Summary and Main Conclusions	1
Rudolf Teekens	
PART A - Methodological Aspects	
1. Operationalising Concepts and Measurements of Poverty and Basic Needs	
Lidia Barreiros	
1.1. Introduction	27
1.2. Conditions of deprivation	28
1.2.1 Absolute poverty and basic needs non-satisfaction	28
1.2.2 Relative poverty and inequity	32
1.3. Feelings of deprivation	34
1.4. Concepts of poverty and basic needs in Latin America	35
1.5. Dimensions of poverty	37
1.5.1 Identification of poverty	38
1.5.2 The aggregation problem	46
Notes	50

2. Distribution of Income and Consumption: Their Relation to Needs and to Living Standards	
Rudolf Teekens	
2.1 Introduction	52
2.2 From personal to household income	53
2.3 Consumption behaviour and aggregate demand functions	62
Notes	71
Appendix 2.A	
The lognormal distribution and some inequality measures	71
3. Structure of Production, Labour Market Functioning and Basic Needs: A Review of Some Main Issues	
Rob Vos	
3.1 Social articulation and growth	78
3.2 Agrarian structures and rural development	80
3.2.1 Production, technology and inequality in agriculture	80
3.2.2 Elements for an alternative policy approach in rural development	83
3.3 Industrialisation and basic needs	85
3.3.1 Alternative industrialisation strategies	85
3.3.2 Basic needs industrialisation: issues and trade-offs	90
3.4 Labour market, employment and poverty	93
3.4.1 Unemployment and underemployment	93
3.4.2 Labour market functioning	95
3.4.3 Labour supply determinants	96
3.4.4 Factors determining labour demand	98
3.4.5 Employment policies and the structure of production	99
Notes	100
4. Capital Accumulation and Basic Needs: The Macroeconomic Framework	
Rob Vos	
4.1 Introduction	103
4.2 Macroeconomics of basic needs: towards an analytical framework	104
4.2.1 A 'warranted' growth rate	104
4.2.2 A two-sector model	106

4.3	Macro-adjustment, internal terms of trade and food subsidies	108
4.4	Investments and savings	110
4.5	Foreign exchange constraints	114
4.6	Employment and productivity	116
4.7	Migration and urban informal services	117
4.8	Accumulation and basic needs planning in Latin America: some concluding remarks	120
	Notes	121
5.	The Role of the State and Participatory Planning Rob Vos	
5.1	Alternative policy approaches	123
5.2	A basic needs policy framework	125
5.3	Policy approaches and the concept of the State	128
5.4	The context of public choice in Latin America	132
5.5	Public expenditure patterns and access to basic services	136
	5.5.1 Income growth and public expenditures	138
	5.5.2 Distribution of the budget	139
	5.5.3 Access to public services	140
	5.5.4 External effects and complementarities	141
	5.5.5 A new research paradigm	141
5.6	Political access and participatory planning	142
5.7	Basic needs policies: constraints and options	144
	Notes	145
6.	Towards Social Accounting Lidia Barreiros	
6.1	The relationship between development concepts and data systems	147
6.2	The development of data systems	150
	6.2.1 Introduction	150
	6.2.2 The emerging of national accounts	150
	6.2.3 The development of sectoral input-output statistics	154
	6.2.4 The development of social accounts	158

6.3	Special features of the Social Accounting Matrix	159
6.3.1	Introduction	159
6.3.2	The accounts	159
6.3.3	Disaggregation and classification issues	165
6.3.4	Available data, consistency and updating	168
6.4	Analytical features of the Social Accounting Matrix	169
6.4.1	Introduction	169
6.4.2	The open Leontief model	170
6.4.3	The generalised Leontief model	173
6.4.4	Decomposition of the accounting multiplier	178
6.5	Other social accounting systems	179
6.5.1	The Food Accounting Matrix (FAM)	179
6.5.2	The socio-demographic matrix and modelling	179
6.6	Conclusions and recommendations	181
	Notes	184

7. An Outline of a Basic Needs Policy Simulation Model Arend Kouwenaar

7.1	Introduction	185
7.1.1	Objectives of the model	185
7.1.2	Global characteristics	187
7.1.3	A SAM-based model with endogenous prices	189
7.1.4	Simplified mathematical structure	190
7.2	The structure of the model: an overview	192
7.2.1	Production	193
7.2.2	Employment and value added	198
7.2.3	Income distribution	200
7.2.4	Consumption	206
7.2.5	Flow of funds and investment	211
7.2.6	Exports and excess demand	215
7.2.7	Updating population and labour supply	218
7.2.8	Updating capital stocks and ownership	221
7.2.9	Basic needs indicators	223
7.3	Solution and use of the model	225
	Notes	228

PART B - A Case Study of Ecuador

8. Structural Change and Macro Balances in a Small Open Economy Rob Vos

8.1	Introduction	233
-----	--------------	-----

8.2	The historical growth pattern of the Ecuadorian economy	234
8.3	Structural changes in production and employment	235
8.3.1	Production and employment	235
8.3.2	Growth and crisis in agriculture	237
8.3.3	Growth of non-agricultural sectors	241
8.3.4	Technological heterogeneity	243
8.4	Wages, profits and peasant incomes	245
8.5	Capital accumulation, domestic demand and savings behaviour	247
8.6	External dependence and the foreign exchange constraint	250
8.7	Money, finance and inflation	254
8.8	Structural change, redistribution and growth	258
	Notes	259
9.	Ecuador's Development Profile and Basic Needs Performance	
	Lidia Barreiros	
9.1	The situation in Latin America	261
9.1.1	Some income comparisons	261
9.1.2	Basic needs satisfaction in Ecuador in the Latin American context	266
9.2	Ecuador's basic needs performance in time	267
9.2.1	Introduction	267
9.2.2	Health of the body and of the mind	267
9.2.3	Shelter	271
9.2.4	Nutrition	273
9.3	The geographical distribution of levels of living	276
9.3.1	Introduction	276
9.3.2	Indicators at the provincial level	277
9.3.3	Interrelationships between the level of living components	281
9.4	In-depth poverty analysis for urban and rural Ecuador	284
9.4.1	Social distribution of living standards	284
9.4.2	Some poor health indicators	285
9.4.3	Formal education	288
9.4.4	The housing situation	291
9.4.5	Analysis of calorie intake	293
9.4.6	Towards target groups	295
9.5	Concluding remarks	299
	Notes	300

