorders 205

6.0	Why There's High Cost of Being Slow and Sounding Weird: Who Do They Think I Am?	206
6.1	Introduction to Aphasia	207
6.2	Aphasic Language Is Not Like Child Language	211
6.3	Aphasic Language Production	213
6.4	Figuring Out the Psycholinguistics Behind (Some) Aphasic Speech Production Errors	221
6.5	Psycholinguistic Considerations in Studying Aphasic Comprehension	233
6.6	Classifying Aphasias: The Boston Syndrome Categories and Some Reasons Why There Are Controversies About Them	240
6.7	Aphasia in Native Bilingual and Second-Language Speakers	243
6.8	Trying to Predict Communicative Success: Interaction, Gesture, and Communication	245
6.9	Brain Plasticity and New Hopes for Therapy	247

7 Developmental Psycholinguistics: Studies of First Language Acquisition 251

7.0	A Wealth of Studies, a Rich Topic	252
7.1	Output, Input, Intake, Imitation: How Do We Find Out What Toddlers Know About Language?	253
7.2	Building a Grammar: What Toddlers Say	263
7.3	Do Toddlers Have Grammar in the First Year of Speaking?	280
7.4	Language From the Third Trimester to the Beginning of Speech: First the Sounds, Then Their Meanings	282
7.5	Phonological Development in Toddlers	286
7.6	Learning About Word Meanings	292
7.7	Summary and Conclusion	294

8	The Psycholinguistics of Reading and Learning to Read	301
8.0	Introduction: Why Teaching Reading Is Controversial	302
8.1	Reading as a Psycholinguistic Process	303
8.2	Reading for Meaning: What Happens After a Word Is Activated?	315
8.3	Psycholinguistics and the Phonics/Whole-Word Teaching Controversy	316
8.4	Where Reading Errors Come From: Activation and Competition in Reading	319
8.5	When Sounding out Words Won't Work for You and Your Students: Orthographic Dazzle, Dialect Awareness, Speech Rate, and Hyperdistinct Speech	320
8.6	Morphology and Reading	324
8.7	Reading Chinese, Japanese, and Korean	325
8.8	Reading and Language Disorders	331
8.9	Summary	335
9	First and Second Language Acquisition: A Psycholinguistic Approach to Their Similarities and Differences	341
9.0	How Is Learning a First Language Different From Learning a Second Language, and Why?	342
9.1	How Does Learning Your First Language Change Your Brain?	345
9.2	What Happens When a New Data Set Meets an Experienced Brain?	350
9.3	What Else Is Different About the Older Learner?	356
9.4	What First-Language Learners and Second-Language Learners Have in Common	358
9.5	Language Processing in Bilingual Speakers	359
9.6	Accent Reduction: Psycholinguistics Meets the Sociolinguistics of Identity, Politics, and Prejudice	362
9.7	Psycholinguistics and Learning to Read and Write in a Second Language	363
9.8	Summary	366
10	Using Psycholinguistics in Testing, Teaching, and Therapy	373
10.0	Introduction	374
10.1	What Does It Mean To Look "Psycholinguistically" at Language Tasks?	377
10.2	Apraxia Testing: Clinical Testing and Its Problems	389

10.3	"Translating" Language Tests and Some Problems With Bilingual Aphasia Testing	399
10.4	The Long Road From a Psycholinguistic Idea to a Teaching or Remediation Method	403
10.5	Summary/Conclusion	411
<i>Afterword: Other Important Areas for Applying Psycholinguistics</i>		415
	First Language Under Stress: Topics in Developmental Difficulty	415
	Language, Aging, and Hearing Loss	416
<i>Glossary</i>		417
<i>Index</i>		475
