Contents

<i>Foreword</i> by Robert H. Pry	xi
<i>Preface</i> by Wilhelm Krelle	xiii
<i>Methodological Note</i> by Peter Hackl	xvii
PART I. Analysis and Forecast of Economic Growth and Structural Change on the Basis of a World Model: Results of the Central Research Group	
1. Growth, Decay and Structural Change	3
<i>Wilhelm Krelle</i>	
1.1. Introduction: The background of the Bonn-IIASA Research Project	3
1.2. Explaining long-term development with the latent variable "degree of activity"	13
1.3. Some other long-term projections	15
1.4. The Bonn-IIASA Research Project	20
1.5. The main driving forces of economic growth	21
1.6. Some empirical results: Development of the rate of technical progress, of the savings ratio, and of the time discount rate	24
1.7. The identification of the latent variable "degree of activity"	30
1.8. A simplified theory for the long-term cycle of degree of activity	31
1.9. Growth and structural change	33
1.10. Conclusion	34
2. Main Results of the Bonn-IIASA Research Project	39
<i>Wilhelm Krelle</i>	
2.1. Introduction: The model	39
2.2. The driving forces of economic development	41
2.3. Assumptions about the future development of the driving forces	42
2.4. Assumptions to make the productive performance of OECD and CMEA countries comparable	47
2.5. Graphical representation of the main assumptions	48
2.6. The main results of the project	48
2.7. Which growth path will be realized?	69
2.8. Final remarks	71
2A. Forecast of employed labor force (in working hours)	74
2B. Forecast of money supply	76
2C. Forecast of the rate of depreciation of capital (%), OECD countries, 1985-2000	77
2D. Forecast of the ratio (%) of secondary factor imports to total imports, 1985-2000	78

2E.	Observations and forecasts of the rate of technical progress (%) for different scenarios	79
2F.	Forecast of the investment ratio, medium scenario (%)	81
3.	Economic Growth and Structural Change of OECD Countries <i>Hermann Ross</i>	83
3.1.	Introduction: The group of industrialized market economies	83
3.2.	The production function and technical progress	84
3.3.	The development of the driving forces of economic growth	86
3.4.	Solution of isolated country models: Future growth rates	93
3.5.	The rate of inflation	94
3.6.	The nominal rate of interest	95
3.7.	The structure of production	97
3.8.	Conclusion	97
3A.	Model parameters (tabulated)	99
3B.	Model parameters (graphed)	107
4.	Economic Growth and Structural Change of CMEA Countries <i>Rumen Dobrinsky</i>	119
4.1.	Introduction	119
4.2.	Economic growth and structural change in the CMEA countries, 1960 to 1985	120
4.3.	<i>Ex ante</i> scenarios and simulations	133
5.	The Macroeconomic Models of the European CMEA Countries <i>Rumen Dobrinsky</i>	143
5.1.	Introduction	143
5.2.	The production technology	144
5.3.	The structure of production	149
5.4.	Consumption and the price index for consumer goods	151
5.5.	The complete models and their dynamic characteristics	161
5.6.	Concluding remarks	163
5A.	A theoretical macromodel of production and primary distribution in a socialist economy	165
6.	Economic Growth and Structural Change in Developing Countries <i>István Székely</i>	173
6.1.	Introduction	173
6.2.	Models for groups of developing countries in the Bonn-IIASA world model	174
6.3.	Growth prospects of the developing countries: Results of a medium-term scenario analysis	181
6.4.	Concluding remarks	190
6A.	Sources, abbreviations, and model parameters	191
7.	Growth in an Interdependent World Economy: Linking the National Models through International Trade <i>Rumen Dobrinsky and István Székely</i>	199
7.1.	Introduction	199
7.2.	The integrated system of international trade	200
7.3.	Simulation experiments with a linked model of the world economy	210
7A.	Export and import functions	226

