

**Income Distribution,
Inflation, and Growth**

Lectures on Structuralist
Macroeconomic Theory

Lance Taylor

The MIT Press
Cambridge, Massachusetts
London, England

Contents

List of Tables	ix
List of Figures	xi
Foreword by Lal Jayawardena	xv
Acknowledgments	xvii
1 Methodology, Money, and Growth	1
1.1 Structuralist Methodology	2
1.2 Stylized Macroeconomic Relationships and Facts	5
1.3 The Mainstream Alternative	10
1.4 Theories of Economic Growth	13
1.5 Money and Credit	24
1.6 Chapter Outlines	30
2 Short-Run Model Closures and Steady State Growth	40
2.1 Macro Causality in the One-Sector Economy	40
2.2 Additional Adjustment Mechanisms	49
2.3 Graphical Representations and Growth	52
Appendix 2.A The Ramsey Optimal Saving Model	60
Appendix 2.B The Overlapping Generations Growth Model	65
3 Real Wages and Output	68
3.1 Income Distribution and Output	68
3.2 Macro Adjustment via Real Balance Changes and Forced Saving	73
3.3. Real Balances, Input Substitution, and Money Wage Cuts	77
3.4 Political Economy	82
Appendix 3.A "Disequilibrium" Macroeconomics	83

- 4 Real Wages and Inflation 86**
 - 4.1 Structuralist Inflation Theories 86
 - 4.2 The Inflation Tax and Forced Saving 93
 - 4.3 Inflation Control When Output Can Adjust 99
 - 4.4 Political Economy 105
 - Appendix 4.A Inflation-Dependent Velocity 106
 - Appendix 4.B Interest Rate Effects on Inflation 108

- 5 The Interest Rate, Inflation, and Financial Instability 111**
 - 5.1 Asset Markets 112
 - 5.2 The Commodity Market and Inflation 113
 - 5.3 Comparative Statics in the Short Run 115
 - 5.4 Comparisons across Steady States 118
 - 5.5 Financial Instability 121
 - 5.6 Political Economy 124

- 6 Regressive Redistribution, Speculation, and Financial Collapse 125**
 - 6.1 The Financial Side of the Economy 127
 - 6.2 The Real Side 130
 - 6.3 Comparative Statics 131
 - 6.4 A Confidence Boom 132
 - 6.5 A Debt-Led Boom 137
 - Appendix 6.A Asset Accumulation from Wage Income 142

- 7 Devaluation, Output, and Capital Flows 143**
 - 7.1 Devaluation in the Short Run 144
 - 7.2 Implications of Contractionary Devaluation 146
 - 7.3 Capital Market Complications 152
 - 7.4 Political Economy 157

- 8 Gap Disequilibria: Inflation, Investment, Saving, and Foreign Exchange 159**
 - 8.1 Saving and Foreign Exchange Gaps as Flows of Funds 160
 - 8.2 Investment Crowding-out and Crowding-in 166
 - 8.3 Interactions between the Gaps by Pairs 167
 - 8.4 A Three-Gap Resolution 172
 - 8.5 The Inflation Gap 174
 - 8.6 Growth Projections 176

8.7	An Internal Debt Trap	178
8.8	An External Debt Trap	181
9	Varying Terms of Trade, Distribution, and Growth	183
9.1	Agriculture and Industry	186
9.2	Agriculture First	190
9.3	Traded and Nontraded Goods	197
9.4	Quota Rents as Assets	201
9.5	Trade Relationships between the North and South	202
9.6	Endogenous Capital Flows	207
	Appendix 9.A Gap Disequilibria and the Real Exchange Rate	212
10	Decreasing Costs, Productivity Increases, Demand Composition, Commercial Policy, and Growth	217
10.1	Decreasing Costs	218
10.2	Productivity Growth	225
10.3	Demand Composition	228
10.4	Commercial Policy	234
11	Class Conflict and Growth	240
11.1	Pasinetti's Model under Neoclassical and More Congenial Closure Rules	241
11.2	A Luxury Commodity and a New Class	246
11.3	Distribution and Accumulation Dynamics in an Industrialized Economy	250
	Notes	253
	References	269
	Index	283
