

BRINCH HANSEN ON PASCAL COMPILERS

PER BRINCH HANSEN

PRENTICE-HALL, INC., Englewood Cliffs, New Jersey 07632

CONTENTS

ALGORITHMS	vii
PREFACE	ix
1 WHAT A COMPILER DOES	1
2 A PASCAL SUBSET	6
2.1 Pascal Minus	6
2.2 Vocabulary	10
2.3 Syntactic Rules	12
2.4 Grammar	15
3 COMPILER ORGANIZATION	17
3.1 A Personal Computer	17
3.2 Single-Pass Compilation	18
3.3 Multipass Compilation	19
3.4 The Pascal Minus Compiler	22
3.5 Errors and Failures	24

4	LEXICAL ANALYSIS	28
4.1	Source Text	28
4.2	Intermediate Code	29
4.3	Scanning	31
4.4	Searching	36
4.5	Symbol Table	45
4.6	Testing	51
5	SYNTAX ANALYSIS	59
5.1	Symbol Input	59
5.2	Parser Construction	61
5.3	First Symbols	67
5.4	Follow Symbols	70
5.5	Grammar Restrictions	73
5.6	Recursion	78
5.7	Testing	81
5.8	Error Recovery	83
6	SCOPE ANALYSIS	95
6.1	Blocks	95
6.2	Scope Rules	97
6.3	Compilation Method	100
6.4	Data Structures	102
6.5	Algorithms	103
6.6	Testing	108
7	TYPE ANALYSIS	110
7.1	Kinds of Objects	110
7.2	Standard Types	112
7.3	Constants	113
7.4	Variables	116
7.5	Arrays	122
7.6	Records	125
7.7	Expressions	130
7.8	Statements	133
7.9	Procedures	134
7.10	Object Records	140
7.11	Testing	141
8	A PASCAL COMPUTER	144
8.1	An Ideal Computer	144
8.2	The Stack	146
8.3	Variable Access	151

8.4	Expression Evaluation	160
8.5	Statement Execution	169
8.6	Procedure Activation	173
8.7	Program Execution	177
8.8	Code Syntax	178
8.9	Testing	179
8.10	A Traditional Computer	179
9	CODE GENERATION	183
9.1	Operation Parts	183
9.2	Variable Addressing	184
9.3	Expression Code	189
9.4	Statement Code	193
9.5	Procedure Code	200
9.6	Code Optimization	204
9.7	Testing	210
10	PERFORMANCE	211
10.1	Compiler Size	211
10.2	Compilation Speed	214
Appendix A	A COMPLETE COMPILER	217
A.1	Administration	218
A.2	Scanner	221
A.3	Parser	228
A.4	Assembler	255
A.5	Interpreter	260
A.6	Test Programs	271
Appendix B	A COMPILER PROJECT	281
B.1	The PL Language	282
B.2	Project Phases	288
B.3	The PL Interpreter	290
