

# **Sensing in Nature**

Edited by

**Carlos López-Larrea, PhD**

*Department of Immunology, Hospital Universitario Central de Asturias,  
Oviedo, Spain*

**Springer Science+Business Media, LLC**

**Landes Bioscience**

# CONTENTS

<b>1. THERMOSENSOR SYSTEMS IN EUBACTERIA.....</b>	<b>1</b>
Wolfgang Schumann	
Abstract.....	1
Introduction.....	1
DNA Acting as Thermosensor.....	2
RNA Acting as Thermosensor.....	5
Proteins Acting as Thermosensor.....	7
Evolution of Thermosensors.....	11
Conclusion.....	12
<b>2. MOLECULAR PLANT VOLATILE COMMUNICATION.....</b>	<b>17</b>
Jarmo K. Holopainen and James D. Blande	
Abstract.....	17
Introduction.....	17
Roles of Volatile Organic Compounds.....	18
Plant-Plant Signalling.....	20
Self and Nonself Recognition in Plants.....	25
Conclusion and Future Directions.....	27
<b>3. PRIMARY PROCESSES IN SENSORY CELLS: CURRENT ADVANCES.....</b>	<b>32</b>
Stephan Frings	
Abstract.....	32
Introduction.....	32
Mechanoreceptors—Tugging at Enigmatic Channels.....	33
Phototransduction—Dynamic Scaffolds.....	37
Taste Transduction—Gustatory Genetics.....	40
Olfactory Transduction—Coping with Fuzzy Receptors.....	43
Evaluating Electromagnetic Fields—More Primary Processes.....	47
Conclusion.....	50

**11. TRANSFORMING THE VESTIBULAR SYSTEM ONE MOLECULE  
AT A TIME: THE MOLECULAR AND DEVELOPMENTAL  
BASIS OF VERTEBRATE AUDITORY EVOLUTION .....173**

Jeremy S. Duncan and Bernd Fritsch

Abstract.....	173
Introduction.....	174
Overview of Evolution of the Ear.....	175
Auditory Sensory Epithelium is a Transformed Vestibular Sensory Epithelium.....	178
Auditory Neurons are Derived from Vestibular Neurons.....	179
Central Auditory Nucleus.....	180
Efferent Neurons to Inner Ear.....	182
Conclusion.....	183

**12. NEUROBIOLOGY OF SOCIABILITY .....187**

Heather K. Caldwell

Abstract.....	187
Introduction.....	187
Sociability in Context.....	188
Major Neurohormones Important to the Regulation of Sociability.....	188
Social Behaviors.....	190
Sociability in Humans.....	196
Conclusion and Future Directions.....	198

**13. CHANGING SENSES: CHEMOSENSORY SIGNALING  
AND PRIMATE EVOLUTION .....206**

Emily R. Liman

Abstract.....	206
Introduction.....	206
Genome Mining and Methods of Molecular Evolution.....	208
Trichromacy in Primates.....	209
Loss of Vomeronasal Function in Primate Evolution.....	210
Contraction of the Odorant Receptor Repertoire in Human Evolution.....	211
Loss of Signaling through G-CD Neurons Early in Primate Evolution.....	212
Evolutionary Changes in Taste Sensation.....	213
Conclusion.....	214

**14. MOLECULES AND MATING: POSITIVE SELECTION  
AND REPRODUCTIVE BEHAVIOR IN PRIMATES .....218**

Leslie A. Knapp and Simeon H.S. Innocent

Abstract.....	218
Introduction.....	219
Mate Choice.....	221
Competition for Mates.....	227
Conclusion.....	232

**15. IMMUNE SYSTEMS EVOLUTION .....237**

Ramón M. Rodríguez, Antonio López-Vázquez and Carlos López-Larrea

Abstract.....	237
Introduction.....	237
Origin and Evolution of Innate Defence System.....	238
Toll Receptors and Immune Response in <i>Drosophila</i> .....	240
Toll-Like Receptors in Mammals.....	242
Immune Response Mechanisms in Plants.....	243
The Complement System in Both Innate and Acquired Immunity.....	244
Self and Nonself Recognition Mechanisms in Multicellular Organisms.....	245
Adaptive Immune Systems Emerge during the First Evolutionary Stages of Vertebrates.....	246
Evolution of Lymphoid Organs.....	248
Conclusion.....	249

**16. INVOLVEMENT OF SIRTUINS IN LIFE-SPAN  
AND AGING RELATED DISEASES .....252**

Ulrich Mahlknecht and Barbara Zschoernig

Abstract.....	252
Introduction: Aging, Age-Associated Diseases and Calorie Restriction (CR).....	252
Aging and Age-Related Diseases—The Sirtuin Connection.....	253
SIRT1.....	254
SIRT2.....	256
SIRT3.....	256
SIRT4.....	257
SIRT5.....	257
SIRT6.....	258
SIRT7.....	258
Conclusion.....	258

**17. MOLECULAR DIVERSITY OF Dscam  
AND SELF-RECOGNITION .....262**

Lei Shi and Tzumin Lee

Abstract.....	262
Introduction.....	262
Identification of <i>Drosophila</i> Dscam and Molecular Diversity of Insect Dscams.....	264
Genetic Evidence for Dscam-Mediated Self Avoidance.....	265
Stochastic Expression of Distinct Dscam Isoforms in Individual Neurons.....	268
Biophysical Basis of Dscam Isoform-Specific Homophilic Interactions.....	269
Requirement of Dscam Molecular Diversity for Concurrent Morphogenesis of Fellow Neurons.....	270
Conclusion and Other Dscam Functions.....	272

**18. THE NEURAL BASIS OF SEMANTIC AND EPISODIC FORMS  
OF SELF-KNOWLEDGE: INSIGHTS FROM FUNCTIONAL  
NEUROIMAGING .....276**

Arnaud D’Argembeau and Eric Salmon

**Abstract..... 276**  
**Introduction..... 277**  
**Representing One’s Personal Characteristics: Semantic Forms  
of Self-Knowledge ..... 277**  
**Representing Oneself in Time: Episodic Forms of Self-Knowledge..... 280**  
**Self-Referential Processing and the “Default Network” ..... 282**  
**A Potential Role of the MPFC in Self-Referential Processing ..... 283**  
**Conclusion ..... 287**

**19. HALLMARKS OF CONSCIOUSNESS .....291**

Ann B. Butler

**Abstract..... 291**  
**Introduction..... 291**  
**Behavioral Hallmarks..... 294**  
**Neural Hallmarks..... 296**  
**Informational Hallmarks ..... 301**  
**Conclusion ..... 305**

**INDEX..... 311**
