

Economic Analysis of Solar Thermal Energy Systems

edited by Ronald E. West and Frank Kreith

The MIT Press
Cambridge, Massachusetts
London, England

Contents

	Series Foreword	vii
	Acknowledgments	ix
1	Introduction	1
	Ronald E. West	
2	Economic Methods	18
	Rosalie T. Ruegg and Walter Short	
3	Economic Models	84
	G. Thomas Sav	
4	Assessing Market Potential	125
	Gerald E. Bennington	
5	Analyzing the Effect of Economic Policy on Solar Markets	167
	Peter C. Spewak	
6	End-Use Matching and Applications Analysis Methodologies	205
	Kenneth C. Brown	
7	Net Energy Considerations	255
	Robert A. Herendeen	
8	Cost Requirements for Active Solar Heating and Cooling	274
	Mashuri L. Warren	
9	Cost Requirements for Passive Solar Heating and Cooling	309
	Charles R. Hauer	

10	Cost Requirements for Solar Thermal Electric and Industrial Process Heat	337
	Ronald Edelstein	
11	Historical Cost Review	372
	Charles E. Hansen and Wesley L. Tennant	
	Contributors	415
	Name Index	423
	Subject Index	427
