

Professional Eclipse 3 for Java™ Developers

Berthold Daum

Contents

Introduction	ix
Chapter 1: Introduction to Eclipse	1
Installing Eclipse	1
The First Application: Hello World	5
Perspectives	5
Projects	7
Create a New Class	7
Launch	9
The Most Important Preferences for Java Development	10
Workbench Preferences	11
Installed JREs	12
Compiler Preferences	14
Formatting Code	15
Templates	16
Tasks and Problems	18
Problems, Problems	19
General Tasks	21
Bookmarks	22
The Scrapbook	22
Summary	24
Chapter 2: Effective Programming with Eclipse	25
Little Helpers	25
System Information	25
Help and Hover	26
Java Information Views	27
Automatic Code Completion	28
The Correction Assistant	33
Convenience Functions of the Java Editor	35
Source Code Navigation	36
Refactoring Code	38
Modifying Types	38
Refactoring Code	39
Undo and Redo	42

Contents

Local History	43
Comparing Resources	43
Replacing with an Older Version	43
Restore Deleted Resource	43
Summary	44
Chapter 3: The Art of (Visual) Composition	45
Installation	45
Invocation	46
Preferences	46
Composition	46
Beans and Bean Properties	48
Generic Beans	48
Properties	48
Layouts	49
Event Processing	49
Summary	50
Chapter 4: Organizing Your Code	51
The Workbench	51
Resources	52
Resource Types	52
Where Resources Are Stored	52
Synchronizing Resources	53
Navigation	53
Associations	54
Packages	55
Folders and Packages	55
Navigation	56
Hierarchy	56
The Outline View	57
Representation	58
Context Functions	59
Searching	60
The Search Function	60
Find and Replace	62
Marking Name Occurrences	63
Arranging Editors and Views	63
Docked Windows	63
Stacked Windows	64
Desktop Windows	64
FastView	64

Opening and Closing Windows	65
Maximizing Windows	65
Minimizing Views	65
Managing Perspectives	65
Defining New Perspectives	65
Configuring Perspectives	66
Importing Files	67
Project Properties	69
The Java Browsing Perspective	71
Summary	72
Chapter 5: Project One: Duke Speaks	73
Setting Up the Project	73
A Short Excursion into Speech Synthesis	74
Extending the FreeTTS System	75
Animation Events	75
The Animator	77
Embedding into FreeTTS	81
Connection with the Java Audio System	83
The User Interface	84
The Animated Face	85
The Control Panel	87
The Model	87
The Presentation	91
The Complete Application	106
Exporting the application	109
Bibliography	110
Summary	110
Chapter 6: Project Development	113
Debugging	113
The Debug Configuration	113
The Debug Perspective	114
Controlling Program Execution	115
Managing Breakpoints	117
The Java Console	118
Remote Debugging	119
JUnit	120
Setting Up JUnit	120
Creating a Test Suite	122
Running a Test Suite	124

Documentation	125
Try It Out: Javadoc Options	126
Try It Out: Command-Line Options	126
Summary	128
 Chapter 7: Advanced Topics of Project Development	 129
Developing in a Team	129
Setting Up a Repository	130
Projects in the Repository	132
Version Management	133
Working in a Team	133
Other Functions	135
External Tools	135
Refresh	135
Environment	135
Associations	135
Summary	136
 Chapter 8: The SWT Library	 137
SWT Function Group Overview	138
SWT—Pros and Cons	139
Advantages of SWT	140
Disadvantages of SWT	140
The SWT Package	141
Events	141
Listeners	141
Adapters	142
Events	142
Overview of Listeners, Adapters, and Events	143
Widgets	145
The Widget Class	146
The Control Class	146
Visual Overview	146
Displays, Shells, and Monitors	146
Dialogs	152
Composites, Groups, and Canvas	155
Buttons	156
Sliders and Scales	158
ProgressBar	159
Scrollable and ScrollBar	159

