Contents

Chapter 1	
Introduction	1
S.E. Jørgensen	
1.1 The Role of Ecosystem Health Assessment in Environmental Management	1
1.2 The Conceptual Flow in This Volume	4
References	4
Chapter 2	
Application of Indicators for the Assessment of Ecosystem Health	5
S.E. Jørgensen, F.-L. Xu, F. Salas, and J.C. Marques	
2.1 Criteria for the Selection of Ecological Indicators for EHA	6
2.2 Classification of Ecosystem Health Indicators	7
2.2.1 Level 1	7
2.2.2 Level 2	8
2.2.3 Level 3	8
2.2.4 Level 4	8
2.2.5 Level 5	9
2.2.6 Level 6	9
2.2.7 Level 7	10
2.2.8 Level 8	10
2.3 Indices Based on Indicator Species	10
2.3.1 Bellan's Pollution Index	11
2.3.2 Pollution Index Based on Amphipods	12
2.3.3 AMBI	12
2.3.4 Bentix	13
2.3.5 Macrofauna Monitoring Index	13
2.3.6 Benthic Response Index	14
2.3.7 Conservation Index	14
2.4 Indices Based on Ecological Strategies	16
2.4.1 Nematodes/Copepods Index	19
2.4.2 Polychaetes/Amphipods Index	19
2.4.3 Infaunal Index	19
2.4.4 Feldman Index	20
2.5 Indices Based on the Diversity Value	21
2.5.1 Shannon–Wiener Index	21

2.5.2	Pielou Evenness Index.....	22
2.5.3	Margalef Index.....	23
2.5.4	Berger–Parker Index.....	23
2.5.5	Simpson Index.....	23
2.5.6	Deviation from the Log-Normal Distribution.....	23
2.5.7	K-Dominance Curves.....	24
2.5.8	Average Taxonomic Diversity.....	24
2.5.9	Average Taxonomic Distinctness.....	24
2.6	Indicators Based on Species Biomass and Abundance.....	25
2.6.1	ABC Method.....	25
2.7	Indicators Integrating All Environment Information.....	26
2.7.1	Trophic Index.....	27
2.7.2	Coefficient of Pollution.....	27
2.7.3	Benthic Index of Environmental Condition.....	28
2.7.4	B-IBI.....	28
2.7.5	Biotic Integrity (IBI) for Fishes.....	28
2.7.6	Fish Health Index (FHI).....	29
2.7.7	Estuarine Ecological Index (EBI).....	29
2.7.8	Estuarine Fish Importance Rating (FIR).....	30
2.8	Presentation and Definition of Level 7 and 8 Indicators — Holistic Indicators.....	30
2.9	An Overview of Applicable Ecological Indicators for EHA.....	46
2.10	EHA: Procedures.....	47
2.10.1	Direct Measurement Method (DMM).....	47
2.10.2	Ecological Model Method (EMM).....	47
2.10.3	Ecosystem Health Index Method (EHIM).....	47
2.11	An Integrated, Consistent Ecosystem Theory That Can Be Applied as the Theoretical Basis for EHA.....	49
	References.....	55
	Appendix A.....	65

Chapter 3

	Application of Ecological Indicators to Assess Environmental Quality in Coastal Zones and Transitional Waters: Two Case Studies.....	67
	J.C. Marques, F. Salas, J.M. Patrício, and M.A. Pardal	
3.1	Introduction.....	68
3.2	Brief Review on the Application of Ecological Indicators in Ecosystems of Coastal and Transitional Waters.....	69
3.2.1	Indicators Based on Species Presence vs. Absence.....	70
3.2.2	Biodiversity as Reflected in Diversity Measures.....	76
3.2.3	Indicators Based on Ecological Strategies.....	77
3.2.4	Indicators Based on Species Biomass and Abundance.....	77
3.2.5	Indicators Accounting for the Whole Environmental Information.....	77

