<b>Preface</b>	<b>xiii</b>
<b>Introduction: On the Foundations of Comparative Statics</b>	<b>1</b>
1. Equilibrium and Explanation	2
2. Equilibrium Implies Disequilibrium Dynamics	5
3. The Hidden Agenda of Comparative Static Methodology	9
4. An Outline of the Book	11
<b>Part I: The Economics of Sub-optimal Economies</b>	
1. The State of Equilibrium as an Optimum	15
1. Methodological Individualism and Equilibrium Methodology	18
2. General Equilibrium and Psychologism	20
3. An Equilibrium as a Necessary Optimum	23
4. A Disequilibrium State as a Sub-optimum	25
2. Optimization vs. Equilibrium	29
1. Sub-optimality as Equilibrium: Externalities vs. Market Failures	31
2. Sub-optimality as Market Failure	33
3. Disequilibrium as Optimality	34
4. Disequilibrium as Information Optimality	36
5. Methodological Costs/Benefits of Invisible Equilibrium Prices	39
<b>Part II: Foundations of Equilibrium Methodology</b>	
3. Individualism and Differential Calculus	43
1. Long-run General Equilibrium and Individualism	44
2. Varieties of Individualism in Economic Theory	48
3. The Long-run Equilibrium as a Special Short-run Equilibrium	50
4. Methods of Explaining Disequilibrium States	57
1. Critiques of Partial Equilibrium Explanations	59
2. Disequilibrium vs. Individualism	62
5. Proofs vs. Conjectures in Analytical Economics	69
1. The Problem of the Integral vs. the Differential	70
2. Equivalence of Set Theory and Calculus Analysis	73
3. Continuity vs. Connectedness in Choice Theory	75
4. Continuity, Convexity, Uniqueness and Choice Theory	78
5. Infinity and Induction in Analytical Economics	83
6. Proofs and Conjectures	89

### **Part III: Limits of Equilibrium Methodology**

<b>6. Equilibria and Teleological Statics</b>	<b>93</b>
1. Exogenous Variables and Teleological Comparative Statics	95
2. Hayek's Contingent Equilibria	97
3. Calculus of Variations, Dynamic Programming, Control Theory, etc.	99
4. Mechanical Solutions vs. Learning	100
<b>7. Equilibria vs. Equilibrium Processes</b>	<b>103</b>
1. Equilibrium and Theories of Knowledge	104
2. Equilibrium and Theories of Ignorance	107
3. Responding to Disequilibrium Awareness	110
4. Learning vs. Knowing the Equilibrium Price	116
<b>8. Against Macroeconomics as Defeatist Microeconomics</b>	<b>118</b>
1. Macroeconomics and Rational Expectations	119
2. Stochasticism and Macroeconomics	123
3. Stochasticism as Instrumentalism	127

### **Part IV: Avenues for a New Microeconomics of Non-Equilibria**

<b>9. <i>Ad Hoc</i> Theorizing about Price Dynamics: A Slippery Slope</b>	<b>133</b>
1. The Analytical Problem of Price Adjustment	134
2. <i>Ad Hoc</i> Closure of the Analytical Equilibrium Model	135
3. Toward Closure through <i>Ad Hoc</i> Ignorance	138
4. Exogenous Convergence with Forced Learning	139
5. Endogenous Convergence with Autonomous Learning	141
<b>10. <i>Ad Hoc</i> Theorizing about Non-clearing Markets: A Rocky Road</b>	<b>144</b>
1. Exogenously Unintentional Disequilibria	145
2. Deliberate Disequilibria: Keynes-Hicks Generalized Liquidity	147
3. Methodological Individualism vs. Deliberate Disequilibria	154
<b>11. Learning Methodology and the Equilibrium Process: A Murky Mews</b>	<b>156</b>
1. Learning and Individualism	158
2. Learning without Psychologism or Inductivism	161
3. Active Learning and Equilibrium Stability	163
4. Macrofoundations of Microeconomics	166
5. Expectations and Conjectural Knowledge	167
6. Towards a Generalized Methodological Individualism	168
