#### Section 1

Symmetrical Analysis Techniques and Symbolic Matrices of Matrix Genetics

#### Chapter 1

Genetic Code: Emergence of Symmetrical Pattern, Beginnings of Matrix Genetics	1
Abstract	1
Introduction and Background	1
Significance of Symmetrical Patterns for Biology, Molecular Genetics and Bioinformatics	3
Information Science, the Noise-Immunity and the Matrix Approach to the Genetic Code	6
The Basic Structures of the Genetic Code	8
The Binary Sub-Alphabets of the Genetic Alphabet for Numbering the Multiplets in	
Genetic Matrices	11
Natural System of Numbering the Genetic Multiplets	12
The Matrix Numbering the Genetic Multiplets and Matrices of Diadic Shifts	17
Future Trends and Conclusion	20
References	22

#### Chapter 2

Matrix Form	1
Abstract	1
Introduction and Background	1
Peculiarities of Degeneracy of the Genetic Code	2
Symmetrical Properties of Genetic Matrices of Triplets under Permutations of Positions	
Inside Triplets	5
Genomatrices with the Property of the Tetra-Self-Reproducing	9
Symmetrical Properties of Genetic Matrices under Alphabetic Permutations in the Set of	
64 Triplets	2

Future Trends and Conclusion	47
References	49

#### Chapter 3

.

Biological Evolution of Dialects of the Genetic Code	
Abstract	50
Introduction and Background	50
Phenomenological Rules of Evolution of Known Dialects of Genetic Codes	53
The Chronocyclic Conception and The Degeneracy in the Dialects of the Genetic Code	55
Why 20 Amino-Acids?	59
Future Trends and Conclusion	60
References	

# Section 2

#### Symmetrical Analysis Techniques and Numeric Matrices of the Genetic Code

# Chapter 4

.

•

۰.

Numeric Genomatrices of Hydrogen Bonds, the Golden Section, Musical Harmony,	
and Aesthetic Feelings	
Abstract	
Introduction and Background	65
Numeric Genomatrices of Hydrogen Bonds	69
The Numeric Genomatrices and the Golden Section	
The Genomatrices, Musical Harmony and Pythagorean Musical Scale	75
A Scale of the Golden Wurf, Music and Fibonacci Numbers	
On Harmony of a Scale of Protons in the Set of Amino-Acids	
Future Trends and Conclusion	
References	89

#### Chapter 5

Genetic Code and Stochastic Matrices	
Abstract	
Introduction and Background	
Genetic Code, Hamming Distance and Stochastic Matrices	
Genetic Code, Attributive Mapping and Stochastic Matrices	100
Genetic Code, Power of Matrices and Stochastic Matrices	
Future Trends and Conclusion	112
References	113

#### Chapter 6

The Genetic Code, Hadamard Matrices, Noise Immunity, and Quantum Computers	
Abstract	115
Introduction and Background	115

About the Importance of Amino-Groups NH,11	9
Genetic Informatics, Hadamard Matrices and Quantum Computers	2
Why Does the Genetic Alphabet Consist of Four Letters?	4
Cyclic Shifts, Cyclic Codes and the Principle of Molecular Economy in Genetic Informatics	5
Future Trends and Conclusion	6
References	7

#### Section 3 Algebras of Genetic Codes

# Chapter 7

Genomatrices and the Genetic Octet Yin-Yang-Algebras	132
Abstract	. 132
Introduction and Background	. 132
The Genetic Octet Matrix as the Matrix Form of Presentation of the Octet Algebra	. 134
The Alphabetic Algorithm of the Yin-Yang-Digitization of 64 Triplets	. 135
The Genomatrix YY <sub>s</sub> as the Element of the Octet Yin-Yang-Algebra	. 137
The Structural Analogies between the Genomatrix $[C A; UG]^{(3)}$ and the Matrix $YY_{s}$	. 142
The Six Kinds of the Genetic Octet Yin-Yang-Algebras Connected with Permutations of	
Positions in Triplets	. 143
The Genetic Yin-Yang Octets as "Double Genoquaternions"	. 146
The Comparison between the Classical Vector Calculation and the Genovector Calculation	. 148
The Parametric Reduction of the Genetic Octet Yin-Yang Algebra to the 4-Dimensional Algebra	
of Tetrions	. 150
About Genetic Mechanics and the Idea by Pythagoras	. 153
What is Life from the Viewpoint of Algebra? The Problem of Algebraization of Bioinformatics	
and Biology	. 155
Solutions and Recommendations	. 157
Future Trends and Conclusion	. 163
References	. 166

# Chapter 8

.

The Evolution of the Genetic Code from the Viewpoint of the Genetic 8-Dimensional	
Yin-Yang-Algebra	168
Abstract	168
Introduction and Background	169
The Comparison Analysis and Phenomenological Rules of Dialects of the Genetic Code	171
The Molecular-Sexual Approach in Molecular Genetics	177
The Example of the Pairs of Histones	179
Whether an Unknown Quantum Mechanical Factor of a "Sexual Attraction" among Genetic	
Molecules Exists?	180
The Analysis of the Insulin Structure as the Simplest Example	181

Some Applications of Results of Matrix Genetics in Bioinformatics and Algebraic Biology	184
Solutions and Recommendations	188
Future Trends and Conclusion	189
References	190

# Chapter 9

Chapter 9	
Multidimensional Numbers and the Genomatrices of Hydrogen Bonds	
Abstract	
Introduction and Background	
The Hyperbolic Matrions as a Special Kind of Hypercomplex Numbers	
The Circular Matrions	
Rules of Eigenvalues of Matrices of Circular Matrions	
Circular Matrions and the Series of Natural Numbers	
Solutions and Recommendations	
Future Trends and Conclusion	
References	

#### Section 4 Connections of Matrix Genetics with Other Fields of Science and Culture

#### Chapter 10

Genetic System, Fibonacci Numbers, and Phyllotaxis Laws	
Abstract	208
Introduction and Background	208
Fibonacci's Matrices and Biological Laws of Phyllotaxis	
Additional Facts about the Golden Section and Matrices	
Hadamard Matrices, Projective Geometry and the Golden Wurf	
Future Trends and Conclusion	
References	220

# Chapter 11

•

Physiological Cycles and Their Algebraic Models in Matrix Genetics	222
Abstract	222
Introduction and Background	222
Revealing New Genetic Algebras as a Result of Cyclic Permutations of Genetic Elements	225
The Oppositional Category of Genetic Yin-Yang-Matrices	233
Generative and Suppressive Properties of Yin-Yang-Matrices of the Two Categories	236
Joining of the Idea by Pythagoras and the Idea of Cyclic Changes: About Cellular Automata,	
Neurocomputers and a Notion of Biological Time	240
Solutions and Recommendations	242
Future Trends and Conclusion	244
References	245

Chapter 12	
Matrix Genetics and Culture	
Abstract	
Introduction and Background	
The Genetic Code and Linguistics	
The Genetic Code, a Color Perception and a Color Communication	
Parallels Between Patterns of the Genetic Code and Patterns of "I Ching"	
Musical Harmony in the Matrices of the Genetic Code and of "I Ching"	
Future Trends and Conclusion	259
References
