# Outlook for Japanese and German Future Technology

Comparing Technology Forecast Surveys

With 68 Figures

**Physica-Verlag**

A Springer-Verlag Company

## TABLE OF CONTENTS

Foreword by BMFT

Foreword by STA

Preface by NISTEP

Preface by ISI

<b>1</b>	<b>General Method .....</b>	<b>1</b>
1.1	Review of Western Literature on the Delphi Approach.....	1
1.2	Overview of the Previous Delphi Experience in Japan.....	11
1.3	Basic Statistics .....	15
1.4	Special Aspects of Transposing the Japanese Delphi Approach to Another Country .....	20
1.5	Outline of Survey Parameters and Data Processing for the Comparison .....	31
1.5.1	Degree of Expertise .....	31
1.5.2	Degree of Importance .....	35
1.5.3	Time of Realization .....	35
1.5.4	Degree of Certainty .....	37
1.5.5	Necessity of International Joint Development .....	38
1.5.6	R&D Level.....	39
1.5.7	Constraints .....	40
<b>2</b>	<b>Basic Macro Comparison .....</b>	<b>41</b>
2.1	Expert Knowledge .....	42
2.2	Importance .....	46
2.3	Time of Realization .....	52
2.4	Foresight Precision .....	58

2.5	International Co-operation.....	62
2.6	R&D Level.....	66
2.6.1	The Japanese View .....	66
2.6.2	The German View.....	70
2.7	Constraints .....	73
2.7.1	Technical Constraints .....	75
2.7.2	Institutional Constraints.....	77
2.7.3	Cultural Constraints.....	80
2.7.4	Cost Constraints.....	83
2.7.5	Constraints in Funding .....	86
2.7.6	Constraints in Fostering or Securing Human Resources .....	88
2.7.7	Constraints in the R&D System .....	91
2.7.8	Summary .....	93
2.8	Conclusions on the Macro Level.....	93
<b>3</b>	<b>Cross Comparisons on the Macro Level .....</b>	<b>98</b>
3.1	Comparing Expert Knowledge with Importance .....	98
3.2	Comparing Expert Knowledge with Forecasted Time of Realization .....	100
3.3	Comparing Expert Knowledge with Constraints on Realization .....	101
3.4	Comparison of the Importance and the Time of Realization .....	103
3.5	Comparison of the Time of Realization and the Time Variance .....	104
3.6	Comparing Certainty with Time of Realization Variance .....	107
3.7	Comparison of the Necessity for International Co-operation with the Importance .....	111
3.8	Comparison of the Necessity for International Co-operation and the Estimated Time of Realization .....	112
3.9	Comparison of the Necessity for International Co-operation and the Present R&D Level .....	113

3.10	Correlation between Constraints and the Necessity of International Co-operation.....	116
3.11	Correlation of the R&D Level and the Importance of the Topics .....	117
3.12	Time of Realization and R&D Level .....	122
3.13	Correlation between the R&D Level and the Various Constraints on the Realization.....	123
3.14	Comparison of the Importance and the Various Constraints on the Realization .....	126
3.14.1	Technical Constraints .....	126
3.14.2	Cultural Constraints .....	127
3.14.3	Constraints in Costs .....	129
3.14.4	Constraints in Funding .....	131
3.14.5	Constraints in Fostering or Securing Human Resources .....	132
3.14.6	Constraints in the R&D System .....	134
3.15	Time of Realization in Comparison with the Constraints on Realization .....	135
3.15.1	Technical Constraints .....	135
3.15.2	Constraints in Funding .....	136
3.15.3	Constraints in Fostering or Securing Human Resources .....	138
3.15.4	Constraints in the R&D System .....	139
3.16	Comparative Conclusions for the Countries .....	140
<b>4</b>	<b>Cross Comparisons of Technological Topics on the Micro Level.....</b>	<b>144</b>
4.1	Comparing some Important Innovation Scenarios.....	144
4.1.1	Nanometer-size Structures.....	145
4.1.2	Cancer .....	148
4.1.3	Alzheimer's Disease.....	150
4.1.4	Renewable Sources of Energy.....	151
4.2	Estimation of the Importance on the Micro Level .....	154
4.2.1	Ranking by Importance in Japan and Germany .....	154
4.2.2	Ranking by the Difference in the Importance .....	158

4.3	Forecast of the Realization Times on the Micro Level .....	163
4.3.1	Near Future .....	163
4.3.2	Distant Future .....	172
4.3.3	Large Differences in the Realization Time .....	178
4.4	International Co-operation.....	183
4.4.1	Necessity for International Co-operation on the Micro Level .....	184
4.4.2	Ranking of the Major Differences in International Co- operation .....	190
4.5	Time Variance of the Forecast Compared with Certainty .....	193
4.6	Most Efficient Innovation Projects .....	200
4.6.1	Materials and Processing.....	203
4.6.2	Information and Electronics .....	205
4.6.3	Life Sciences.....	206
4.6.4	Particles.....	207
4.6.5	Marine Science and Earth Science .....	208
4.6.6	Mineral and Water Resources .....	210
4.6.7	Energy .....	211
4.6.8	Environment .....	213
4.6.9	Agriculture, Forestry and Fisheries .....	214
4.6.10	Production.....	216
4.6.11	Urbanization and Construction.....	217
4.6.12	Communications .....	219
4.6.13	Space .....	221
4.6.14	Transportation.....	222
4.6.15	Medical Care and Health.....	223
4.6.16	Culture and Lifestyles.....	225
4.6.17	Conclusions from the Most Efficient Innovation Projects.....	226
5	Conclusions .....	227
	Literature .....	236
	Appendix .....	238
