## 1

Research on Sustainable Agriculture in Semi-Arid Tanzania is a Mixed Bag - as it should be!.....	1
JANNIK BOESEN	

## 2

Agricultural Research and Sustainable Agriculture in Semi-Arid Tanzania.....	10
F.M. SHAO	

## 3

Sustainable Agriculture in Subsistence Economies: Some Overlooked Research Issues Based on Tanzania's Experiences.....	25
IDRISS. KIKULA	

## 4

Sustainable Agriculture in Semi-Arid Tanzania: Some Sociological Insights From Kondoa Irangi Hills, Ukara Island, Matengo Plateau & Mbulu Highlands.....	40
C.G. MUNG'ONG'O	

## 5

Sustainable Agriculture Under Population Stress in Semi-Arid Tanzania: The Case of Kondoa District.....	65
NDALAHWA F. MADULU	

## 6

- Household Food Security in a Soil and Water Conservation Project Area:  
The Case of Kondoa Eroded Area, Tanzania.....80  
EMMA T. LIWENGA

## 7

- Water Infiltration Rates on Degraded Soils in Mwisanga Catchment, Kondoa,  
Central Tanzania.....95  
P. Z. YANDA

## 8

- Enabling Strategies and State Intervention: Major Livelihood Problems  
in Semi-Arid Villages in Iringa District, Tanzania.....110  
HANS-OTTOSANO

## 9

- Land Conflicts and Channels of Conflict Resolution: Some Insights From  
Babati District, Tanzania.....139  
FAUSTIN P. MAGANGA

## 10

- Effects of Tillage and Rainfall on Sorghum Yields in Semi-Arid Tanzania.....162  
MAHOO H. F., HATIBUN., KAYOMBO B., & USSIRI D.A.N.

## 11

- Micro-Catchment Rain Water Harvesting and Maize Growth/Yields in Semi-Arid  
Areas of Morogoro and Kilimanjaro Regions. ....177  
HATIBUN., MAHOO H. F., KAYOMBO B., USSIRI D. A. N., & LAMECK P. G. M.

## List of Tables and Figures

Table 2.1: Distribution of cattle, sheep and goats in semi-arid areas of Tanzania.....	13
Table 3.1: Average total and average planted area by household in Tanzania.....	26
Table 4.1: Household distribution by wealth in Kondoa Irangi (%).....	44
Table 5.1: Household distribution by main activity of the household head.....	69
Table 5.2: Prices of agricultural inputs in Kondoa District (1988/89-1994/95.....	71
Table 5.3: Average yield of major cereal crops per hactre per kilogram (1993/94 - 1994/5).....	72
Table 5.4: Transport means in the highland and lowland areas of Kondoa District (%).....	74
Table 5.5: Population growth and density in kondoa District (1948 - 1988).....	75
Table 6.1: Number and percentage of respondents involved in crop farming.....	85
Table 6.2: Farmer's response on food production trends.....	86
Table 6.3: Major agricultural production problems indicated by respondents.....	88
Table 6.4: Fertilizer prices in the 1988/89 - 1994/95 agricultural seasons.....	89
Table 6.5: Respondents distribution by farm size.....	90
Table 7.1: Infiltration measurements on ten sites with different soils, and degrees of degradation.....	99
Table 8.1: Social economic groups in Ikuwala & Mkulula villages. Indicative values of socio-economic distinctions.....	121
Table 8.2: Socio-economic differentiation: social characteristics of the groups in Ikuwala and Mkulula.....	124
Table 8.3: Socio-economic differeriation and agricultural practices and performance.....	124
Table 8.4: Cash income sources of individual households (T. shs. 1000).....	126
Table 8.5: Differentiation and patterns of income sources.....	127
Table 10.1: Effects of tillage on bulk density (immediately after harvest) over the three seasons -1991/92 - 1993/94.....	165
Table 10.2: Effects of tillage on cumulative infiltration (cm), immediately after harvest.....	166
Table 10.3: Summary of rainfall characteristics at Hombolo.....	168

Table 10.4: Percentage emergence and pre- and post-rainfall conditions.....	169
Table 10.5: Sorghum grain yield and plant population as affected by tillage.....	170
Table 10.6: Fertilizer treatment effects on yield parameters.....	171
Table 10.7: Sorghum yield as affected by tillage and fertilizer treatment.....	172
Table 11.1: Effects of run-off farming and soil conservation tillage on maize yields for Kisangara site.....	188
Table 11.2: Effects of run-off farming and soil conservation tillage on maize yields for Kisangara site.....	189

## FIGURES

Figure 7.1: Location of the Mwisanga catchment study area.....	97
Figure 7.2: Map of site where infiltration measurements were carried out.....	100
Figure 7.3: Comparison of infiltration rates.....	101
Figure 7.4: Comparison of infiltration rates between less degraded <i>lixols</i> .....	101
Figure 7.5: Comparison of infiltration rates between stripped areas.....	102
Figure 7.6: Comparison of infiltration rates between less degraded <i>lixols</i> .....	104
Figure 7.7: The untilled B horizon (less permeable, therefore more run-off).....	104
Figure 7.8: Tilled B horizon to enhance water infiltration.....	105
Figure 7.9: Comparison of infiltration rates between two degraded <i>lixols</i> .....	105
Figure 7.10: Comparison of infiltration rates between <i>Albic Arenosol</i> and colluvial footslope degraded <i>lixols</i> .....	106
Figure 10.1: Layout of the Hombolo tillage experiment.....	164
Figure 10.2: Effect of tillage treatment on sorghum yields.....	170
Figure 10.3: Effect of fertilizer treatment on sorghum yields.....	172
Figure 11.1: Rainfall induces run-off on the catchment area.....	179
