Tubes, Tenure and Turbulence

The effects of drought related migration on tenure issues
and resource management in Northern Senegal

1. INTRODUCTION	5
Drought and mobility: crisis or catalyst for change?	7
The setting	15
Analytical perspective: some initial views	15
The decline of pastoralism or drought as a revelatory crisis?	16
Stagnation or adaptation:	18
Pastoralists, Politics and the State	20
Landscapes and the transformation of the environment	22
Studying change in the making	23
Studying events as part of fieldwork	27
Outline of the study:	29
2. THE DESERTIFICATION DEBATE, THE SAHEL AND THE NON-EQUILIBRIUM PARADIGM	31
Depoliticising environmental change: the desertification debate	33
Uncovering uncertainty; the contours of the non-equilibrium framework	38
Implications for range management	41
Turning a blind eye on local initiatives and the effects of change	43
3. COMMONS, INSTITUTIONS AND BOUNDARIES	47
What is pastoral management about?	48
The indeterminacy of social formations	54
Fitting social dynamics into the study of common property:	55

The embeddedness of social institutions	56
The embeddedness of commons	58
Power, wealth and meaning	59
4. POST DROUGHT MIGRATION AND TECHNOLOGICAL INNOVATIONS	63
Yerim Sow, Barkedji: “The drought enabled herders to get acquainted with new pastures”	63
Bathil Ba, Ranerou: “The Firstcomers don’t want us here; they are just waiting for an occasion to get rid of us”	66
Some introductory remarks	67
Perceiving drought in a more open-ended perspective	67
The local context.....	69
Landscape as a largely anthropogenic creation	69
The borehole revolution	71
Boreholes and environmental degradation.....	76
Boreholes and agricultural encroachment	77
Post-drought Ferlo as a porous and dynamic formation	82
The effects of drought: expansion of irrigation and out-migration	83
The Egge-egge in the Linguere-Matam area	87
Uneven herd distribution	91
The inner tube and the donkey cart.....	98
From cattle to sheep	102
Drought recovery through specialisation instead of diversification	104
Changing herding strategies	107

Increased mobility and new grazing techniques	109
Marketing strategies.....	113
The new herding strategies and the orthodoxy of overgrazing	115
Competition for natural resources and conflicts over access.....	118
Adaptation to new opportunities	122
The drought as a watershed effect.....	125
5. STRATEGIES AND MANOEUVRES TO GAIN ACCESS TO AND CONTROL OVER RESSOURCES	129
An example from real life: The borehole of Naoré.....	131
Fluidity, flexibility, ambiguity and negotiability:.....	138
Customary regulation of access to pastures	139
Regulation of access to pastures through the control over water?	141
Ultimate dichotomies? Sedentary vs. mobile/indigenous vs. foreigner	145
The local institutional landscape and the myth of the obtrusive state.	150
The Rural Councils	153
The well committees	158
Excessive state centralisation or politisation of institutions?	164
6. POLITICAL AND SOCIAL REALIGNMENT IN A POST-DROUGHT CONTEXT	173
Increased mobility and exclusive management practices	174
Limiting access to water: the technical' solutions	177
Scarcity and other justifications	180
Taking advantage of the drought situation: the economic solution.....	183

Exclusivity and the heterogeneity of interests	185
The reaction of the FuutankoBe herders.....	189
Improving the bargaining position	189
Investment in clientelistic networks.....	193
Straddling between different identities:	199
Transgressing from stranger to local: officialising strategies.....	200
a). The role of taxes:	200
b). the long road to recognition; the appointment of ‘foreign’ village chiefs:	202
Securing control through private ownership	208
Heterogeneity of interests and politisation of resource management institutions	210
7. CONCLUSION	225
8. BIBLIOGRAPHY	225
