Contents

Part I	Surface Science Techniques	
<hr/>		
Scanning Tunneling Microscopy on Clean and Adsorbate-Covered Semiconductor and Metal Surfaces By H. Neddermeyer (With 10 Figures)		3
Photoelectron Holography: A Status Report By J.D. Riley and R. Leckey (With 12 Figures)		19
Studies of Surface Composition and Structure Using Low-Energy Ion Scattering and SIMS By R.J. MacDonald, D.J. O'Connor, and B.V. King (With 11 Figures)		35
Heavy-Ion Rutherford Backscattering Spectrometry By D.J. O'Connor and Q. Yang (With 4 Figures)		49
Auger Photoelectron Coincidence Spectroscopy of Transition Metals By S.M. Thurgate (With 6 Figures)		56
Second-Harmonic Generation Applied to the Formation of Ultrathin Organic Films on Inorganic Substrates By M. Grunze and M. Buck (With 5 Figures)		67
<hr/>		
Part II	Metal Surfaces	
<hr/>		
Restructuring at Surfaces By K. Kern (With 8 Figures)		81
The Role of Kinetic Effects in the Growth of Pt on Pt(111) By B. Poelsema, A.F. Becker, R. Kunkel, G. Rosenfeld, L.K. Verheij, and G. Comsa (With 4 Figures)		95
Vibrational Spectroscopy of Alloy Surfaces and Adsorbate-Covered Metal Surfaces By M. Wuttig (With 7 Figures)		105
Surface Barrier States and Resonances of Metals By M.N. Read and A.S. Christopoulos (With 6 Figures)		116

Part III Semiconductor Surfaces

Cleavage Processes and Steps in Semiconductors By D. Haneman (With 7 Figures)	131
The Alkali Metal Induced Oxidation of Si(100) Surfaces By G. Pirug, O. Müller, and H.P. Bonzel (With 9 Figures)	145
Similarities Between Crystalline Silicon Surfaces and Amorphous Silicon Films By H. Wagner (With 3 Figures)	155
The Clean and Hydrogen-Terminated (100) and (111) Surfaces of Diamond and Silicon By P.V. Smith and X.M. Zheng (With 15 Figures)	161

Part IV Thin Films

Formation of Zinc Oxide Thin Films by the Thermal Decomposition of Zinc Acetate By G.L. Mar, P.Y. Timbrell, and R.N. Lamb (With 5 Figures)	177
Surface Analysis of Pigments and Stressed Polymer Films Using X-Ray Photoelectron Spectroscopy By J. Liesegang, J. Pura, and C. Panagopoulos (With 4 Figures)	193

Part V Catalysts

Model Catalysts: The Local Properties of Specific Surface Sites By K. Wandelt (With 14 Figures)	209
Adsorption and Reaction of Small Molecules on Oxide Surfaces By H. Kuhlenbeck and H.-J. Freund (With 14 Figures)	227
Surface Science in Three Dimensions: Zeolites as Model Catalysts By R.F. Howe (With 5 Figures)	242
On the Role of Aromaticity in Bonding Hydrocarbons to Metal Surfaces By N.R. Avery (With 1 Figure)	256
Investigation of Catalyst Systems by Means of Low-Energy Ion Scattering By E. Taglauer and H. Knözinger (With 8 Figures)	264
Surface Analysis of Catalysts by Electron Spectroscopy and Ion Scattering Spectroscopy By B.G. Baker and M. Jasieniak (With 9 Figures)	279
Supported Copper Catalysts: Surface Studies and Catalytic Performance By N.W. Cant, B. Sexton, D.L. Trimm, and M.S. Wainwright (With 8 Figures)	290
Index of Contributors	301
