# Contents

Preface xiii

## 1 The Left-Handed Double Helix of DNA

ALEXANDER RICH

Text 1  
References 7

## PART I DNA-PROTEIN INTERACTIONS

### 2 The Structure and Function of *EcoRI* Endonuclease

JOHN M. ROSENBERG, JUDITH A. MCCLARIN,  
CHRISTIN A. FREDERICK, BI-CHENG WANG,  
HERBERT W. BOYER, JOHN GRABLE,  
AND PATRICIA GREENE

Introduction 12  
Methods 14  
Description and Discussion of the Structure 22  
Conclusions 40  
References 41

### 3 The Klenow Fragment Structure Suggests Mechanisms for Fidelity and Processivity of DNA Polymerase I

T. A. STEITZ

Introduction 45  
Structure of the Klenow Fragment 47  
Function of the Small Domain 48  
Function of the Large Domain 49  
Co-Crystallization of Klenow Fragment with DNA 50

Relation to Other Polymerases	51
Processivity	51
Fidelity of DNA Synthesis	52
References	55

#### **4 Structural Studies of DNA-Protein Recognition**

R. G. BRENNAN, H. M. HOLDEN, Y. TAKEDA,  
AND B. W. MATTHEWS

Introduction	58
Three DNA-Binding Proteins	58
Models for DNA Binding	58
A Common Helix-Turn-Helix DNA-Binding Motif	61
Studies in Progress	63
References	64

### **PART II VIRUSES**

#### **5 Refinement of the Structure of Tobacco Mosaic Virus**

GERALD STUBBS

Introduction	69
Structure Determination	72
Structural Details	73
TMV Assembly	79
References	82

#### **6 The Structure of a Human Common Cold Virus (Rhinovirus 14) and Its Functional Relations to Other Picornaviruses**

MICHAEL G. ROSSMANN, EDWARD ARNOLD,  
JOHN W. ERICKSON,  
ELIZABETH A. FRANKENBERGER,  
JAMES P. GRIFFITH, HANS-JÜRGEN HECHT,  
JOHN E. JOHNSON, GREG KAMER, MING LUO,  
ANNE C. MOSSER, ROLAND R. RUECKERT,  
BARBARA SHERRY, AND GERRIT VRIEND

Introduction	86
Structure Determination	89
Structure	94

Immunogenic Sites on HRV14	100
Antigenic Sites in Poliovirus and FMDV	102
The Canyon as Receptor Binding Site	104
Neutralization and Serotypes	106
Assembly	107
References	108
<b>7 Adenovirus Hexon: A Novel Use of the Viral Beta-Barrel</b>	
MICHAEL M. ROBERTS AND ROGER M. BURNETT	
Text	113
References	124
<b>8 The Structure of an Antineuraminidase Monoclonal Fab Fragment and Its Interaction with the Antigen</b>	
P. M. COLMAN AND R. G. WEBSTER	
Introduction	125
Fab Structure	126
Binding Properties of S10/1 to Monoclonal Variants	129
Binding Properties of S10/1 to Neuraminidase Field Stains	130
Electron Microscopy of Fab-Neuraminidase Complexes	131
References	132
<b>9 Influenza Hemagglutinin</b>	
J. J. SKEHEL AND D. C. WILEY	
Text	135
References	138
<b>10 The Budding of Enveloped Viruses: A Paradigm for Membrane Sorting?</b>	
KAI SIMONS AND STEPHEN FULLER	
The Problem	139
The Enveloped Virus Solution	140
Virus Budding as a Paradigm for Intracellular Membrane Sorting	147
References	149

## **PART III ANTIBODY AND PROTEIN-PROTEIN INTERACTIONS**

### **11 Intramolecular Localization of Antigenic Determinants by Molecular Immunoelectron Microscopy**

J. LAMY

Introduction	153
Structure of Arthropod Hemocyanins: The Subject of This Study	154
Intramolecular Localization of Subunits with Polyclonal Antibodies	164
Intramolecular Localization of Epitopes with Monoclonal Antibodies	180
Perspectives and Conclusions	188
References	189

### **12 Studies of the Tertiary and Quaternary Structure of Antibody Constant Domains**

EDUARDO A. PADLAN, GERSON H. COHEN,  
AND DAVID R. DAVIES

Introduction	193
An Analysis of the Interface Residues between C <sub>H1</sub> and C <sub>L</sub>	194
A Model of IgE Fc	203
References	213

