Table of Contents

Global Analysis of *Agrobacterium*–Plant Interactions 1
Eugene Nester, Derek Wood, and Pu Liu
Functional Genomic Analysis of *Pseudomonas syringae*–Plant Interactions 11
Alan Collmer, Philip A. Bronstein, Lisa M. Schechter, and Rena Shimizu
Bacterial Genes Involved in Interactions with Plants 20
Shinji Tsuyumu, Hiroyuki Matsumoto, Takashi Fujikawa, Hiromichi Ishihara, and Tomonori Shiraishi
Molecular Basis of Virulence in *Ustilago maydis* 30
Scott E. Gold, María D. Garcia-Pedrajas, David L. Andrews, Steven J. Klosterman, María E. Mayorga, John D. Egan, Alfredo D. Martinez-Espinoza, David Smith, and Michael H. Perlin
Conditionally Dispensable Chromosomes Controlling Pathogenicity of *Alternaria alternata* 50
Takashi Tsuge, Rieko Hatta, Kaoru Ito, Takayoshi Tanaka, Sheila R. Ruswandi, Keiji Kitani, Yoshiaki Harimoto, Shinya Takaoka, Akira Masunaka, Hajime Akamatsu, Kazuya Akimitsu, Motoichiro Kodama, Mikihiro Yamamoto, and Hiroshi Otani
Genetic Analysis of Fungal Pathogenesis: Penetration and Establishment 61
Yasuyuki Kubo, Satoshi Fujii, Naoki Fujihara, Seiji Tsuge, and Gentô Tsuji
Bacterial Virulence Factors: Strategies for Disrupting Plant Defense 73
Carol L. Bender
Bacterial Flagellins as Elicitors of the Defense Response 83
Yuki Ichinose, Fumiko Taguchi, Kasumi Takeuchi, Mizuri Marutani, Yasuhiro Ishiga, Yoshishige Inagaki, Kazuhiro Toyoda, and Tomonori Shiraishi

Molecular Genetic Analysis of AvrRpt2 Activity in Promoting Virulence of *Pseudomonas syringae* 92
Barbara N. Kunkel, Jennifer Agnew, James J. Collins, Jerry Cohen, and Zhongying Chen
Recognition of the Bacterial Effector Protein AvrPto in Soybean—A Case of HR-Independent Resistance 103
Li Wang, A. Assibi Mahama, Lalitree L. Darnielle, Alan L. Eggenberger, John Hill, and Adam J. Bogdanove
Defense Signaling and the Plant Cell Wall—A New Signaling Pathway Dependent upon Inorganic Phosphate 114
T. Shiraishi, K. Toyoda, A. Kiba, T. Kawahara, H. Takahashi, Y. Inagaki, and Y. Ichinose
Use of Expression Profiling in Studies of Gene-for-Gene Resistance 126
Fumiaki Katagiri
Evolution of Disease Resistance Genes 137
Shavannor Smith and Scot Hulbert
The Extracellular Matrix of Conidia of Powdery Mildew Fungi: Its Functions and Involvement in Information Exchange with Host Cells 150
Hitoshi Kunoh, Timothy L. W. Carver, Barry J. Thomas, Keiko Fujita, Akane Meguro, and Alison J. Wright
Dissection of Durable Resistance in Rice 164
Jan E. Leach, Bin Liu, Patricia Manosalva, Changjian Wu, Jianli Wu, Alicia Bordeos, Jianfa Bai, SeWeon Lee, Marietta Ryba-White, Myron Bruce, Scot Hulbert, Christopher Hopkins, Casiana Vera Cruz, and Hei Leung
Analysis of Rice–Blast Interactions Focused on Chitinolytic Enzymes and Chitin Elicitors 174
Yoko Nishizawa, Eiichi Minami, Chiharu Akimoto-Tomiyama, Ritsuko Mizobuchi, Akemi Tagiri, Yoshikane Ito, and Takeshi Watanabe
Signal Transduction Pathways Governing Resistance to *Cucumber mosaic virus* 185
Hideki Takahashi, Ken-Taro Sekine, Takeaki Ishihara, Shu Hase, Masato Ikegami, and Jyoti Shah
The Superoxide-Generating NADPH Oxidase in Plants: Its Molecular Basis and Role in Induction of Local and Systemic Induced Resistance Against Pathogens 195
N. Doke, H. Yoshioka, K. Sugie, N. Numata, K. Nakajima, H.-J. Park, N. Sunazaki, M. Yamashita, K. Kawakita, and S. Katou
Programmed Cell Death in the Disease Response 207
T. J. Wolpert, J. M. Lorang, M. J. Curtis, W. C. Coffeen, N. Carkaci-Salli, and T. A. Sweat

Telomerase Functions in Plant Pathogenesis 219
Katsunori Tamura, Keiko Oguchi, and Hideo Takahashi
Apoptotic Response During Pathogen Attack in Oats 230
Shigeyuki Mayama, Nan Yao, Ko Kusaka, Yasuomi Tada, Qian Yang, Teppei Shigemi, Satoshi Imai, Hitoshi Nakayashiki, Yukio Tosa, and Pyoyun Park
Use of Expression Profiling to Explore Disease Resistance Signaling in Plants 238
Jane Glazebrook
Signal Transduction in TMV-Infected and Wounded Tobacco Plants 249
Y. Ohashi, S. Seo, I. Mitsuhara, H. Yamakawa, and R. Takabatake
Role of a Mitochondrial Gene in Controlling Specificity in Plant Disease 258
Kazuya Akimitsu, Kouhei Ohtani, Akira Masunaka, Yumiko Yamasaki, Hiroshi Katoh, and Hiroyuki Yamamoto
The Effects of Deoxynivalenol on Barley Leaf Tissues 270
W. R. Bushnell, T. M. Seeland, P. Perkins-Veazie, D. E. Krueger, J. Collins, and V. M. Russo
Abstracts 285
Synopsis 295
Seiji Ouchi and Dallice Mills
