

Paul Julian Weindling

Darwinism and Social Darwinism
in Imperial Germany:
The Contribution of the Cell Biologist
Oscar Hertwig (1849–1922)

GUSTAV FISCHER VERLAG · STUTTGART · NEW YORK 1991

Table of Contents

Abbreviations	9
Preface	11
I. The Cultural Context of Darwinism and Cell Theory	15
1. Darwinism in Germany	15
2. Darwinism and Social Change	22
3. History and 'Entwicklungsgeschichte'	28
4. Cell Theory and Developmental Theories	33
5. Hertwig's Contributions to Cell Biology	38
II. The Protoplasmic Theory of the Cell	42
1. Darwinism and Protoplasm	42
2. The History of Protoplasmic Theory	45
3. Sea Squirts: the First Darwinian Investigation	47
4. Cartilage and Protoplasm	49
5. Fish Scales and Dentine Teeth	50
6. Cellular Organization and Common Descent	56
III. The Nuclear Theory of the Cell: the Discovery of Fertilization	59
1. Darwinism, Reproduction and the Nucleus	59
2. The Fusion of Cell Nuclei: 'A Sun in the Egg'	63
3. Reception of the Nuclear Theory	73
4. Conflicting Theories of Fertilization	77
5. Fertilization and Heredity	80
IV. Cellular Growth, Descent and Germ Layers	86
1. Germ Layer Theory and Cell Theory	86
2. The Nervous System and Sensory Organs of the Medusa	91
3. The Organism of the Medusa and Germ Layer Theory	96
4. Further Research on the 'Neuromuskeltheorie'	97
5. Gastraea and Planula, Mesoderm and Mesenchyme: the End of the Archetype?	100
V. Cellular Concepts of the Organism: Developmental Morphology or Developmental Mechanics?	109
1. Gravity and Cellular Organization	109
2. Fertilization and Cell Structure	112
3. Cellular Experiments on Cross-Fertilization	115
4. Malformations and Cellular Regulation	119

5. Mechanics and Biology	130
6. The Organicist Approach	135
VI. Cellular Theories of Inheritance 1880–1918	138
1. Darwinism and Heredity	138
2. Reduction Division circa 1884–94	140
3. Preformation and Epigenesis	152
4. The Critique of Haeckel’s Biogenetic Law and of Darwinism.	160
5. The Reception of Mendelism	166
6. Radiation Biology and Lamarckism	175
VII. Medical Education and Biological Institutions	182
1. Between ‘Kultur’ and Professional Expertise	182
2. As Son, Student, and Assistant	187
3. As ‘Privatdozent’ in Jena	191
4. Appointments at Jena.	195
5. The Appointment in Berlin	205
6. The Berlin Institute and the Transition from ‘Anatomical’ to ‘Biological’	214
7. Scientific Institutions, Societies and Publications	230
8. The Biological Institute of the Kaiser-Wilhelm-Gesellschaft	242
9. Conclusions: From a Fortunate Cohort to a Defensive Elite	251
VIII. Biology as Social Ideology	254
1. Social Status and Nationalist Views	254
2. Haeckel and the Constitution of the Cell State	258
3. Social Writings.	262
4. The Social Refutation of Darwinism.	265
5. The Critique of Ethical, Social and Political Darwinism	274
6. The State as an Organism	288
IX. Biological Expertise and Organicist Ideology.	304
1. Cell Theory	306
2. The Cell State	309
Bibliography	
I. Manuscript Sources	313
II. Published Works by Oscar Hertwig	313
III. Printed Primary Sources and Secondary Literature	320
Appendix 1 The Jena Medical Faculty 1870–88	330
6 Appendix 2 The Berlin Medical Faculty 1870–1918	331

Appendix 3 Lectures given by O. Hertwig at Jena	336
Appendix 4 Lectures by O. Hertwig at Berlin	337
Appendix 5 Assistants at O. Hertwig's Berlin Institute	341
Appendix 6 Independent Researchers at O. Hertwig's Berlin Institute	343
Appendix 7 Equipment of O. Hertwig's Berlin Institute	344
Appendix 8 Publication figures of works by O. Hertwig published by Gustav Fischer, Jena.	347
Index	349
