<i>Foreword by John Eatwell</i>	viii
<i>Preface</i>	x
<b>1 Introduction</b>	<b>1</b>
<b>2 Supply and Demand for 'Free' Capital and the Rate of Interest: Marshall's 'Real' Analysis</b>	<b>7</b>
2.1 Capital as a factor of production	8
2.2 The determinants of the schedules of supply and demand for 'free' capital	15
2.3 The rate of interest as 'the factor which brings the demand for investment and the willingness to save into equilibrium with one another'	22
<b>3 Marshall's Monetary Theory</b>	<b>25</b>
3.1 The supply of money	27
3.2 The demand for money and the determination of the value of money	28
3.3 Money, interest and prices: Marshall's primitive version of the 'cumulative process'	36
3.4 Some remarks on Marshall's trade-cycle theory	47
<b>4 Early Contributions I: Hawtrey and Robertson (1911-24)</b>	<b>52</b>
4.1 The first scattered hints along Marshallian lines (1911-13)	52
4.2 Hawtrey's contribution: from <i>Good and Bad Trade</i> (1913) to 1925	57
4.3 Robertson's early contribution: from <i>A Study of Industrial Fluctuation</i> (1915) to <i>Money</i> (1922)	78
<b>5 Early Contributions II: Keynes, Lavington and Pigou (1913-24)</b>	<b>89</b>
5.1 Keynes: from overinvestment (1913) to underinvestment (1924)	

5.2	Lavington's <i>English Capital Market</i> (1921): the 'threefold-margin' argument and the idea of a gap between 'saving and investment	96
5.3	Pigou's independent contribution (1920-4)	100
5.4	Principal conclusions	106
<b>6</b>	<b><i>Banking Policy and the Price Level and the 'Kinds of Savings'</i></b>	<b>109</b>
6.1	Robertson's model	111
6.2	The 'forced-saving' process	116
<b>7</b>	<b>Saving, Investment and the Theoretical Framework of the <i>Treatise</i> (1930)</b>	<b>124</b>
7.1	The fundamental equations	126
7.2	The extent of the departure from the 'forced-saving' doctrine	134
7.3	The role of profits as an expression of the gap between saving and investment	137
<b>8</b>	<b>Further Reflections on the Rate of Interest (1930-5)</b>	<b>141</b>
8.1	Robertson's 'Industrial Fluctuation and the "Natural" Rate of Interest' (1934)	143
8.2	Hicks's 'Suggestion for Simplifying the Theory of Money' (1935)	145
8.3	Principal conclusions	148
8.4	The <i>Treatise</i> and quantity adjustments	150
<b>9</b>	<b>The <i>General Theory</i> and the Principle of Effective Demand</b>	<b>157</b>
9.1	The principle of effective demand as a direct challenge to the 'forced-saving' doctrine	158
λ 9.2	The scope of validity of the principle of effective demand	166
× 9.3	Liquidity preference as an 'alternative' theory of interest	170
9.4	The marginal efficiency of capital	181
9.5	Concluding remarks	185