3.2.6	Thermodynamically Oriented and Network Analysis-Based Indicators	78
3.3	How to Choose the Most Adequate Indicator?	78
3.4	Case Studies: Subtidal Benthic Communities in the Mondego Estuary (Atlantic Coast of Portugal) and Mar Menor (Mediterranean Coast of Spain)	78
3.4.1	Study Areas and Type of Data Utilized	78
3.4.2	Selected Ecological Indicators.....	83
3.4.3	Summary of Results.....	83
3.4.3.1	Mondego Estuary	83
3.4.3.2	Mar Menor	91
3.5	Was the Use of the Selected Indicators Satisfactory in the Two Case Studies?	94
3.5.1	Application of Indicators Based on the Presence vs. Absence of Species: AMBI	94
3.5.2	Indices Based on Ecologic Strategies: Polychaetes/Amphipods Ratio	95
3.5.3	Biodiversity as Reflected in Diversity Measures: Margalef and Shannon–Wiener Indices	95
3.5.4	Indicators Based on Species Biomass and Abundance: <i>W</i> statistic	96
3.5.5	Thermodynamically Oriented and Network Analysis-Based Indicators: Exergy Index, Specific Exergy and Ascendancy.....	96
3.5.5.1	Exergy and Specific Exergy	96
3.5.5.2	Ascendancy	97
3.5.6	Brief Conclusions	97
	References	99

Chapter 4

	Development and Application of Ecosystem Health Indicators in the North American Great Lakes Basin	105
	H. Shear, P. Bertram, C. Forst, and P. Horvatin	
4.1	Introduction	106
4.1.1	Background on the Great Lakes Basin.....	106
4.1.2	Indicator Selection	107
4.1.3	Definition of the Selected Indicators	109
4.2	General Considerations.....	110
4.2.1	Ecological Description of the Great Lakes Basin.....	110
4.2.1.1	Toxic Contaminants	110
4.2.1.2	Land Use	110
4.2.1.3	Invasive Species	111
4.2.1.4	Habitat Status Including Wetlands	111
4.2.1.5	Lake Ecology	111
4.2.1.6	Nutrients	112

4.2.2	Data Collection Methods.....	112
4.3	Results.....	113
4.3.1	State Indicators — Complete.....	113
4.3.1.1	<i>Hexagenia</i>	113
4.3.1.2	Wetland Dependent Bird Diversity and Abundance.....	114
4.3.1.3	Area, Quality and Protection of Alvar Communities.....	114
4.3.2	State Indicators — Incomplete	115
4.3.2.1	Native Freshwater Mussels.....	115
4.3.3	Pressure Indicators — Complete.....	116
4.3.3.1	Phosphorus Concentrations and Loadings.....	116
4.3.3.2	Contaminants in Colonial Nesting Waterbirds	118
4.3.3.3	Contaminants in Edible Fish Tissue.....	118
4.3.4	Pressure Indicators — Incomplete	119
4.3.4.1	Mass Transportation	119
4.3.4.2	<i>Escherichia Coli</i> and Fecal Coliform Levels in Nearshore Recreational Waters.....	120
4.3.5	Response Indicators — Incomplete	121
4.3.5.1	Citizen/Community Place-Based Stewardship Activities	121
4.4	Discussion	122
4.4.1	Land Use.....	122
4.4.2	Habitat Degradation	123
4.4.3	Climate Change.....	123
4.4.4	Toxic Contamination	123
4.4.5	Indicator Development	124
4.5	Conclusions	124
	References	125

Chapter 5

Application of Ecological and Thermodynamic Indicators for the Assessment of Lake Ecosystem Health.....	127
--	-----

F.-L. Xu

5.1	Introduction	128
5.1.1	Ecosystem Type and Problem.....	128
5.1.2	The Chapter's Focus	129
5.2	Methodologies.....	129
5.2.1	A Theoretical Frame.....	129
5.2.2	Development of Indicators.....	130
5.2.2.1	The Procedure for Developing Indicators	130
5.2.2.2	Lake Data for Developing Indicators	130
5.2.2.3	Responses of Lake Ecosystems to Chemical Stresses.....	131

