

A Neurolinguistic Theory of Bilingualism

Michel Paradis

McGill University, and Cognitive Neuroscience Center, UQAM

John Benjamins Publishing Company

Amsterdam/Philadelphia

Contents

Preface	vii
Introduction	1
CHAPTER 1	
Components of verbal communication	7
Implicit and explicit memory	7
Pragmatics	15
Motivation and affect	24
The Activation Threshold Hypothesis	28
Conclusion	30
CHAPTER 2	
Implicit and explicit language processes	33
The nature of implicit rules	33
Knowledge is not automatic and competence is not controlled	38
The role of metalinguistic knowledge in L2 language acquisition	50
The role of implicit/explicit memory in bilingual aphasia and amnesia ..	53
The fundamental import of implicit/explicit memory for the study of bilingualism	57
The critical period hypothesis	59
Conclusion	61
CHAPTER 3	
Bilingual aphasia	63
Recovery patterns	63
Attempted explanations	68
The assessment of bilingual aphasia	70
Implications of implicit/explicit memory dissociation for bilingual aphasia	87
The contribution of bilingual aphasia research	88
Implications for rehabilitation	88
Conclusion	94

CHAPTER 4	
Cerebral lateralization and localization	97
Differential lateralization	97
Differential localization	109
Conclusion	116
CHAPTER 5	
Neurofunctional modularity	119
Characteristics of neurofunctional modules	119
Neurofunctional subsystems	130
Evidence of modularity	138
Cognition: The subsystems Hypothesis generalized	143
The human organ analogy	148
Conclusion	150
CHAPTER 6	
Neuroimaging studies of the bilingual brain	153
What do neuroimaging studies of language evidence? How do we know?	153
The problems with neuroimaging studies	158
The need for a neurolinguistically informed theory	166
Results cannot be generalized from single words to "language"	173
Looking for converging evidence	180
Conclusions	183
CHAPTER 7	
An integrated perspective on bilingualism	187
What is represented vs. how it is organized and processed	187
Neurofunctional modularity	191
Language and thought in bilinguals	192
The Direct Access Hypothesis	203
The Subsystems Hypothesis	210
The integration of pragmatics	219
The integration of conscious and unconscious processing	222
The integration of motivation and affect	223
The integration of the various hypothetical constructs	223
Basic principles of an integrated neurolinguistic theory of bilingualism	224
Conclusion	226
Glossary	233
References	249
Subject Index	295
