# Financial Market Drift

Decoupling of the Financial Sector  
from the Real Economy?

With 52 Figures  
and 10 Tables

Springer

# Table of contents

<b>1. Introduction</b> .....	1
1.1 Defining the problem.....	1
1.2 Classification of the decoupling problem .....	3
1.3 Structure of the study.....	8
<b>2. The relative sizes of the financial sector and the real economy ....</b>	<b>11</b>
2.1 Definitional background to financial accounts .....	11
2.2 Empirical studies of financial sector growth in the development process .....	15
2.2.1 Long-term changes in the financial asset ratio .....	16
2.2.2 Financial sector structures in the development process.....	19
2.2.3 On the causality between financial sector and real development.....	23
2.3 Studies of the decoupling hypothesis .....	28
2.3.1 Overview of the typical argumentation model.....	28
2.3.2 Decoupling as an inherent problem .....	31
2.3.3 Decoupling as a fundamentally disruptive problem ....	39
2.3.4 Decoupling as a disruptive concomitant.....	49
2.3.5 Interim conclusion on the causes of decoupling .....	58
<b>3. Current empirical studies of decoupling characteristics .....</b>	<b>65</b>
3.1 Analysis of financial asset ratios in Germany .....	66
3.1.1 Introduction.....	66
3.1.2 Empirical description.....	68
3.1.3 Empirical causal analysis.....	71
3.2 Analysis of international foreign exchange trading turnover ...	78
3.2.1 Introduction.....	78
3.2.2 Empirical description.....	79
3.2.3 Analysis of trading motives of various market participants.....	82

3.2.4	Empirical analysis.....	88
3.2.5	Assessment in terms of the decoupling hypothesis.....	92
3.3	Analysis of equity market volumes focusing on the USA.....	93
3.3.1	Introduction.....	93
3.3.2	Problem areas in the explanation of trading volumes from a theoretical standpoint.....	94
3.3.3	The problem of empirical tests .....	96
3.3.4	Demonstration of the analysis problem using data from the NYSE .....	98
3.3.5	Stylized facts of empirical analyses of volume time series and explanatory models .....	106
3.3.6	Summary and appraisal.....	114
3.4	Excursus: Costly financial market turnover without a reasonable result? .....	118
4.	<b>Analysis of possible decoupling consequences for the financial sector .....</b>	<b>123</b>
4.1	Decoupling as a reflection of CAPM mis-specifications .....	123
4.2	Price volatility .....	137
4.2.1	Introduction.....	137
4.2.2	Empirical findings on price volatility .....	139
4.2.3	Interpretation of decoupling and efficient market hypothesis .....	150
4.2.4	Assessment .....	155
4.3	Prices.....	157
4.3.1	Introduction.....	157
4.3.2	Empirical findings on price levels .....	159
4.3.3	Interpretation of decoupling and efficient market hypothesis .....	167
4.3.4	Assessment .....	171
4.4	Financial sector stability .....	173
4.4.1	Definition and causes of instability .....	173
4.4.2	On the empirical recording of financial sector (in)stability.....	177
4.4.3	Interpretation from the perspective of competing hypotheses.....	179
4.4.4	Preliminary assessment.....	182

<b>5. Economic policy: Assessment and options</b> .....	183
5.1 Evidence for the decoupling hypothesis .....	183
5.1.1 Decoupling phenomenon .....	183
5.1.2 Pointers to the causes of decoupling.....	184
5.1.3 The consequences of decoupling for the financial sector and economic policy.....	186
5.2 Three evaluation-driven response concepts.....	190
<b>6. Concluding assessment of the decoupling hypothesis</b> .....	195
List of figures .....	201
List of tables .....	205
Bibliography .....	207
Index .....	225
