<i>Preface</i>	ix
<i>Acknowledgements</i>	xiii
<i>Nomenclature</i>	xv
<b>1 Introduction</b>	<b>1</b>
1.1 Ice in the heavens	1
1.2 Ice ages	7
1.3 The incidence of ice	12
1.4 The response to ice	20
<b>2 Thermodynamics of ice</b>	<b>24</b>
2.1 Classical laws and principles	25
2.2 The Gibbs function and phase change	28
2.3 The Gibbs function and chemical potential	34
2.4 Diffusion in ice, water and water vapour	40
2.5 Metastability and the freezing point	44
2.6 Morphology and microenergetics	49
2.7 Thermal properties	53
2.8 Nucleation	55
2.9 Interfacial conditions and growth	60
<b>3 The Stefan problem</b>	<b>63</b>
3.1 The simplified model and its variations	64
3.2 The Neumann solution	71
3.3 Physico-mathematical analysis	75
3.4 Analytic techniques	79
3.5 Numerical techniques	86
<b>4 Ice and water</b>	<b>102</b>
4.1 Freezing of solutions and suspensions	102
4.2 Formation of an ice cover	112
4.3 Growth of an ice cover	121
4.4 The effect of natural convection on planar growth	134

4.5	The effect of forced convection on planar growth	140
4.6	Freezing inside cavities and conduits	151
4.7	Freezing on submerged bodies	161
<b>5</b>	<b>Ice and air</b>	<b>167</b>
5.1	Deposition of water vapour	167
5.2	Accretion	178
5.3	Atmospheric ice	192
5.4	Icing of airborne structures	205
5.5	Icing of waterborne and offshore structures	213
5.6	Icing of land-based structures and equipment	220
<b>6</b>	<b>Ice and Earth</b>	<b>229</b>
6.1	Surface energy exchange	229
6.2	Freezing on the Earth	242
6.3	The pore system: its architecture, hydrodynamics and thermodynamics	255
6.4	Freezing in the Earth	272
<b>7</b>	<b>Ice and life</b>	<b>298</b>
7.1	Water in the biosphere	298
7.2	Freezing of biofluids	302
7.3	The cell	312
7.4	Freezing of unicellular organisms	317
7.5	Freezing in plants	329
7.6	Freezing in animals	336
7.7	Freezing of foods	344
<b>8</b>	<b>Decay of ice</b>	<b>355</b>
8.1	Reversibility and symmetry	356
8.2	Melting of single ice crystals	358
8.3	Melting of polycrystalline ice	361
8.4	Decay of an ice cover	364
8.5	Ablation of atmospheric and structural icing	370
8.6	Thawing of soil	374
8.7	Thawing of organisms	380
	<i>Notes</i>	386
	<i>Selected bibliography</i>	394
	<i>Index</i>	422
