Contents

List of Contributors	vii
Preface	x
Chapter 1	1
Bioremediation: Balancing the Needs of Researchers, Practitioners, Regulators and Policymakers <i>Richard P.J. Swannell</i>	
Chapter 2	27
The Role of Microbiological Studies in Bioremediation Process Optimization <i>Stephen L. Rogers and Nick McClure</i>	
Chapter 3	61
Ecological Theory and Bioremediation <i>D. W. Graham and T. P. Curtis</i>	
Chapter 4	93
The Geochemistry and Hydrology of Groundwater Bioremediation by Natural Attenuation <i>Steven A. Banwart and Steven F. Thornton</i>	
Chapter 5	139
Using Stable Isotope Fractionations to Monitor <i>In-situ</i> Biodegradation Processes <i>Simon Bottrell and Mike Spence</i>	
Chapter 6	157
Intelligent Site Assessment- A Role for Ecotoxicology <i>Graeme I. Paton and Kenneth Killham</i>	

Chapter 7	185
Understanding Bioavailability of Polycyclic Aromatic Hydrocarbons: Mechanisms and Prediction <i>Carolyn M. Aitken, Adri C.T. van Duin and Matthew J. Collins</i>	
Chapter 8	205
Developments in Permeable Reactive Barrier Technology <i>G. B. Davis and B. M. Patterson</i>	
Chapter 9	227
Anaerobic Bioremediation – An Emerging Resource for Environmental Cleanup <i>John D. Coates and Romy Chakraborty</i>	
Chapter 10	259
Microbial Inoculants - Snake Oil or Panacea? <i>Irene Wagner-Döbler</i>	
Index	291
