# CONTENTS

	Page
Preface	ix
Acknowledgements	xi
<i>Plenary lecture</i>	
The genetic manipulation of antibiotic production in <i>Streptomyces</i> M. J. Bibb	1
<b>Part I: Genetic and Biochemical Variation in Culture</b>	
Variation in the secondary metabolism of cultured plant cells P. R. Holden, M. A. Holden & M. M. Yeoman	15
DNA methylation as a control phenomenon in plant cell culture A. Stafford, R. C. Cresswell, A. Blakemore, P. Harrison, C. Wells & N. Jeyeraj	31
Aspects of sesquiterpene phytoalexin formation in elicited cell suspension cultures of <i>Nicotiana tabacum</i> : accumulation, metabolism and enzymology D. R. Threlfall & I. M. Whitehead	41
The use of metal ions to induce the formation of secondary products in plant tissue culture D. R. Threlfall & I. M. Whitehead	51
Elicitation of cell cultures M. A. Holden, P. R. Holden & M. M. Yeoman	57
The effects of fungal elicitation on secondary metabolism in cell cultures of <i>Capsicum frutescens</i> P. R. Holden, M. A. Holden & M. M. Yeoman	67

Perturbation of alkaloid biosynthesis in transformed root cultures of solanaceous plants by metabolic precursors and their analogues	73
N. J. Walton, R. J. Robins, N. J. Belshaw, A. J. Parr, J. D. Hamill & M. J. C. Rhodes	
Rapid assay of tryptophan decarboxylase from plant cell cultures	79
E. J. M. Pennings, R. van der Bosch, R. van der Heijden, T. van der Leer & R. Verpoorte	
<b>Part II: Improvement by Screening and Selection</b>	
Strain improvement by screening and selection techniques	83
M. J. C. Rhodes, J. D. Hamill, A. J. Parr, R. J. Robins & N. J. Walton	
Screening of calli and compact globular structures of <i>Cinchona ledgeriana</i> for production of quinoline alkaloids	95
S. S. Hoekstra, P. A. A. Harkes, R. Verpoorte & K. R. Libbenga	
Exploiting variation in tropane alkaloid production by solanaceous plants	101
A. J. Parr, J. D. Hamill, J. Payne, M. J. C. Rhodes, R. J. Robins & N. J. Walton	
Changes in growth and nutritional requirements of cultured <i>Nicotiana tabacum</i> cv. Wisconsin-38 cells with increasing dependency upon photosynthesis for the provision of organic constituents	109
M. C. Hobbs & M. M. Yeoman	
<b>Part III: Improvement by Genetic Manipulation</b>	
Plant genetic transformation methods	115
J. D. Hamill	
Prospects for the genetic manipulation of complex metabolic pathways	123
K. Lindsey	
Chromosome stability in transformed hairy root cultures and the properties of variant lines of <i>Nicotiana rustica</i> hairy roots	137
E. L. H. Aird, J. D. Hamill, R. J. Robins & M. J. C. Rhodes	

Foreign gene insertion into transformed roots with binary vectors and <i>Agrobacterium rhizogenes</i> – potential for genetic manipulation of secondary metabolism	145
J. D. Hamill, D. M. Evans, R. J. Robins & M. J. C. Rhodes	
<b>Part IV: Biotechnology for Food Flavours and Colours</b>	
The value of plant biotechnology to the flavour industry	155
S. E. M. Pearce	
Fatty acid synthesis in <i>Theobroma cacao</i> beans and suspension cultures	169
C. Foster, R. Leathers, M. End, A. H. Scragg, G. Pettipher & P. Hadley	
Propenylcysteine sulphoxide biosynthesis in callus cultures of <i>Allium cepa</i> (L)	177
D. Musker, H. A. Collin, G. Britton & G. Ollerhead	
Essential oil accumulation in shoot proliferation cultures of <i>Pelargonium</i> spp.	187
B. V. Charlwood & C. Moustou	
The accumulation of flavour compounds by cultures of <i>Zingiber officinale</i>	195
K. A. Charlwood, S. Brown & B. V. Charlwood	
<b>Part V: Biotechnology for Producing Fine Chemicals</b>	
Medicinal products through plant biotechnology	201
M. F. Roberts	
Effects of elicitors on the production of secondary metabolites in plant cell cultures of <i>Cinchona</i> , <i>Rubia</i> , <i>Morinda</i> and <i>Tabernaemontana</i>	217
R. van der Heijden, R. Verpoorte & P. A. A. Harkes	
Selection of thiophene-producing calli of <i>Tagetes patula</i> in relation to the production of thiophenes in liquid cultures	225
D. H. Ketel	
Thiophene production from “hairy roots” of <i>Tagetes</i>	233
R. J. Westcott	
Transformed root cultures – fermentation aspects	239
M. G. Hilton, P. D. G. Wilson, R. J. Robins & M. J. C. Rhodes	

**Part VI: Techniques**

Flow cytometry and cell sorting as tools for culture improvement	247
A. Lister	
Red beet batch culture. Demonstration of a bubble-free Taylor-Couette bioreactor	257
D. A. Janes, N. H. Thomas & J. A. Callow	
Co-immobilization of urease and microbial cells	263
M. D. Trevan, I. Simpkins & A. L. Mak	
The axenic isolation of plant protoplasts using Percoll	269
P. J. Whitney & H. F. Beuschel	
Assay of gene expression by immunodetection	273
A. S. Kang, S. J. Abbott & N. Harris	
Electropermeabilization and ultrasonic techniques for harvesting secondary metabolites from plant cells <i>in vitro</i>	285
C. S. Hunter & N. J. Kilby	
Rapid identification of secondary products in plant cell cultures by thermospray liquid chromatography/mass spectrometry	291
F. A. Mellon	
<i>Species Index</i>	301
<i>Subject Index</i>	305