10. Rural Development, Industrialisation and Employment	
Rob Vos	
10.1 Introduction	301
10.2 Rural development	301
10.2.1 Rural poverty and agrarian growth: main bottlenecks	301
10.2.2 Food supplies and nutrition	302
10.2.3 Natural resources in agriculture: land use and ecology	303
10.2.4 Land reform and colonisation	307
10.2.5 Marketing, agricultural prices and credits	308
10.2.6 Technology, productivity and employment	310
10.2.7 Food security and rural development perspectives	313
10.3 Industrialisation, employment and basic needs	315
10.3.1 Industry and basic needs	315
10.3.2 Industrial structure and employment	315
10.3.3 Industrial dynamics and net use of foreign exchange	318
10.3.4 Production and employment linkages; domestic market size and consumer efficiency	322
10.3.5 Industrial policy experiences	331
10.3.6 Perspectives of an alternative industrialisation strategy	333
10.4 Labour market functioning, employment and basic needs in Ecuador	335
10.4.1 Demographic and migratory tendencies	336
10.4.2 Labour supply	337
10.4.3 Employment, unemployment and underutilisation of labour	338
10.4.4 Wages, income growth and employment	341
10.4.5 Employment and basic needs: some policy considerations	344
Notes	346
11. Poverty and Household Consumption Patterns	
Lidia Barreiros	
11.1 Dimensions of poverty	351
11.2 Establishing poverty thresholds	352
11.2.1 Introduction	352
11.2.2 The Engel law and nutritional adequacy	353
11.2.3 The 'Wolf Point' method	358
11.2.4 Aspiration levels and multiple poverty thresholds	359

11.2.5	Economies of scale in household consumption	361
11.3	The incidence, intensity and inequality of deprivation	363
11.4	A poverty profile of socioeconomic groups	365
11.5	A model of poverty incidence	371
11.6	Concluding remarks	374
	Notes	375
12.	Distribution of Living Standards in Ecuador Lidia Barreiros	
12.1	Introduction	376
12.2	Distribution patterns	379
12.2.1	Distribution of household size, expenditure and land	379
12.2.2	The Lorenz curve	385
12.3	Inequality measures	387
12.3.1	Positive equality measures	387
12.3.2	Normative measures of inequality	387
12.4	The main determinant factors of inequality	397
12.5	Conclusions	402
	Notes	403
	Appendix 12.A	
	Estimation of the theoretical Lorenz curve	405
	Appendix 12.B	
	Some theoretical aspects of the decomposition of the Theil index	406
13.	Government Policies, Inequality and Basic Needs in Ecuador Rob Vos	
13.1	Introduction	410
13.2	The political economy of policy-making and planning in Ecuador	411
13.2.1	The changing role of the State and social class hegemony	411
13.2.2	Development planning in Ecuador	413
13.2.3	Development strategy design and the legitimation crisis of the State	416

13.3	Structure and distribution of the government budget	416
13.3.1	The size of the public sector	417
13.3.2	Government revenues and the tax incidence	418
13.3.3	Growth and structure of government expenditures	422
13.3.4	The public expenditure incidence	424
13.4	Access to basic services: rural infrastructure, education, health and housing	430
13.4.1	Rural infrastructure	430
13.4.2	Education	432
13.4.3	Health	435
13.4.4	Housing	437
13.5	Some concluding remarks	439
	Notes	440
14.	A Social Accounting Matrix for Ecuador Lidia Barreiros	
14.1	Introduction	443
14.2	The basic framework	445
14.2.1	Data sources	445
14.2.2	Building up the basic Social Accounting Matrix, 1975	448
14.2.3	An overview of problems of disaggregation and classification	454
14.3	The comprehensive framework	459
14.3.1	Introduction	459
14.3.2	The Supply Subsystem	460
14.3.3	Income generation and its distribution subsystem	463
14.3.4	Final Consumption Subsystem	470
14.3.5	The Flow of Funds Subsystem	472
14.4	An analytical framework	474
14.4.1	The structure of the Ecuadorian economy in 1975	474
14.4.2	The accounting multiplier analysis	478
14.5	Conclusions and recommendations	485
	Notes	486
Appendix 14.A		
14.A.1	Classifications of the SAM-75 for Ecuador	488
14.A.2	SAM classification for accounting multiplier analysis	493

15. Analysis of Policy Simulations
Arend Kouwenaar

15.1	Introduction	495
15.2	Setting up experiments: an illustrative exercise	497
15.2.1	The simulator's path	497
15.2.2	An illustrative exercise	499
15.3	A selection of short term policies	505
15.3.1	A government programme for housing	505
15.3.2	Tax policies	513
15.3.3	Wage, income and employment policies	527
15.3.4	Land reform	532
15.4	Conclusions	537
	Notes	541
	Statistical Appendix	545
	Bibliography	705
