

New Uses for New Phylogenies

Edited by

PAUL H. HARVEY

Department of Zoology, University of Oxford, UK

ANDREW J. LEIGH BROWN

*Institute of Cell, Animal and Population Biology
University of Edinburgh, UK*

JOHN MAYNARD SMITH

School of Biological Sciences, University of Sussex, UK

SEAN NEE

Department of Zoology, University of Oxford, UK

Oxford · New York · Tokyo

OXFORD UNIVERSITY PRESS

1996

Contents

List of contributors	ix
1. What this book is about <i>Paul H. Harvey and Sean Nee</i>	1
The coalescent	
2. New phylogenies: an introductory look at the coalescent <i>Rosalind M. Harding</i>	15
3. Genealogies and geography <i>N. H. Barton and I. Wilson</i>	23
4. The coalescent process and background selection <i>R. R. Hudson and N. L. Kaplan</i>	57
5. Inferring population history from molecular phylogenies <i>Sean Nee, Eddie C. Holmes, Andrew Rambaut, and Paul H. Harvey</i>	66
6. Applications of intraspecific phylogenetics <i>Keith A. Crandall and Alan R. Templeton</i>	81
Inferences from trees	
7. Inferring phylogenies from DNA sequence data: the effects of sampling <i>Sarah P. Otto, Michael P. Cummings, and John Wakeley</i>	103
8. Uses for evolutionary trees <i>Walter M. Fitch</i>	116
9. Cross-species transmission and recombination of 'AIDS' viruses <i>Paul M. Sharp, David L. Robertson, and Beatrice H. Hahn</i>	134
10. Using interspecies phylogenies to test macroevolutionary hypotheses <i>Andy Purvis</i>	153
11. Using phylogenetic trees to reconstruct the history of infectious disease epidemics <i>Eddie C. Holmes, Paul L. Bollyky, Sean Nee, Andrew Rambaut, Geoff P. Garnett, and Paul H. Harvey</i>	169
12. Relating geographic patterns to phylogenetic processes <i>A. Malhotra, R. S. Thorpe, H. Black, J. C. Daltry, and W. Wüster</i>	187
13. Uses of molecular phylogenies for conservation <i>Craig Moritz</i>	203

Combining phylogenetic evidence

14. Testing the time axis of phylogenies 217
M. J. Benton
15. Comparative evolution of larval and adult life-history stages and small subunit ribosomal RNA amongst post-Palaeozoic echinoids 234
A. B. Smith, D. T. J. Littlewood, and G. A. Wray
16. Molecular phylogenies and host-parasite cospeciation: gophers and lice as a model system 255
Roderic D. M. Page and Mark S. Hafner

Character evolution

17. A microevolutionary link between phylogenies and comparative data 273
Emilia P. Martins and Thomas F. Hansen
18. Comparative tests of evolutionary lability and rates using molecular phylogenies 289
John L. Gittleman, C. Gregory Anderson, Mark Kot, and Hang-Kwang Luh
19. Community evolution in Greater Antillean *Anolis* lizards: phylogenetic patterns and experimental tests 308
Jonathan B. Losos
20. The evolution of body plans: HOM/*hox* cluster evolution, model systems, and the importance of phylogeny 322
Axel Meyer
- Index 341
