<b>1. Introduction: Meeting the Challenge</b>	<b>1</b>
<i>Kim Geheb and Marie-Therese Sarch</i>	1
The case studies	4
Lake Malawi	4
Lakes Chilwa, Chiuta, Malombe and the Upper Shire River	4
Lake Kariba	5
Lake Tanganyika	5
Lake Victoria	6
Lake Chad	7
River Gambia	7
<b>2. Fisheries Co-Management in Malawi: Implementation Arrangements for Lakes Malombe, Chilwa and Chiuta</b>	<b>9</b>
<i>Friday J. Njaya</i>	9
The concept of 'co-management'	12
The participatory fisheries management programme for Lake Malombe and the Upper Shire River	13
The PFMP set up	15
Formation of the Beach Village Committees (BVCs)	17
Performance assessment of the Lake Malombe and Upper Shire River PFMP	18
The Lake Chilwa participatory fisheries management programme	18
The Lake Chilwa PFMP set-up	20
The impact of community participation in the Lake Chilwa Recovery Programme	23
The Lake Chiuta participatory fisheries management scheme	24
Development of the Beach Village Committees	25

<b>3. Lessons from Malawi's Experience with Fisheries</b>	
<b>Co-Management Initiatives</b>	<b>31</b>
<i>Mafaniso Hara, Steven Donda and Friday J. Njaya</i>	<b>31</b>
Reasons for seeking an alternative regime	32
The role of the Fisheries Department	35
Struggles for power and authority	35
Organisational structure, participation of vested interests and incentives for participation	40
Negative effects of short term external (donor) funding	41
Ineffective and ambiguous revised legislation	42
The effects of prevailing socio-economic conditions	43
Some thoughts on theory and practice	45
Conclusion	48
<b>4. Conflicting Agendas in the Development and Management of Fisheries on Lake Malawi</b>	<b>49</b>
<i>Edward H. Allison, Peter M. Mvula and Frank Ellis</i>	<b>49</b>
Lake Malawi fisheries: political and economic context	50
Fishing for the policy agenda: a history of management and development interventions in Malawi's fisheries	53
Traditions and tea planters: Colonial policy and its legacy	53
Development policies 1964-1994	56
'Modernising' the fisheries	57
Fishing in deep water	60
State conservation policy and fisheries	61
The Life-President's fish	62
Political liberalisation and changing policy discourse	64
Current policy – evading hard choices in fisheries development	67
Synthesis	69
<b>5. Contesting Inequalities in Access Rights to Lake Kariba's Kapenta Fisheries: An Analysis of the Politics of Natural Resource Management</b>	<b>74</b>
<i>Kefasi Nyikahadzoi</i>	<b>74</b>
The Kapenta Fishery's Management	
Licensing	76
Area closures	77
The allocation of fishing basins	77

<i>Kapenta</i> fishing methods	79
The colonial legacy in Zimbabwe	79
Zimbabwean policies on natural resource distribution	80
Scientific socialism and co-operative development	82
Licence redistribution during the first ten years	84
The willing seller, willing buyer principle	85
The sliding scale	86
Indigenisation	87
Conclusion	87
<b>6. The Outcome of a Co-Managerial Arrangement in an Inland Fishery: The Case of Lake Kariba (Zambia)</b>	<b>89</b>
<i>Isaac Malasha</i>	<b>89</b>
Lake Kariba	90
The artisanal fishermen	91
<i>Kapenta</i> operators	92
Management of the fishery	93
The introduction of co-management to the Lake Kariba fishery	93
The role of the <i>Kapenta</i> Fishermen's Association	96
Access to, and control of, the islands	97
Access to, and control of, fiscal revenue	97
Control of immigrant fishermen	98
Control of arable land	99
Access to, and control of, assistance from Non-Governmental Organisations	101
The effect of the co-management plans on the local people	101
Access to, and control of, co-management plans	102
Final outcomes	103
Conclusion	106
<b>7. A Future Fraught: Precautionary, Participatory and Regional Outlooks for the Fisheries of Lake Tanganyika</b>	<b>107</b>
<i>John-Eric Reynolds, Hannu Mölsä, and Ossi V. Lindqvist</i>	
Tanganyika: the setting and the stakes	108
Lake Tanganyika Research Project	110
Lake Tanganyika Biodiversity Project	111
Basic fisheries characteristics	112
Fisheries sub-sectors	113
Production and trade	114

