

Water Movement Through Lipid Bilayers, Pores, and Plasma Membranes Theory and Reality

*Distinguished Lecture Series of the
Society of General Physiologists
Volume 4*

Alan Finkelstein

*Departments of Physiology & Biophysics and Neuroscience
Albert Einstein College of Medicine
Bronx, New York*

A Wiley-Interscience Publication

JOHN WILEY & SONS

New York • Chichester • Brisbane • Toronto • Singapore

Contents

PART I: THEORY	1
Chapter 1: Osmotic Equilibrium	3
Chapter 2: Osmotic Transport (Osmosis) Induced by an Impermeant Solute	10
A. "OIL" MEMBRANE	12
B. POROUS MEMBRANE	18
Pressure and Pressure Gradient within the Pore	20
<i>An Aside on the Possible Effect of Osmotic Pressure on Channel Gating</i> ...	23
The Value of P_f	27
Chapter 3: Tracer Diffusion of Water and the Relationship Between P_f and P_{d_w}	32
A. "OIL" MEMBRANE	33
B. POROUS MEMBRANE (PORE RADIUS)	35
C. UNSTIRRED LAYERS	38
Chapter 4: Single-File Transport	42
A. OSMOSIS (p_f)	42
B. TRACER DIFFUSION OF WATER (p_{d_w})	46
C. THE RATIO OF P_f TO P_{d_w}	49
D. THE COUPLING OF ION AND WATER FLUXES	55
Chapter 5: Osmotic Transport (Osmosis) Induced by a Permeant (Leaky) Solute	59
A. "OIL" MEMBRANE	61

CONTENTS

B.	POROUS MEMBRANE	66
	Single-file Pore	66
	Macroscopic Pore	68
	<i>One-dimensional Analysis</i>	68
	<i>Three-dimensional Analysis</i>	73
C.	UPHILL FLOW OF WATER	80
D.	IRREVERSIBLE THERMODYNAMICS	84
 PART II: LIPID BILAYER MEMBRANES		91
Chapter 6:	The Unmodified Membrane	93
A.	THE LIPID BILAYER AS AN OIL MEMBRANE	94
	Qualitative Considerations	94
	Quantitative Considerations	96
B.	THE WATER PERMEABILITY OF LIPID BILAYER MEMBRANES	102
C.	A NOTE ON UNSTIRRED LAYERS	105
Chapter 7:	Nystatin and Amphotericin B	107
A.	TWO-SIDED ACTION	109
	Ion Permeability	109
	Water and Nonelectrolyte Permeability	110
	Size of the Pore	114
	Model of the Pore	115
B.	ONE-SIDED ACTION	119
C.	WATER PERMEABILITY PER PORE	123
	Theory and Assumptions	123
	Values	125
D.	AREA OF MEMBRANE OCCUPIED BY PORES	128

CONTENTS

Chapter 8: Gramicidin A	130
A. PORE STRUCTURE	131
B. ION PERMEABILITY	134
C. WATER PERMEABILITY	135
Number of Water Molecules in the Pore	135
Water Permeability Per Pore	138
D. ION-WATER INTERACTION	139
Number of Water Molecules in the Pore	140
Effect of Ions on the Water Permeability of the Pore	143
Theory	143
Gramicidin A Pore	146
E. COMPARISON OF THE GRAMICIDIN A PORE WITH THE NYSTATIN AND AMPHOTERICIN B PORE	149

PART III: PLASMA MEMBRANES 153

Chapter 9: General Considerations	155
A. THE RATIO OF P_f TO P_{d_w}	156
B. TEMPERATURE DEPENDENCE OF P_f	158
C. VALUES OF REFLECTION COEFFICIENTS (σ 's)	159
D. SOLVENT DRAG	160
E. COMPARISON OF P_f TO SOLUTE P_d 's	161
F. THE NUMBER OF PORES IN A MEMBRANE	162
G. SUMMARY	164

CONTENTS

Chapter 10: The Red Cell Membrane	166
A. THE VALUE OF P_f/P_{a_w}	167
B. OTHER EVIDENCE FOR PORES	170
C. NONELECTROLYTE PERMEABILITY	172
D. CHARACTERISTICS OF THE PORES	174
E. WHO ARE THE WATER PORES?	176
F. WHAT ABOUT OTHER PORES?	180
G. CONCLUSION	183
 Chapter 11: Epithelia: Antidiuretic Hormone	
(ADH)-Induced Water Permeability	185
A. GENERAL WATER PERMEABILITY CHARACTERISTICS OF EPITHELIA	186
B. TOAD URINARY BLADDER	189
The Basal State	190
The ADH-Stimulated Bladder	191
<i>Mechanism of Action</i>	191
<i>The Value of P_f/P_{a_w}</i>	193
<i>The Meaning of $P_f/P_{a_w} \approx 17$</i>	197
<i>Comparison of the ADH-induced Pores to the Water Pores in the Red Cell Membrane</i>	201
 <i>Bibliography</i>	203
 <i>Index</i>	223