### **13 Three-Dimensional Structure of a Lysozyme-Fab, Antigen-Antibody Complex**

A. G. AMIT, G. BOULOT, G. BRICOGNE,  
R. A. MARIUZZA, S. E. V. PHILLIPS, AND R. J. POLJAK

Introduction	215
Materials and Methods	216
Crystallographic Studies	218
Discussion	219
References	224

## 14 The Order–Disorder Paradox in Antigen–Antibody Union: Anti-Peptide Antibodies as a Probe for Structured Regions of Small Peptides

H. JANE DYSON, MARK RANCE,  
RICHARD A. HOUGHTEN, PETER E. WRIGHT,  
AND RICHARD A. LERNER

Introduction	227
NMR Evidence for a Type II $\beta$ -Turn	228
NMR Evidence for a Helical Structure	231
Discussion and Conclusions	233
References	233

## 15 Characteristics of Protein Interfaces

WAYNE A. HENDRICKSON, JANET L. SMITH,  
AND WILLIAM E. ROYER, JR.

Introduction	235
Categories of Protein Interactions	235
Complementarity	236
Determinants of Affinity	238
Interfaces in Human Hemoglobin	239
Subunit Entropy	240
Hydration	241
Mobility	242
References	244

## 16 Contributions of Individual Amino Acids to Protein Stability Determined by X-Ray Crystallographic Analysis of Selected and Directed Mutants of T4 Phage Lysozyme

TOM ALBER, TERRY M. GRAY, LARRY H. WEAVER,  
JEFFREY BELL, JOAN A. WOZNIAK, KEITH WILSON,  
SUN DAOPIN, AND BRIAN W. MATTHEWS

Introduction	246
Structure and Dynamics of Wild-Type Lysozyme	246
Temperature-Sensitive Lysozyme Mutants	247
Site-Directed Mutagenesis	248
Conclusions	253
References	257

**PART IV LIGHT-SENSITIVE PROTEINS****17 The Rhodopsins of *Halobacterium halobium***

WALTHER STOECKENIUS

Introduction	261
Halorhodopsin	262
Sensory Rhodopsin	265
Conclusions	267
References	268

**18 Structure and Function in Photosynthetic Reaction Centers**

STEVEN G. BOXER

Introduction	271
Magnetic Field Effects in Photosynthetic Reaction Centers	273
Reaction Center Energetics	278
References	281

**19 The Structural Basis of Photosynthetic Light Reactions in Bacteria**

ROBERT HUBER

Text	283
References	286

**PART V MEMBRANE PROTEINS AND SIGNALING****20 X-Ray Analysis of Deaminoxycytocin: Conformational Flexibility and Receptor Binding**

J. E. PITTS, S. P. WOOD, I. J. TICKLE,  
 A. M. TREHARNE, Y. MASCARENHAS, J. Y. LI,  
 J. HUSAIN, S. COOPER, T. L. BLUNDELL, V. J. HRUBY,  
 H. R. WYSSBROD, A. BUKU, AND A. J. FISCHMAN

Introduction	290
Structure Determination	291
Crystal Structure Description	294
Solution Structure	298
Receptor Binding and Biological Response	301
References	304

## **21 The Acetylcholine Receptor: What the Three-Dimensional Structure Tells Us about Ion Conductance**

ROBERT MICHAEL STROUD  
AND JANET FINER-MOORE

Introduction	307
The Ionic Channel Lies between Five Quasi-Equivalent Subunits	309
Topography of Sequences Confirms Existence of an Amphipathic Membrane Crossing	310
A Model of the Ionic Channel That Can Be Tested	313
How Is the Ionic Channel Gated?	316
Location of the Binding Site for Ligands	317
References	318

## **22 Membrane Protein Folding Motifs: An Examination of Empirical Predictions of Secondary Structure**

D. L. MIELKE, M. CASCIO, AND B. A. WALLACE

Introduction	319
Materials and Methods	321
Results	322
Discussion	329
References	331

## **PART VI CONCLUSION**

### **23 Structure and Function of the LDL Receptor**

JOSEPH L. GOLDSTEIN AND MICHAEL S. BROWN

Introduction	337
Itinerary of the LDL Receptor	338
Structure of the LDL Receptor	340
Exon Organization and Protein Domains of the LDL Receptor	345
References	346

Index	349
-------	-----