Local stakeholders and communities	115
Major management challenges	117
Hydrobiological issues: changes in stocks and yields	118
Human welfare issues	120
Institutional and legal issues	121
Management initiatives for fisheries futures	123
'Whole ecosystem' approaches to management and the Code of Conduct for Responsible Fisheries	123
The Tanganyika Regional Framework Fisheries Management Plan (FFMP)	125
FFMP Implementation: Tanganyika Regional Fisheries Programme (TREFIP)	127
Exercising options for fishery futures	131
The initiative option: intended yields, inherent risks	131
The default option: doing nothing	137
A future fraught	139
<b>8. On Pitfalls and Building Blocks: Towards the Management of Lake Victoria's Fisheries</b>	<b>142</b>
<i>Kim Geheb, Kevin Crean, Modesta Medard, Mercy Kyangwa, Carolyne Lwenya, and Paul Onyango</i>	<b>142</b>
Lake Victoria	143
Background to the regulation of Lake Victoria's fisheries	145
The pitfalls	146
Regulatory ambiguity	146
The dichotomy between the levels of the state and community	148
Endorsement by the state of local-level institutions	149
Competition between the need to survive and the need to conserve the resource	152
An overemphasis on managing the biological basis of the resource	153
Underestimation of community capabilities with respect to their role in the management process	155
The capacity to deliver an effective regulatory service	156
Unrestricted access to a common fisheries resource	158
The building blocks for management	158
The role of Beach Committees in developing and implementing the management process	162
The role of District Committees in developing and implementing the management process	167

The Regional Committee	168
Constraints to implementation	170
<b>9. Lake Victoria Fishers' Attitudes Towards Management and Co-Management</b>	<b>174</b>
<i>Douglas C. Wilson</i>	174
Methods	175
The Lake Victoria fishery	176
Causes of changes in catch size	177
Perceptions of the government role in management	180
Attitudes toward specific rules	182
Attitudes towards co-management	188
Conclusion: implications for attitudes for community based co-management	192
<b>10. Conflicts amongst Resource Users: The Case of Kabangaja Fishing and Farming Community on Lake Victoria (Tanzania)</b>	<b>195</b>
<i>Modesta Medard, Kim Geheb and Joash B. Okeyo-Owuor</i>	195
Research methods and sample selection	196
Community members' origins	197
Major economic activities at Kabangaja	198
Strengths and weaknesses of the BMU at Kabangaja	199
Kabangaja perspectives on management and its implementation	201
Additional sources of conflict at Kabangaja community	206
The implications of conflict for the management of the lake's fisheries	207
Concluding thoughts	209
<b>11. Institutional Evolution at Lake Chad: Lessons for Fisheries Management</b>	<b>211</b>
<i>Matthias Krings and Marie-Therese Sarch</i>	211
Background	212
Access to fishing in Kukawa Local Government Area	216
Conflicts in Kukawa	217
Multiple claims	218
Powerful individuals	218
Resulting institutions	219

Successful institutions?	220
Access to dumba fishing rights in Marte LGA	220
Conflict in Marte LGA	221
Multiple claims	222
Powerful individuals	222
Resulting institutions	222
The success of the institutions	223
Synthesis and conclusion	226
<b>12. Management and Development of the Gambia River Fisheries: A Case for the Co-Management of Inland Fisheries Resources</b>	<b>228</b>
<i>Momodou Njie and Heimo Mikkola</i>	228
Community fisheries centres and co-management in The Gambia	229
A co-management case study from the Central River Division of The Gambia	231
Fisheries management in the CRD	232
The decline of konokono stocks	233
The CRDFA fisheries co-management strategy	234
Problems and challenges	236
Conclusions: perspectives	238
<b>13. A Challenge-Met? Some Final Thoughts</b>	<b>240</b>
<i>Kim Geheb and Marie-Therese Sarch</i>	240
A synthesis of themes	240
Fisheries decline	240
Trans-boundary problems	240
The problem of size	241
The access problem	241
National and international policies	243
Local-level political struggles	243
Government-community collaboration	244
The role of negotiation	246
The legalisation of local-level input	247
The role of pre-existing institutions	247
Answering questions	247

<b>What are the reasons for the failures of state based management systems to achieve optimal yields from their inland fisheries?</b>	<b>248</b>
<b>Can Africa's customary and community-based management systems conserve fish stocks and sustain fishing livelihoods?</b>	<b>248</b>
<b>What does 'co-management' mean for Africa's inland fisheries?</b>	<b>249</b>
<b>Should fisheries managers manage fish or humans?</b>	<b>249</b>