Text Fields and Labels	159
Tables, Lists, and Combos	161
Trees	166
Sashes	167
Tabbed Folders	168
Toolbars	169
Moveable Tool Groups (CoolBar)	170
Menus	170
Custom Widgets	174
The Browser Widget	177
Layouts	177
Visual Overview	178
The FillLayout Class	178
The RowLayout Class	179
The GridLayout Class	180
The FormLayout Class	182
The StackLayout class	184
Graphics	185
The Graphics Context	185
Colors	186
Fonts	187
Images	189
The Cursor	190
Widgets That Swing	191
Embedded Contents	192
Events	192
Output to a Printer	196
Data Transfer	198
The Clipboard	198
Drag and Drop	199
Resource Management	200
Windows32 Support (OLE)	201
SWT on the Pocket PC	202
Accessibility	202
Summary	203
 Chapter 9: JFace	 205
Resource Management	205
The FontRegistry Class	205
The ImageRegistry Class	206
The JFaceColors Class	206
The JFaceResources Class	206

Dialogs and Windows	206
Some Dialog Subclasses	207
Implementing Your Own Dialog Classes	210
Making Dialogs Persistent	213
Viewers	214
The Viewer Event Model	215
The Viewer Hierarchy	215
Cell Editors	217
<i>Data Transfer</i>	218
Text Processing	218
Text Processing Base Classes	218
<i>The ProjectionViewer</i>	226
Comfortable Text Fields and Combos	226
Actions and Menus	226
The IAction Interface	226
The Managers	227
Wizards	228
The Wizard Class	228
The WizardPage Class	229
The WizardSelectionPage Class	230
The WizardDialog Class	230
Preferences	230
The PreferenceStore and PreferenceConverter Classes	231
The PreferencePage Class	232
Field Editors	232
Preference Page Trees	233
Summary	235
 Chapter 10: Project Two: Jukebox	 237
Design Goals and How to Achieve Them	237
Installing the Project	238
The Player Module	241
Layout	241
Threads	242
The Player.java Class	243
BasicPlayerListener	260
The Playlist Domain Model	261
The Interface	261
Implementing IPlaylist	268
Accessing Features	270
Managing Entries	271

Content Provider	273
Playlist Switch	273
Selections	274
The Description Window	275
The DescriptionWindow Class	276
The Playlist Viewer	278
The PlaylistWindow Class	278
The PlaylistViewer Class	281
Nested Grid Layout	289
Toolbar	290
File-Selection Dialogs	292
Menu	293
The PlaylistLabelProvider Class	295
Returning a Warning Icon	296
Cell Text	297
The FileCellEditor Class	299
The Description Editor	300
The DescriptionCellEditor Class	300
The DescriptionEditorDialog Class	302
Code Scanner	303
Content Assistant	304
SourceViewer Configuration	307
SourceViewer	308
Deploying the Jukebox	311
Summary	311
 Chapter 11: Developing Plug-ins for the Eclipse Platform	 313
The Architecture of the Eclipse Platform	314
Extension Points	314
OSGi	314
A Minimal Platform	315
Rich Client Platform vs. IDE	315
Resource Management	315
User Interface	316
Help System	316
Team Support	316
Other Plug-in Groups	317
Architecture Summary	317
The Core Classes of the Eclipse Platform	318
The Platform Class	318
The Plugin Class	318

The Preferences Class	319
Path Specifications	319
Monitoring Long-Running Processes	320
The Eclipse Workspace	320
Resources	320
Markers	324
Reacting to Resource Changes	325
Managing Long-Running Processes	326
Configuring Plug-Ins	327
<i>The Plug-in Development Perspective</i>	327
The Plug-in Manifest	329
The Most Important SDK Extension Points	332
The Schema Editor	341
Components of the Eclipse User Interface	344
Forms	344
The Eclipse Workbench	350
The Architecture of the Eclipse Workbench	351
Event Processing in the Eclipse Workbench	352
Editors	355
Views	362
Actions	367
Dialogs	372
Workbench Wizards	374
Preferences and Property Pages	377
Defining Perspectives	377
The Help System	379
Cheat Sheets	383
Summary	385
Chapter 12: Developing Your Own Eclipse-Based Products	387
Embedded Ant	388
Configuration	388
Editing Ant Scripts	389
Plug-Ins and Fragments	390
Features	391
Creating and Editing Features	391
Deployment	393
Deploying a Feature	393
Deploying Complete Products	394
Customizing Products	394
Populating the Workspace	396
Creating Update Sites	398

