

# **Dynamic economic theory**

---

Michio Morishima

# Contents

<i>Preface</i>	<i>page xi</i>
<b>1 The method of dynamic analysis</b>	<b>1</b>
1 Dynamic economic theory	1
2 Methods of determining prices: with and without an auctioneer	2
3 An outline of the book and its assumptions	6
<b>2 Households' and firms' economic behaviour</b>	<b>9</b>
1 Expectations and planning	9
2 Households' planning	11
3 Firms' planning	14
<b>3 Stability conditions for a temporary equilibrium: the linear case</b>	<b>19</b>
1 Excess demand functions	19
2 Time element ' $t$ '	20
3 Temporary equilibrium	21
4 Fundamental equation	23
5 Stability of temporary equilibrium	30
6 Samuelson's theory and direct buying and selling between traders	37
7 Hicks' and Sono's stability conditions	40
8 Stability of the canonical system – proportional changes in prices	51
9 An example of the canonical system	53
10 Structural stability	57
	vii

<b>4</b>	<b>Stability conditions for a temporary equilibrium: the non-linear case</b>	<b>67</b>
1	Price movements in the linear and non-linear systems	67
2	Price fluctuations in an isolated market	68
3	Stability of equilibrium in an isolated market	70
4	The law of alternation of stability and instability	74
5	An example of non-linear systems	75
6	A non-linear market of multiple commodities	78
7	The loanable fund theory versus the liquidity preference theory	83
<b>5</b>	<b>Comparative dynamics</b>	<b>92</b>
1	Method of analysis	92
2	Analysis of parameters – with special reference to the creation of money	94
3	Comparative dynamics analysis of the 'linear' model (I)	98
4	Comparative dynamics analysis of the 'linear' model (II) – effects of the creation of money	102
5	The relationship between comparative dynamics and comparative statics	110
6	Intertemporal relationships	113
7	A change in tastes – comparative dynamics over weeks (I)	117
8	The stability condition of fluctuations in effective prices	121
9	Long-run effects of a creation of money – comparative dynamics over weeks (II)	126
10	The stability theory of economic motion and the theory of growth [newly added]	132
	<b>Appendices</b>	<b>136</b>
I	Consumer behaviour and liquidity preference [1952]	136
II	Entrepreneur behaviour and liquidity preference	161
	<b>Mathematical notes</b>	<b>179</b>
I	The Hirsch theorem	179
II	The Frobenius theorem and its extension (with T. Fujimoto) [1974]	181

<b>ADDENDUM</b>	<b>188</b>
Introduction	188
<b>Article</b>	<b>196</b>
<b>I</b> Walras' own theory of tatonnement [partly written in 1958]	196
<b>II</b> Tatonnement in quantities: truncation, equilibration, growth [1956]	207
<b>III</b> A contribution to the non-linear theory of the trade cycle [1958]	222
<b>IV</b> Stability, oscillations and chaos	234
<b>V</b> A generalization of the gross substitute system [1970]	245
<b>VI</b> The laws of the working of the quasi-Frobenian system [1954, yet unpublished]	259
<b>VII</b> The Cournot–Walras arbitrage, resource consuming exchange, and competitive equilibrium (with M. Majumdar) [1978]	270
<b>VIII</b> The dilemma of durable goods	285