8. Modeling Exchange Rates and Foreign Trade of Developed Market Economies	233
<i>Heinz Welsch</i>	
8.1. Introduction	233
8.2. General structure of the model	234
8.3. Specification and estimation of the behavioral equations	235
8.4. Performance of the model	249
8A. Notation	257
9. Structural Change in Foreign Trade of the CMEA Countries	259
<i>Jan B. Gajda</i>	
9.1. Introduction	259
9.2. The initial specification	264
9.3. Model equations	266
9.4. Final remarks	274
PART II: Analysis and Forecast of Structural Change on the Basis of Individual Country Models: Results of Collaborating Research Groups in Different Countries	
10. US Economic Growth in Retrospect and Prospect	279
<i>Bert G. Hickman</i>	
10.1. An empirical growth model	279
10.2. Factor demands	280
10.3. Determination of potential output	282
10.4. Estimation	285
10.5. Productivity and growth: potential and realized	286
10.6. Productivity and the growth slowdown, 1956-1982	288
10.7. A forecast of US growth, 1985-2000	292
10.8. Driving forces of economic growth	296
11. Sectoral Output, Employment and Real Wages: Long-Run Trends for the US Economy	301
<i>Peter Pauly</i>	
11.1. Introduction	301
11.2. Causality tests	302
11.3. A model of sectoral demand for labor	303
11.4. Sectoral employment projections	305
11.5. Summary	307
12. Long-Range Modeling of the USSR Economy	311
<i>S.V. Dubovsky and O.A. Eismont</i>	
12.1. Introduction	311
12.2. Technical progress and economic growth	313
12.3. Natural resources depletion and economic growth	316
12.4. A macromodel of economic growth	317
12.5. Computational experiments	322
13. Driving Forces of Economic Structural Change: The Case of Japan in the Last Decade	325
<i>Chikashi Moriguchi</i>	
13.1. Introduction	325
13.2. Relative price changes as a source of structural change	326

13.3.	Competition as the driving force behind structural change	329
13.4.	Technical progress and structural change	331
13.5.	Concluding remarks	334
14.	A Long-Term Simulation of the French Economy <i>Jean-Louis Brillet</i>	335
14.1.	Introduction	335
14.2.	The Mini-DMS model	336
14.3.	The assumptions	337
14.4.	The simulation	340
14.5.	Conclusion	351
15.	Implications of a Modernization Strategy for the United Kingdom <i>Michael Landesmann and Andrew Snell</i>	553
15.1.	Introduction	353
15.2.	Details of a modernization strategy	355
15.3.	Results for the modernization strategies	359
15.4.	The market-oriented approach	364
15.5.	Where will jobs come from? An industrial analysis	366
15.6.	Changes in energy prices and world activity	369
15.7.	Conclusions	370
15A.	Productivity growth under Thatcher and prospects under the different scenarios	373
15B.	Is there evidence of an improvement in UK export performance?	379
16.	Prospective Structural Changes in the West German Economy <i>Jürgen B. Donges, Henning Klodt, and Klaus-Dieter Schmidt</i>	385
16.1.	Introduction	385
16.2.	Structural change in retrospect	386
16.3.	Prospects for structural change	391
17.	Growth of the West German Economy: Forecast by the Bonn Model 11 <i>Wilhelm Krelle and Hermann Sarrazin</i>	399
17.1.	The Bonn Model 11	399
17.2.	Solution of the Bonn Model 11	402
17.3.	Conclusions	404
18.	Strategic Planning and Economic Growth in Bulgaria <i>O. Panov and J. Djarova</i>	407
18.1.	Introduction	407
18.2.	Strategic decisions – an integrating factor in economic growth	408
18.3.	Characteristics of economic growth in Bulgaria	410
18.4.	Economic growth and labor resources	412
18.5.	Economic growth and fixed assets	413
18.6.	Forecasting the economic growth of Bulgaria	414
19.	The Growth of the Polish Economy and Prospects for Structural Change <i>Adam B. Czyżewski and Władysław Welfe</i>	419
19.1.	Introduction	419
19.2.	Economic background of the Polish crisis	421
19.3.	The integrated model W-5	426
19.4.	External debt and the submodel of foreign debt	434
19.5.	Growth and structural changes of the Polish economy to the year 2000	437