5.2.2.4	Indicators for Lake Ecosystem Health Assessment	134
5.2.3	Calculations for Some Indicators.....	135
5.2.3.1	Calculations of Exergy and Structural Exergy	135
5.2.3.2	Calculation of Buffer Capacity.....	135
5.2.3.3	Calculation of Biodiversity	135
5.2.3.4	Calculations of Other Indicators	135
5.2.4	Methods for Lake Ecosystem Health Assessment	136
5.3	Case Studies	136
5.3.1	Case 1: Ecosystem Health Assessment for Italian Lakes Using EHIM	136
5.3.1.1	Selecting Assessment Indicators	136
5.3.1.2	Calculating Sub-EHIs	136
5.3.1.2.1	EHI(BA) Calculation.....	136
5.3.1.2.2	EHI(BZ), EHI(BZ/BA), EHI(Ex) and EHI(Exst) Calculations.....	137
5.3.1.3	Determining Weighting Factors (ω_i).....	140
5.3.1.4	Assessing Ecosystem Health Status for Italian Lakes	141
5.3.1.4.1	EHI and Standards for Italian Lakes...	141
5.3.1.4.2	Ecosystem Health Status	142
5.3.2	Case 2: Ecosystem Health Assessment for Lake Chao Using DMM and EMM	143
5.3.2.1	Assessment Using Direct Measurement Method (DMM).....	143
5.3.2.2	Assessment Using Ecological Model Method (EMM).....	144
5.3.2.2.1	The Analysis of Lake Ecosystem Structure	144
5.3.2.2.2	The Establishment of a Lake Ecological Model.....	144
5.3.2.2.3	The Calibration of the Ecological Model.....	146
5.3.2.2.4	The Calculation of Ecosystem Health Indicators	146
5.3.2.2.5	The Assessment of Lake Ecosystem Health	151
5.4	Discussions.....	152
5.4.1	About Assessment Results	152
5.4.1.1	Assessment Results for Lake Chao	152
5.4.1.2	Assessment Results for Italian Lakes	153
5.4.2	About Assessment Indicators.....	153
5.4.3	About Assessment Methods.....	154
5.5	Conclusions.....	156
References	157

Chapter 6	
Ecosystem Health Assessment and Bioeconomic Analysis in Coastal Lagoons.....	163
J.M. Zaldivar, M. Austoni, M. Plus, G.A. De Leo, G. Giordani, and P. Viaroli	
6.1 Introduction	164
6.2 Study Area: Sacca Di Goro	165
6.3 Simulation Models.....	168
6.3.1 Biogeochemical Model	168
6.3.2 Discrete Stage-Based Model of <i>Tapes Philippinarum</i>	170
6.3.3 Ulva's Harvesting Model	171
6.3.4 Cost/Benefit Model.....	171
6.3.5 Exergy Calculation.....	172
6.4 Results and Discussion	172
6.4.1 The Existing Situation.....	172
6.4.2 Harvesting <i>Ulva</i> Biomass	174
6.4.3 Reduction in Nutrient Inputs	178
6.5 Conclusions.....	180
Acknowledgments	182
References	182

Chapter 7	
Application of Ecological and Thermodynamic Indicators for the Assessment of the Ecosystem Health of Coastal Areas.....	185
S.E. Jørgensen	
7.1 Introduction	186
7.2 Results.....	186
7.3 Discussion	188
7.4 Conclusions.....	191
References	192

Chapter 8	
Application of Ecological Indicators for Assessing Health of Marine Ecosystems.....	193
V. Christensen and P. Cury	
8.1 Introduction	193
8.2 Indicators.....	195
8.2.1 Environmental and Habitat Indicators.....	195
8.2.2 Species-Based Indicators	197
8.2.3 Size-Based Indicators	197
8.2.4 Trophodynamic Indicators.....	198
8.3 Network Analysis	199

8.4	Primary Production Required to Sustain Fisheries	199
8.5	Fishing Down the Food Web	200
8.6	Fishing in Balance	200
8.7	Application of Indicators.....	202
8.7.1	Environmental and Habitat Indicators.....	202
8.7.2	Size-Based Indicators	203
8.7.3	Trophodynamic Indicators.....	204
8.8	Conclusion	207
	References	208

Chapter 9

Using Ecological Indicators in a Whole-Ecosystem Wetland Experiment	213
W.J. Mitsch, N. Wang, L. Zhang, R. Deal, X. Wu, and A. Zuwerink	