Installing from an Update Site	399
Adding an Update Site	400
Installing Features	400
Updating Features	400
Managing the Configuration	400
Install Handlers	401
Internationalizing Products	401
Text Constants in Programs	402
Text Constants in Manifest Files	403
Help Texts and Cheat Sheets	404
Deploying National Language Resource Bundles	405
Patches	405
Summary	405
 Chapter 13: Project Three: A Spell Checker as an Eclipse Plug-in	 407
The Spell Checker Core Classes	408
The Engine	408
Overview	409
Setting Up the Project	410
The Plug-in Configuration	412
The Manifest plugin.xml	413
The Schema documentTokenizer.exsd	417
Imported Files	419
The Plugin Class	419
Dictionary URL	421
Initializing Preferences	422
The Manager	423
The Check Spelling Action	424
The SpellCheckingTarget Class	425
Factory Method	426
Selections	427
Document Management	428
Text Replacement	429
Disposal	430
The CheckSpellingActionDelegate Class	431
The Correction Window	439
The SpellCorrectionView Class	439
View Actions	449
Managing Images	450
Coordinating Core Classes with GUI Classes	452
The Manager	453
Selecting the Plug-in	454

Running the Engine	457
Managing Engines	458
Creating Engines	459
Processing Bad Words	462
Operations	462
Analyzing Documents	463
Configuring the Spell Checker	463
<i>Preferences</i>	463
<i>Domain Model</i>	464
The GUI	466
Reading from the PreferenceStore	471
The Help System	473
The Help Table of Contents	473
Context-Sensitive Help	473
Active Help	474
Running the Help Action	476
A Plug-in for Java Properties	477
Setting Up the Project	477
The Manifest	478
Tokenizer Extension	478
Manifest	479
The Plugin Class	480
The Preferences	481
The Preference Page	482
The Java-Properties Tokenizer	483
The Help System	483
Internationalizing the Spell Checker	484
Text Constants in Java Code	484
Text Constants in Manifest Files	487
Creating a Language Fragment	487
Deploying the Spell Checker	490
Defining the Spell Checker Feature	490
Configuring Ant Scripts	492
Defining the Language Feature	495
Defining the Update Site	497
Installation	498
Summary	499

Chapter 14: The Rich Client Platform	501
Definition and Motivation	501
Plug-ins and the RCP	502
Creating an Application	503
The IPlatformRunnable Interface	503
The WorkbenchAdvisor Class	503
Testing a Rich Client Application	507
Deploying a Rich Client Application	507
Advanced Product Customization	508
The Global Welcome Screen	508
Summary	509
Chapter 15: Project 4: The Hex Game as a Rich Client Application	511
Overview	511
Setting Up the Project	512
The Manifest plugin.xml	512
Required Eclipse Plug-ins	514
Declaring the Application	514
Defining a Perspective	515
Defining a View	515
Product Customization	515
Linking the Welcome Screen	515
Adding Help	516
The Completed Manifest	516
The RcpApplication Class	517
The RcpWorkbenchAdvisor Class	518
The RcpPerspective Class	519
The IGame and IStatusListener Interfaces	520
The IStatusListener Interface	520
The IGame Interface	520
The HexView Class	521
The Game Engine	527
The Welcome Screen	531
Test	534
Deployment	534
Summary	535

Chapter 16: Conclusions and Outlook	537
Programming Style	537
Executable Prototypes	538
Automated Tests	538
Refinements	538
Embrace Change	540
Save Energy	541
Java 1.5	541
Summary	542
Appendix A: Useful Plug-ins for Eclipse	545
Appendix B: Migrating Projects to a New Eclipse Version	551
Projects	551
Plug-ins	552
Migration to Eclipse 3	552
Appendix C: Important Downloads	555
Project One: Duke Speaks	555
Project Two: Jukebox	555
Project Three: A Spell Checker as an Eclipse Plug-In	555
Book Web Site	556
Appendix D: Bibliography	557
Index	559