20. Structural Change in the Czechoslovak Economy to the Year 2000	445
<i>Karl Zeman</i>	
20.1. Introduction	445
20.2. Changes in the proportionality of the reproduction process under transition to intensive economic growth	446
20.3. A model for testing development trends in the structure of the Czechoslovak economy	448
20.4. <i>Ex ante</i> simulation	451
21. Economic Development of the CSSR: Analysis and Conditional Forecasts	461
<i>Ivan Suján</i>	
21.1. Introduction	461
21.2. The econometric macromodel	463
21.3. Economic growth in the CSSR, 1970–1985	463
21.4. Conditional forecasts of economic growth in the CSSR, 1986–2000	467
21.5. Conclusion	473
21A. Estimation of the contributions of individual factors to the growth rates of macroeconomic indicators	475
22. Analysis and Forecasts of Growth of the Hungarian Economy	477
<i>Andras Simon</i>	
22.1. The driving forces of structural change	477
22.2. Selected features of the economy	481
22.3. Expected economic development until 2000	483
23. Structural Adjustment, Productivity and Capital Accumulation in Austria	487
<i>Stefan Schleicher</i>	
23.1. Analytical tools and data base	487
23.2. Aggregate economic growth and productivity	488
23.3. Structural adjustments at the sectoral level	489
23.4. The labor productivity slowdown at the sectoral level	490
23.5. Econometric evidence for the total factor productivity slowdown	493
23.6. Prospects and conclusions	494
PART III: Analysis and Forecast of World Trade, the Debt Situation, and North–South Economic Relations	
24. Structural Change in World Trade: Analyses and Forecasts of the FIND Model	499
<i>Georg Erber</i>	
24.1. Introduction	499
24.2. Methodological aspects of long-range forecasting with econometric models	500
24.3. Forecasts of structural shifts in North–South trade by commodity groups	501
24.4. Summary	512
25. Foreign Debt and the Structure of World Trade	515
<i>Peter Pauly</i>	
25.1. Introduction	515
25.2. The accumulation of debt since 1974	516
25.3. The structure of aggregate world trade	518
25.4. Measures of structural change	521
25.5. Empirical results	523
25.6. Conclusion	525

26. The Debt Situation of the Developing Countries:	
A Medium-Term Scenario Analysis	527
<i>Jürgen Richtering</i>	
26.1. Introduction	527
26.2. The analytical framework	528
26.3. Debt simulations	530
26.4. Conclusions	536
26A. SIGMA country groupings	538
 PART IV: Some General and Methodological Problems Related to	
Economic Growth and Structural Change	
 27. Structural Change and the Long Wave	543
<i>S. Menshikov and L. Klimenko</i>	
27.1. Periodicity in structural change	543
27.2. Statistical evidence of fluctuations	544
27.3. Disaggregation of capital investment by structural components	550
 28. The Emergence of Service Economics	561
<i>G. d'Alcantara</i>	
28.1. Structural change through service	561
28.2. Economic regulatory mechanisms seen as services	563
28.3. A starting point for a systems theory of services	566
28.4. Conclusion	568
 29. Economic Structural Changes: The Problems of Forecasting	571
<i>Iouri Tchijov</i>	
29.1. Introduction	571
29.2. GNP structure	572
29.3. Production structure	574
29.4. From the technological level to the national economy	576
 30. Comparison of Gross Domestic Product and Net Material Product	581
<i>Jaroslav Češka (appendix by Rumen Dobrinsky)</i>	
30.1. Introduction	581
30.2. Structure and main characteristics of SNA	582
30.3. Structure and main characteristics of MPS	584
30.4. Relationship between the SNA and the MPS	
main production aggregates	586
30.5. Calculations of gross domestic product and	
national income for selected countries	592
30.6. Other projects in the field of gross domestic product	
and national income comparison	593
30.7. Further development of the SNA-MPS comparisons	595
30A. GDP estimates for the CMEA countries in the Bonn-IIASA Project	597
 ANNEXES:	
1. Coding for Countries and Country Groups	601
2. Outline of the Bonn-IIASA World Model	605
3. Basic Data from Other Sources	627
4. Main Results of the Bonn-IIASA Research Project	631
 THE AUTHORS	679