9.1	Introduction	214
9.2	Methods	215
9.2.1	Site History	215
9.2.2	Macrophyte Community Index.....	216
9.2.3	Field Indicators.....	217
9.2.4	Similarity Index.....	217
9.3	Results.....	218
9.3.1	Macrophyte Community Diversity	218
9.3.2	Macrophyte Productivity	221
9.3.3	Algal Development.....	221
9.3.4	Macroinvertebrate Diversity	223
9.3.5	Water Chemistry	223
9.3.6	Nutrient Retention	225
9.3.7	Avian Use.....	225
9.3.8	Basin Similarity	226
9.4	Discussion	227
9.4.1	Community Diversity and Ecosystem Function	227
9.4.2	Productivity as the Independent Variable.....	231
9.4.3	Diversity at Different Levels.....	231
9.4.4	Aquatic Consumers.....	231
9.4.5	Replication and Experimental Scale	233
	Acknowledgments	235
	References	235

Chapter 10

The Joint Use of Exergy and Emergy as Indicators of Ecosystems Performances	239
S. Bastianoni, N. Marchettini, F.M. Pulselli, and M. Rosini	

10.1	Introduction	239
10.2	Exergy and Ecology	240
10.3	Emergy and Ecology.....	241

10.4 The Ratio of Exergy to Energy Flow	242
10.5 The Ratio of ΔEX to ΔEM	245
References	247

Chapter 11

Application of Thermodynamic Indices to Agro-Ecosystems	249
---	-----

Y.M. Svirezhev

11.1 Introduction	250
11.2 Simplified Energy and Entropy Balances in an Ecosystem	253
11.3 Entropy Overproduction as a Criterion of the Degradation of Natural Ecosystems under Anthropogenic Pressure	256
11.4 What is a “Reference Ecosystem”?	258
11.5 Agro-Ecosystem: The Limits of Agriculture Intensification and its Entropy Cost	260
11.6 Concept of Sustainable Agriculture: the Thermodynamic Criterion	262
11.7 Soil Degradation: Thermodynamic Model	263
11.8 “Entropy Fee” for Intensive Agriculture	265
11.9 Hungarian Maize Agriculture	266
11.10 Agriculture in Northern Germany (Steinborn and Svirezhev, 2000)	268
11.11 Agriculture in Sachsen-Anhalt (Eastern Germany) and the Dynamics of Entropy Overproduction (Lindenschmidt et al., 2001)	272
References	273

Chapter 12

Ecosystem Indicators for the Integrated Management of Landscape Health and Integrity	277
---	-----

F. Müller

12.1 Introduction	278
12.2 Basic Principles for the Indicator Derivation	280
12.2.1 Ecosystem Theory — The Conceptual Background	280
12.2.2 Ecosystem Analysis — The Empirical Background	285
12.2.3 Ecosystem Health and Ecological Integrity — The Normative Background	286
12.3 The Selected Indicator Set	287
12.4 Case Studies and Applications	290
12.4.1 Indicating Health and Integrity on the Ecosystem Scale	290
12.4.2 Indicating Landscape Health	293
12.4.3 Application in Sustainable Landscape Management	296
12.5 Discussion and Conclusions	298
References	299

Chapter 13	
Multi-Scale Resilience Estimates for Health Assessment of Real Habitats in a Landscape	305
G. Zurlini, N. Zaccarelli, and I. Petrosillo	
13.1 Introduction	306
13.2 Rationale.....	308
13.2.1 Ecological Phases, States, and Scale Domains.....	308
13.2.2 Resilience and Resistance.....	309
13.3 Study Area and Methods.....	310
13.3.1 The Baganza Stream Watershed	310
13.3.2 Corine Habitats	311
13.3.3 Empirical Patterns of Self-Similarity.....	313
13.3.4 Change Intensity Detection	317
13.3.5 Retrospective Resilience	318
13.4 Results.....	319
13.4.1 Best Regression Models and Scale Breaks	319
13.4.2 Change Intensity Detection	321
13.4.3 Resilience of Habitat Scale Domains	322
13.5 General Discussion and Conclusion	324
13.5.1 Grassland Phase States.....	324
13.5.2 Scale Domains and Processes.....	325
13.5.3 Adaptive Cycle and Resilience	326
Acknowledgments	328
References	328

