

# **OLD ENGLISH POETIC METRE**

**B. R. Hutcheson**

**D. S. BREWER**

## CONTENTS

|   |            |
|---|------------|
| Abbreviations   | ix         |
| Preface   | xiii       |
| <b>CHAPTER 1 INTRODUCTION</b>                                     | <b>1</b>   |
| 1.A Assumptions and Basic Rules                                   | 3          |
| 1.B The Five Types Theory   | 7          |
| 1.C Formulism, Syntax, and Metre                                  | 12         |
| 1.D Alliteration  | 15         |
| 1.E The Evidence  | 16         |
| 1.F Theoretical Bases, Textual Bases, and Criteria for Emendation | 20         |
| 1.G Stress and Quantity   | 26         |
| 1.H The Poems in the Corpus                                       | 32         |
| <b>CHAPTER 2 SOUND CHANGES RELEVANT TO OLD ENGLISH METRE</b>      | <b>40</b>  |
| 2.A Loss of Intervocalic Consonants and Subsequent Contraction    | 41         |
| 2.B Svarabhakti Vowels  | 45         |
| 2.C Words with Etymological Vowels in Svarabhakti Environments    | 56         |
| 2.D Later Parasiting and Syncopation                              | 62         |
| 2.E Sound Changes: Conclusions                                    | 66         |
| <b>CHAPTER 3 RESOLUTION</b>                                       | <b>68</b>  |
| 3.A The Viability of Resolution                                   | 68         |
| 3.B Suspension of Resolution and Resolution of Secondary Stresses | 70         |
| 3.C The Metrical Significance of Resolution                       | 73         |
| 3.D Kaluza's Law  | 78         |
| 3.E Resolution: Conclusions                                       | 95         |
| <b>CHAPTER 4 ANACRUSIS</b>  | <b>97</b>  |
| 4.A Anacrusis in Type A   | 97         |
| 4.B Anacrusis in Type D   | 104        |
| 4.C Anacrusis: Conclusions  | 106        |
| <b>PART II A NEW DESCRIPTIVE THEORY</b>                           | <b>109</b> |
| II.A A-Types  | 110        |
| II.A.1 Bliss's Caesura: An Empty Distinction                      | 111        |
| II.A.2 Problematic A-Types  | 114        |
| II.A.3 A-Types: General Observations                              | 119        |
| II.B B-Types  | 126        |
| II.B.1 Problematic B-Types  | 127        |
| II.B.2 B-Types: General Observations                              | 132        |

|  |            |
|--|------------|
| <b>II.C C-Types</b>  | <b>134</b> |
| II.C.1 C-Types with Resolution not Suspended                       | 135        |
| II.C.2 C-Types: Single Stress C-Types                              | 136        |
| II.C.3 C-Types: General Observations                               | 137        |
| <b>II.D D-Types</b>  | <b>141</b> |
| II.D.1 Problematic D-Types   | 142        |
| II.D.2 D-Types: General Observations                               | 151        |
| <b>II.E E-Types</b>  | <b>155</b> |
| II.E.1 Problematic E-Types   | 156        |
| II.E.2 E-Types: General Observations                               | 161        |
| <b>II.F Three-Stress Patterns (Type 3)</b>                         | <b>164</b> |
| II.F.1 3-Types: General Observations                               | 168        |
| <b>II.G Remnants</b>   | <b>169</b> |
| <br><b>PART III CATALOGUE OF TYPES</b>                             | <b>173</b> |
| <b>III.A A-Types</b>   | <b>175</b> |
| III.A.1 A-Types without Secondary Stress                           | 175        |
| III.A.2 A-Types with Secondary Stress                              | 183        |
| III.A.3 A-Types with Anacrusis                                     | 192        |
| III.A.3.i A-Types with Monosyllabic Anacrusis                      | 192        |
| III.A.3.ii A-Types with Disyllabic Anacrusis                       | 197        |
| III.A.4 A-Types (Sievers's A3-Types)                               | 198        |
| III.A.4.i A-Types with no Secondary Stress                         | 198        |
| III.A.4.ii A-Types with Secondary Stress                           | 202        |
| III.A.4.iii Type <i>An</i>   | 203        |
| <b>III.B B-Types</b>   | <b>204</b> |
| III.B.1 B-Types without Secondary Stress                           | 204        |
| III.B.2 B-Types with Secondary Stress                              | 216        |
| <b>III.C C-Types</b>   | <b>219</b> |
| III.C.1 C-Types without Compounds                                  | 219        |
| III.C.2 C-Types Containing Compounds                               | 226        |
| III.C.3 C-Types with Resolution not Suspended                      | 231        |
| III.C.4 C-Types (Bliss's Type d1)                                  | 232        |
| <b>III.D D-Types</b>   | <b>235</b> |
| III.D.1 D-Types with Two Stressed Elements and Secondary Stress    | 235        |
| III.D.2 D-Types with Two Stressed Elements and No Secondary Stress | 240        |
| III.D.3 D-Types with a Single Primary Stress                       | 243        |
| III.D.4 D-Types with Anacrusis                                     | 244        |
| III.D.4.i D-Types with Monosyllabic Anacrusis                      | 244        |
| III.D.4.ii D-Types with Disyllabic Anacrusis                       | 246        |
| III.D.5 Hyper-Expanded D-Types                                     | 247        |

|   |     |
|---|-----|
| III.E E-Types   | 249 |
| III.E.1 Four-Syllable E-Types (and Resolved Equivalents)        | 249 |
| III.E.2 Five-Syllable E-Types (and Resolved Equivalents)        | 252 |
| III.E.3 Type <i>E</i>   | 256 |
| III.F Three-Stress Patterns (Type 3)                            | 257 |
| III.F.1 3-Types with Anacrusis                                  | 265 |
| Appendix A Double Alliteration Rates                            | 271 |
| Appendix B <i>Beowulf</i> Verses Scanned Differently from Bliss | 272 |
| Appendix C List of Types  | 283 |
| Appendix D Statistics   | 296 |
| Appendix E Frequent Formulaic Types                             | 303 |
| Appendix F Hypermetric Verses                                   | 317 |
| Appendix G Using the Database                                   | 325 |
| Bibliography  | 329 |
| General Index   | 339 |
| Index of Verses   | 345 |
