Preface	page	xiii
The authors		xv
1 Introduction and Summary, <i>by Mark Casson</i>		1
Structural changes in the world economy		1
Intra-firm trade in intermediate products		7
Factors affecting vertical integration		11
The measurement of intra-firm trade		17
A survey of statistical evidence on intra-firm trade		24
The structure of US intra-firm trade in 1977		34
The case-study approach to intra-firm trade		39
The growth of intra-firm trade in the motor industry		41
Intra-firm trade and the rationalization of the European bearing industry		44
The synthetic fibre industry		45
The tin industry		47
The copper industry		49
The banana export trade		51
The shipping industry		53
Conclusions		55
Notes		59

## Part I: Theory

2 The International Division of Labour, <i>by Mark Casson</i>	63
Introduction	63
The concept of the 'division of labour'	64
Static costs and benefits of the division of labour	67
Dynamic costs and benefits of the division of labour	71
Indivisibilities and economies of scale	73
Limits to the division of labour	74
Variations in the division of labour between industries	75
The international dimension: factors influencing the division of labour over space	78
A model of the international division of labour	81
Solution of the model	85
Explanation of the New International Division of Labour	87
Implications for future research	93
Appendix: solution to the formal model	94
Notes	95

<b>3 Vertical Integration and Intra-firm Trade,</b>	
<i>by Mark Casson</i>	103
Introduction	103
Disequilibrium pricing in a Walrasian market	106
Transfer pricing	109
Monopolistic price distortion and its substitution effect	109
Fixed costs and indivisibilities	111
Theories of imperfect information	115
Bargaining problems	119
Multilateral bargaining, collusion and the empty core	124
Competition and entry into the downstream industry	125
The dynamics of VI: changes in the division of labour over the industry life cycle	126
Industry-specific costs of VI	127
Social welfare and government policy towards VI	129
Predicting the inter-industry incidence of VI	130
Implications for future research	136
Notes	137

## **Part II: Industry Studies**

<b>4 The Motor Industry, by James Foreman-Peck</b>	141
Introduction	141
The rise of the American multinationals and the export trade	141
Multinational production and trade since the 1950s	149
Political pressure and alternatives to direct investment	153
Trade liberalization and the integration of multinational production	154
The determinants of intra-firm trade	156
A regression model of intermediate product trade	162
Inter-firm intermediate product trade	164
Summary, conclusion and prospect	169
Notes	172
<b>5 The Bearing Industry: Rationalization in Europe,</b>	
<i>by Bernard M. Wolf</i>	175
Introduction	175
The European bearing industry	179
Rationalization by SKF	181
The Japanese entry into the European bearing market	186
Rationalization by other firms operating in Europe	189
Conclusions	191
Notes	192

<b>6</b>	<b>The Synthetic Fibre Industry: Innovation, Integration and Market Structure, by Robert A. Read</b>	196
	Introduction	196
	The early rayon industry	196
	The technical development of synthetic fibres	200
	Innovation in petrochemicals, 1919-45	204
	The growth of petrochemicals production, 1946-80	205
	The origins of the major synthetic fibre companies, 1940-80	206
	Economies of scale and vertical integration	209
	International production and intra-firm trade	213
	The international division of labour: the overseas activities of Japanese synthetic fibre companies	217
	Notes	223
<b>7</b>	<b>The Tin Industry, by Jean-Francois Hennart</b>	225
	Origins of the industry	225
	The rise of new producers, 1870-1920	226
	The boom years, 1920-9	230
	Tin under control, 1924-40	232
	The postwar period, 1950-81	234
	The situation in 1982	238
	Mining technology	241
	Concentration, smelting and recycling	245
	Uses of tin	248
	Multinational enterprise in the tin industry	250
	Horizontal foreign direct investment	254
	Vertical integration: general considerations	257
	Vertical integration in the tin industries of Malaysia, Thailand and Bolivia	260
	A cross-country comparison of vertical integration	263
	Conclusion	268
	Notes	269
<b>8</b>	<b>The Copper Industry, by Robert A. Read</b>	275
	Introduction	275
	The British copper and brass industry, 1689-1830	275
	Early overseas investment: the nineteenth century	
	Chilean copper trade	276
	The US copper industry, 1845-90	277
	The internationalization of copper production and cartels, 1887-1939	280
	The technology of copper production	281
	Changes in the structure of the copper industry, 1940-80	286
	Economies of scale, industrial concentration and intra-firm trade	300

International production and the pattern of mineral diversification	304
New forms of vertical linkages; Japanese corporate investments and contractual arrangements in the world copper industry	308
Notes	312
<b>9 The Banana Industry: Oligopoly and Barriers to Entry, by Robert A. Read</b>	<b>317</b>
Introduction	317
The development of the early banana export industry	317
Barriers to entry and oligopoly in the banana industry, 1870–1929	320
Scientific and operational innovations, 1930–80	321
Changes in corporate and market structure since 1945	325
Trends in integration and dis-integration	327
The location of corporate banana production and market-sourcing	331
Corporate sourcing strategies: the Japanese banana market, 1960–80	334
Postscript	340
Notes	342
<b>10 The Shipping Industry, by Mark Casson, David Barry and Dennis Horner</b>	<b>343</b>
Introduction	343
Early organization of coastal and Mediterranean shipping	346
The evolution of ocean shipping	348
Origins of the conference system	349
The shipping industry since the Second World War	351
The growth of container traffic	353
Integration between industrial production and shipping	355
Limitations of integration	359
The liner conference as an alternative to integration	361
Integration and diversification by shipping companies	363
Conclusions and implications for future research	369
Notes	370
References	372
Index	389