Chapter 14	
Emergy, Transformity, and Ecosystem Health.....	333
M.T. Brown and S. Ulgiati	
14.1 Introduction	333
14.2 A Systems View of Ecosystem Health	334
14.3 Emergy, Transformity, and Hierarchy.....	336
14.3.1 Emergy and Transformity: Concepts and Definitions	336
14.3.2 Hierarchy.....	339
14.3.3 Transformities and Hierarchy	341
14.3.4 Transformity and Efficiency.....	342
14.4 Emergy, Transformity and Biodiversity.....	343
14.5 Emergy and Information	344
14.6 Measuring Changes in Ecosystem Health.....	345
14.7 Restoring Ecosystem Health.....	347
14.8 Summary and Conclusions	349
References	350

Chapter 15

Mass Accounting and Mass-Based Indicators 353 **S. Bargigli, M. Raugi, and S. Ulgiati**

15.1	Introduction	354
15.1.1	Targets of Material Flow Accounting.....	355
15.2	MAIA: General Introduction to the Methodology	355
15.2.1	Historical Background	355
15.2.2	The MAIA Method.....	356
15.2.2.1	Used versus Unused	356
15.2.2.2	Direct versus Indirect	356
15.2.3	Calculation Rules	358
15.2.4	MAIA Database	359
15.2.5	Selected Case Studies: Fuel Cells and Hydrogen	359
15.3	Nationwide MFA: General Introduction to the Methodology	362
15.3.1	Historical Background of Bulk MFA	362
15.3.2	The Bulk MFA Model	362
15.3.3	The System Boundaries and System Stock	363
15.3.3.1	Boundary between the Economy and the Natural Environment	363
15.3.3.2	Frontier to Other Economies (the Residence vs. Territory Principle)	365
15.3.4	Classification of Flows	365
15.3.5	Categories of Materials	366
15.3.6	The Final Scheme and Material Balance	368
15.3.6.1	Memorandum Items for Balancing	369
15.3.7	Indicators.....	369
15.3.7.1	The Physical Trade Balance	370
15.3.8	Data Sources	371
15.3.9	State of the Art at a National Level	372
15.3.10	Limits and Needed Improvements of MFA.....	372
	References.....	374

Chapter 16

The Health of Ecosystems: the Ythan Estuary Case Study..... 379 **D. Raffaelli, P. White, A. Renwick, J. Smart, and C. Perrings**

16.1	Introduction	379
16.1.1	The Physical Context.....	380
16.1.2	Long-Term Data Sets.....	380
16.2	Changes in Agriculture	381
16.3	Changes in Water Quality.....	381
16.4	Changes in Biology	383
16.5	Measures of Ecosystem Health.....	387
16.5.1	Water Quality Index (WQI).....	387
16.5.2	Macroinvertebrate Indices of Water Quality	388

16.5.3 Estuary Quality Indicators	388
16.5.4 Ecosystem Indicators	388
16.6 A Coupled Human–Ecological System?	390
16.7 Policy, Debate, and the Burden of Scientific Proof.....	390
References	392

Chapter 17

Assessing Marine Ecosystem Health — Concepts and Indicators, with Reference to the Bay of Fundy and Gulf of Maine, Northwest Atlantic.....	395
--	-----

P.G. Wells

17.1 Introduction	395
17.2 Concepts of Marine Ecosystem Health	397
17.2.1 Conceptual Framework	397
17.2.2 Health	398
17.2.3 Ecosystem Health	399
17.2.3.1 Identify Symptoms	401
17.2.3.2 Identify and Measure Vital Signs	401
17.2.3.3 Provisional Diagnosis	402
17.2.3.4 Tests to Verify Diagnosis	402
17.2.3.5 Make a Prognosis for the Bay	402
17.2.3.6 Treatment	403
17.2.4 Marine Ecosystem Health	406
17.2.5 Ecological or Ecosystem Integrity	408
17.2.6 Ecological Change	410
17.2.7 Marine Environmental Quality (MEQ).....	411
17.2.8 Sustainability of Marine Ecosystems.....	413
17.2.9 Human Health and Marine Ecosystem Health	413
17.3 Indicators for Assessing Marine Ecosystem Health	414
17.3.1 Monitoring Approaches	414
17.3.2 Indicators and Indices	415
17.3.3 Status and Trends Analysis	418
17.4 Summary and Conclusions	418
Acknowledgments	419
References	419
Index.....	431
