CONTENTS

Preface xv

Acknowledgments xxiii

Acronyms xxv

1 NORMAL PREDICTION INTERVALS 1

1.1 Overview 1

1.2 Prediction Intervals for the Next Single Measurement from a Normal Distribution 2

1.3 Prediction Limits for the Next k Measurements from a Normal Distribution 4

1.4 Normal Prediction Limits with Resampling 8

1.5 Simultaneous Normal Prediction Limits for the Next k Samples 11

1.6 Simultaneous Normal Prediction Limits for the Next r of m Measurements at Each of k Monitoring Wells 15

1.7 Normal Prediction Limits for the Mean(s) of $m > 1$ Future Measurements at Each of k Monitoring Wells 27

1.8 Summary 32

2 NONPARAMETRIC PREDICTION INTERVALS 35

2.1 Overview 35

2.2 Pass 1 of m Samples 36

2.3 Pass $m - 1$ of m Samples 48
2.4 Pass First or All $m - 1$ Resamples 51
2.5 Nonparametric Prediction Limits for the Median of m Future Measurements at Each of k Locations 64
2.6 Summary 65

3 PREDICTION INTERVALS FOR OTHER DISTRIBUTIONS 67

3.1 Overview 67
3.2 Lognormal Distribution 68
3.2.1 UPL for a Single Future Observation 68
3.2.2 Prediction Limits for $m = 1$ Future Measurement at Each of k Locations 69
3.3 Lognormal Prediction Limits for the Median of m Future Measurements 70
3.4 Lognormal Prediction Limits for the Mean of m Future Measurements 71
3.5 Poisson Distribution 72
3.5.1 Poisson Prediction Limits 74
3.5.2 Discussion 75
3.6 Summary 76

4 GAMMA PREDICTION INTERVALS AND SOME RELATED TOPICS 77

4.1 Overview 77
4.2 Gamma Distribution 77
4.2.1 Prediction Limits for a Single Measurement from a Gamma Distribution 78
4.2.2 Simultaneous Gamma Prediction Limits for the Next r of m Measurements at Each of k Monitoring Wells 80
4.3 Comparison of the Gamma Mean to a Regulatory Standard 94
4.4 Summary 95

5 TOLERANCE INTERVALS 97

5.1 Overview 97
5.2 Normal Tolerance Limits 98
5.3 Poisson Tolerance Limits 103
5.4 Gamma Tolerance Limits 105
5.5 Nonparametric Tolerance Limits 109
5.6 Summary 109

6 METHOD DETECTION LIMITS 111

6.1 Overview 111
6.2 Single Concentration Designs 112
6.2.1 Kaiser–Currie Method 112

6.2.2 USEPA–Glaser et al. Method 118
6.3 Calibration Designs 120
6.3.1 Confidence Intervals for Calibration Lines 120
6.3.2 Tolerance Intervals for Calibration Lines 121
6.3.3 Prediction Intervals for Calibration Lines 122
6.3.4 Hubaux and Vos Method 122
6.3.5 The Procedure Due to Clayton and Co-Workers 124
6.3.6 A Procedure Based on Tolerance Intervals 125
6.3.7 MDLs for Calibration Data with Nonconstant Variance 128
6.3.8 Experimental Design of Detection Limit Studies 128
6.3.9 Obtaining the Calibration Data 130
6.4 Summary 136

7 PRACTICAL QUANTITATION LIMITS 137

7.1 Overview 137
7.2 Operational Definition 138
7.3 A Statistical Estimate of the PQL 138
7.4 Derivation of the PQL 140
7.5 A Simpler Alternative 142
7.6 Uncertainty in Y_α^* 142
7.7 The Effect of the Transformation 143
7.8 Selecting N 144
7.9 Summary 144

8 INTERLABORATORY CALIBRATION 147

8.1 Overview 147
8.2 General Random-Effects Regression Model for the Case of Heteroscedastic Measurement Errors 148
8.2.1 Rocke and Lorenzato Model 148
8.3 Estimation of Model Parameters 149
8.3.1 Iteratively Reweighted Maximum Marginal Likelihood 149
8.3.2 Method of Moments 151
8.3.3 Computing a Point Estimate for an Unknown True Concentration 152
8.3.4 Confidence Region for an Unknown Concentration 153
8.4 Applications of the Derived Results 154
8.5 Summary 159

9 CONTAMINANT SOURCE ANALYSIS 161

9.1 Overview 161
9.2 Statistical Classification Problems 162
9.2.1 Classical Discriminant Function Analysis 162

9.2.2 Parameter Estimation 164
9.3 Nonparametric Methods 164
9.3.1 Kernel Methods 165
9.3.2 The k-Nearest-Neighbor Method 166
9.4 Summary 189

