Contents

Contributors xi

1. Introduction: Stable Isotopes and Earth System Science 1

Lawrence B. Flanagan

Global Change and Earth System Science 1
Physiological Ecology and Global Gas Exchange 1
Historical Background and the Contents of this Book 2
Acknowledgments 4
References 4

Part I Stable Isotopes and Physiological Processes

2. Factors Affecting the Oxygen Isotope Ratio of Plant Organic Material 9

Margaret M. Barbour, Lucas A. Cernusak, Graham D. Farguhar

Factors Contributing to Variation in $\delta^{18}\text{O}_p$ 10
Modeling $\Delta^{18}\text{O}$ of Plant Material 20
Combined Measurement of Carbon and Oxygen Isotope Ratios 22
Potential Applications 23
Conclusions 25
References 25

3. Stable Isotope Composition of Soil Organic Matter 29

Gerd Gleixner

Introduction 29
Origin of Carbon in Soils 31
Chemical Structure and Stable Isotopic Ratio of Plant Carbon Forming Soil Organic Matter 32
Distribution of Carbon and Nitrogen and their Stable Isotopes in Soil Profiles 36
Dynamics of Soil Organic Matter 38
Molecular Insight into Soil Organic Matter Formation 40

Summary	43	
References	43	
4. Factors Determining the ^{13}C Abundance of Soil-Respired CO_2 in Boreal Forests		47
<i>Peter Högberg, Aif Ekblad, Anders Nordgren, Agnetu H. Plamboeck, Anders Ohlsson, Bhupinderpal-Singh, Mona N. Högberg</i>		
Introduction	47	
CO_2 Production in Soils	48	
Variability in the C Isotopes in Plants, Soil, and Soil CO_2 Efflux in Boreal Forest—A Case Study	61	
Concluding Remarks	63	
References	64	
5. Factors that Control the Isotopic Composition of N_2O from Soil Emissions		69
<i>Tibisay Pérez</i>		
Introduction	69	
Factors that Control the Rate of Production and Emission of Soil N_2O	70	
Processes Controlling the Stable Isotope Composition of N_2O	72	
Conclusions	81	
References	81	
6. Carbon and Hydrogen Isotopic Effects in Microbial Methane from Terrestrial Environments		85
<i>Jeffrey Chanton, Lia Chaser, Paul Glasser, Don Siegel</i>		
Isotopic Effects During Methane Oxidation	86	
Isotopic Effects Associated with Methane Production Mechanisms	88	
Supporting Field Data	92	
Isotope Cross Plots	98	
Summary, Speculation, and Recommendation	99	
Acknowledgments	101	
References	101	

Part II Ecosystem Scale Processes

7. Theoretical Examination of Keeling-plot Relationships for Carbon Dioxide in a Temperate Broadleaved Forest with a Biophysical Model, CANISOTOPE		109
<i>Dennis D. Baldocchi, David R. Bowling</i>		
Introduction	109	
Model Framework	110	

Results and Discussion	112	
Conclusions	121	
Acknowledgments	122	
References	123	
8. Partitioning Ecosystem Respiration Using Stable Carbon Isotope Analyses of CO₂		125
<i>Kevin Tu, Todd Dawson</i>		
Introduction	125	
Partitioning Approach	127	
Variation in Respiration Signatures Among Ecosystem Components	128	
Causes of Variation in Respiration Signatures	130	
Implications of Variation in Respiration Signatures on Soil C-Dynamics	134	
Determining Source Signatures	138	
Using Variation in Respiration Signatures to Partition Ecosystem Respiration	145	
Conclusions	146	
Acknowledgments	148	
References	148	
9. Simulation of Ecosystem C¹⁸O Isotope Fluxes in a Tallgrass Prairie: Biological and Physical Controls		154
<i>Christopher Still, William J. Riley, Brent R. Helliker, Joseph A. Berry</i>		
Introduction	154	
Background	155	
Ecosystem Model Simulations	157	
Ecosystem Isofluxes	161	
Summary and Conclusions	166	
References	168	
10. Ecosystem CO₂ Exchange and Variation in the δ¹⁸O of Atmospheric CO₂		171
<i>Lawrence B. Flanagan</i>		
Introduction	171	
Oxygen Isotope Effects during Ecosystem CO ₂ Exchange	174	
Variation in Environmental Conditions and Associated Changes in Ecosystem Isofluxes	176	
Implications for the Declining Trend in δ ¹⁸ O of Atmospheric CO ₂	178	
References	180	

11. Stable Isotope Constraints on Net Ecosystem Production Under Elevated CO₂	182
<i>Elise Pendall, Jennifer Y. King, Arvin R. Moser, Jack Morgan, Daniel Milchunas</i>	
Introduction: Approaches for Estimating Net Ecosystem Production	182
Experimental Approach	185
Constructing the Ecosystem Carbon Balance: NEP	191
Conclusions	196
Acknowledgments	196
References	196
12. Stable Isotopes as a Tool in Urban Ecology	199
<i>Diane E. Pataki, Susan E. Bush, James R. Ehleringer</i>	
Introduction	199
The Isotopic Composition of Urban CO ₂ Sources	200
Partitioning Urban CO ₂ Sources	203
The Isotopic Composition of Urban Plant Biomass	207
Conclusions	211
References	211
 Part III Global Scale Processes	
13. Terrestrial Ecosystems and Interannual Variability in the Global Atmospheric Budgets of ¹³CO₂ and ¹²CO₂	217
<i>James T. Randerson</i>	
Introduction	217
A Graphical Means to Understanding the Global Atmospheric Budget: Robin Hood Diagrams	219
Mechanisms Contributing to Interannual Variability in Atmospheric δ ¹³ C	227
Unresolved Questions	230
Conclusions	231
Acknowledgments	231
References	232
14. Remarks on the Use of ¹³C and ¹⁸O Isotopes in Atmospheric CO₂ to Quantify Biospheric Carbon Fluxes	235
<i>Philippe Ciais, Matthias Cuntz, Mark Scholze, Florent Mouillot, Philippe Peylin, Vincent Gitz</i>	
Introduction	235
Formulation of Global Budgets	236
Understanding δ ¹³ C in Atmospheric CO ₂	237
Understanding δ ¹⁸ O in Atmospheric CO ₂	248
Concluding Remarks	255
Notations	258
References	262

15. Factors Influencing the Stable Isotopic Content of Atmospheric N₂O	268
<i>Thom Rahn</i>	
Introduction	268
Isotopic Considerations	269
Isotopomers and Isotopologues	271
N ₂ O from the Terrestrial Biosphere	273
N ₂ O from the Oceans and Other Aquatic Regions	274
Other N ₂ O Sources	276
N ₂ O Loss Processes	277
The N ₂ O Global Isotopic Budget	280
References	282
16. The Carbon Isotopic Composition of Atmospheric Methane and its Constraint on the Global Methane Budget	288
<i>John B. Miller</i>	
Introduction	288
$\delta^{13}\text{CH}_4$ Observations	293
References	306
Series List	311
Index	313
