<i>Preface</i>	ix
<i>Acknowledgements</i>	xi
PART I COUNTRY AND MANUFACTURING INDUSTRY BACKGROUND	
1 Country Background	3
1.1 History	3
Colonial legacy	3
Unilateral Declaration of Independence (UDI)	4
Independence	5
1.2 Geography and Natural Resources	8
Mineral resources	8
Agriculture	8
1.3 Policy and Market Environment	10
Adjustment	11
Market imperfections	13
Racial attitudes	13
Market orientation	14
Political and other non-economic constraints	15
2 Manufacturing Industry	18
2.1 Industrialization	18
2.2 Factors of Production	20
Raw materials	20
Labour	21
Capital stock	22
Organization and management	24
2.3 Policy	24
3 Education, Science and Technology	26
3.1 Education	26
3.2 Science and Technology Inputs	27
3.3 Science and Technology Outputs	27
Patents	27
Scientific papers	29
3.4 Support Institutions	30
Harare Polytechnic	31

Standards Association of Zimbabwe (SAZ)	31
Small Enterprises Development Corporation (SEDCO)	32
PART II CONCEPTUAL FRAMEWORK AND METHODOLOGY	
4 Conceptualization of Technology	37
4.1 Technological development as an Evolutionary Process	37
Technology acquisition	37
Modification of technology	38
The creation of technology	39
4.2 Organizing for Technology Acquisition and Technological Change	40
Internal division of labour and size of firm	40
Research and experimental development	41
Industrial engineering	42
Other engineering functions	42
5 Methodology	44
5.1 Field Work	44
5.2 Sample	45
Industry breakdown	45
Location	46
Size	46
Ownership and ethnic origin	47
5.3 Survey Hypotheses	48
Country characteristics	48
Industry characteristics	49
Firm characteristics	50
PART III MANUFACTURING TECHNOLOGY ACQUISITION AND OPERATION	
6 Acquisition of Technology	55
6.1 Origin of the Firm and Initial Studies	55
6.2 Source and Characteristics of the Equipment	57
Equipment selection	57
Age of the machinery and equipment	58
Equipment sources	58
New or used equipment?	59
Satisfaction with current equipment	60
Technical start-up problems	61
6.3 Use of Disembodied Foreign Technology	62

7	Plant Technical Operating Capabilities	65
7.1	General	65
7.2	Troubleshooting	67
7.3	Quality Control	68
7.4	Maintenance and Repair	69
7.5	Industrial Engineering	71
7.6	Safety and Environmental Control	72
8	Technological Functions and Their Organization	74
8.1	General	74
	Documentation	74
	Technical offices	75
	Level of technological organization	75
8.2	Product Design and Product Changes	76
	Source	76
	Product changes	76
	New product introduction	77
8.3	Technical Changes in the Production Process	77
8.4	Research and Development	78
8.5	Use of Support Services	79
	Desirable support services	80
8.6	Training	84
	Workers	84
	Professional and technical personnel	85
 PART IV TECHNICAL CHANGE, SKILLS, AND FIRM PERFORMANCE		
9	Planned Technical Change	89
9.1	Existence of Investment Plans	89
9.2	The Nature and Expected Impact of Technical Changes Planned	90
9.3	The Costs of Planned Investments	91
10	Skills and Technological Capability	94
10.1	High-Level Technical Skills	94
	Sector and country data	94
	Firm data	97
10.2	Technological Competence and Firm Economic Performance	97
	Survey data	98
	Panel data	98

PART V CONCLUSIONS AND POLICY INTERVENTIONS

11	Conclusions	107
11.1	Country Background	107
11.2	Manufacturing Industry	108
11.3	Education, Science and Technology	108
11.4	Acquisition of Technology	109
11.5	Technical Operating Capabilities	109
11.6	Technological Functions and their Organization	110
11.7	Planned Technical Change	110
11.8	Skills and Technological Capability	110
12	Policy Interventions	111
12.1	Industrial Policy	112
	Support services	112
	Entrepreneurship and investment behaviour	113
	Infrastructure	115
12.2	Human Resources Policy	116
	High-level technical skills	116
	Lower-level technical skills	118
12.3	Trade Policy	118
	Liberalization	118
	Manufacturing exports	119
	Administration	119
12.4	Technological Policy	120
	Technology transfer	120
	Technical operating capabilities	120
	Industrial research and experimental development	121
	<i>Appendix A: Questionnaire</i>	125
	<i>Appendix B: Food and Beverages</i>	155
	<i>Appendix C: Textiles and Clothing</i>	193
	<i>Appendix D: Wood and Furniture</i>	219
	<i>Appendix E: Metalworking</i>	243
	<i>Notes and References</i>	265
	<i>Bibliography</i>	269
	<i>Index</i>	273