10 INTRA-WELL COMPARISON 191

10.1 Overview 191
10.2 Shewhart Control Charts 192
10.3 CUSUM Control Charts 193
10.4 Combined Shewhart-CUSUM Control Charts 193
10.4.1 Assumptions 193
10.4.2 Procedure 194
10.4.3 Detection of Outliers 195
10.4.4 Existing Trends 196
10.4.5 A Note on Verification Sampling 196
10.4.6 Updating the Control Chart 197
10.4.7 Statistical Power 197
10.5 Prediction Limits 200
10.6 Pooling Variance Estimates 201
10.7 Summary 204

11 TREND ANALYSIS 205

11.1 Overview 205
11.2 Sen Test 206
11.3 Mann-Kendall Test 208
11.4 Seasonal Kendall Test 211
11.5 Some Statistical Properties 214
11.6 Summary 215

12 CENSORED DATA 217

12.1 Conceptual Foundation 218
12.2 Simple Substitution Methods 219
12.3 Maximum Likelihood Estimators 220
12.4 Restricted Maximum Likelihood Estimators 224
12.5 Linear Estimators 225
12.6 Alternative Linear Estimators 231
12.7 Delta Distributions 234
12.8 Regression Methods 236
12.9 Substitution of Expected Values of Order Statistics 238
12.10 Comparison of Estimators 240

12.11 Some Simulation Results 242
12.12 Summary 244

13 NORMAL PREDICTION LIMITS FOR LEFT-CENSORED DATA 245

13.1 Prediction Limit for Left-Censored Normal Data 246
13.1.1 Construction of the Prediction Limit 246
13.1.2 Simple Imputed Upper Prediction Limit (SIUPL) 247
13.1.3 Improved Upper Prediction Limit (IUPL) 248
13.1.4 Modified Upper Prediction Limit (MUPL) 248
13.1.5 Modified Average Upper Prediction Limit (MAUPL) 248
13.2 Simulation Study 249
13.3 Summary 253

14 TESTS FOR DEPARTURE FROM NORMALITY 257

14.1 Overview 257
14.2 A Simple Graphical Approach 258
14.3 Shapiro-Wilk Test 262
14.4 Shapiro-Francia Test 264
14.5 D'Agostino Test 267
14.6 Methods Based on Moments of a Normal Distribution 267
14.7 Multiple Independent Samples 272
14.8 Testing Normality in Censored Samples 276
14.9 Kolmogorov-Smirnov Test 277
14.10 Summary 277

15 VARIANCE COMPONENT MODELS 281

15.1 Overview 281
15.2 Least-Squares Estimators 282
15.3 Maximum Likelihood Estimators 285
15.4 Summary 288

16 DETECTING OUTLIERS 289

16.1 Overview 289
16.2 Rosner Test 291
16.3 Skewness Test 295
16.4 Kurtosis Test 295
16.5 Shapiro-Wilk Test 295
16.6 E_m statistic 296
16.7 Dixon Test 296
16.8 Summary 301

17 SURFACE WATER ANALYSIS 303

17.1 Overview 303
17.2 Statistical Considerations 305
17.2.1 Normal LCL for a Percentile 306
17.2.2 Sampling Frequency 307
17.2.3 Lognormal LCL for a Percentile 308
17.2.4 Nonparametric LCL for a Percentile 309
17.3 Statistical Power 309
17.4 Summary 314

18 ASSESSMENT AND CORRECTIVE ACTION MONITORING 317

18.1 Overview 317
18.2 Strategy 318
18.3 LCL or UCL? 322
18.4 Normal Confidence Limits for the Mean 323
18.5 Lognormal Confidence Limits for the Median 324
18.6 Lognormal Confidence Limits for the Mean 324
18.6.1 The Exact Method 324
18.6.2 Approximating Land's Coefficients 324
18.6.3 Approximate Lognormal Confidence Limit Methods 329
18.7 Nonparametric Confidence Limits for the Median 331
18.8 Confidence Limits for Other Percentiles of the Distribution 332
18.8.1 Normal Confidence Limits for a Percentile 332
18.8.2 Lognormal Confidence Limits for a Percentile 333
18.8.3 Nonparametric Confidence Limits for a Percentile 334
18.9 Summary 335

19 REGULATORY ISSUES 337

19.1 Regulatory Statistics 337
19.2 Methods to Be Avoided 338
19.2.1 Analysis of Variance (ANOVA) 338
19.2.2 Risk-Based Compliance Determinations: Comparisons to ACLs and MCLs 339
19.2.3 Cochran's Approximation to the Behrens Fisher t-Test 342
19.2.4 Control of the False Positive Rate by Constituents 344
19.2.5 USEPA's 40 CFR Computation of MDLs and PQLs 344
19.3 Verification Resampling 345
19.4 Inter-Well versus Intra-Well Comparisons 346
19.5 Computer Software 347
19.6 More Recent Developments 348

20 SUMMARY **351**

Topic Index 366
