1 Complexity in the economy	1
The meaning of structural complexity	3
Impacts of structural complexity	6
Measurements of structural complexity	11
Final remarks on methodology	13
2 Population	18
Demographic structures: Ethnicity, family structure, education, and age	19
Economic structures: The distribution of income and wealth	29
The future	38
The impact of trends of structural complexity	41
Final word	48
3 The labor force: Complexity and unemployment	50
Structural complexity and the skill levels of the job structure	51
Structural complexity and the heterogeneity of occupations	56
The rising long-term level of unemployment	57
Conclusions and implications for the future	73
4 The labor force: Changes in sectors and organization	75
The shift of the labor force to the "information sector"	75
Changes in the labor-management environment	87
Conclusions and implications for the future	97
5 Wealth, ownership, and the financial structure	101
Trends in the ownership and composition of wealth	102
Trends in the structural complexity of the financial system	103
Implications: Financial distress	110
Implications: Volatility of production and financial variables	114
Conclusions and implications for the future	123

6	Production institutions and management	127
	Managing complexity: Changes in internal corporate structures	127
	The size distribution of productive units	136
	The separation of ownership and control	142
	Summary and implications for the future	155
7	The behavior of markets	158
	Some retail price behavior in domestic markets	159
	Changes in the degree of market competition	167
	Market volatility	170
	Conclusions and implications for the future	177
8	The foreign trade sector	181
	Changes in the relative share of foreign trade in the GDP	182
	The skill content of exports and imports	190
	Competitiveness and structural complexity	193
	Conclusions and implications for the future	206
9	The government sector	210
	Evolution of the size of the government sector	211
	Government expenditures as a response to structural complexity	212
	The government as a generator of structural complexity	224
	The impact of structural complexity on governmental policy effectiveness	231
	Conclusions and implications for the future	236
10	The future of U.S. capitalism	242
	Economic performance as a stimulus to systemic change	243
	Forces in the socioeconomic environment stimulating systemic change	247
	Scenarios of alternate capitalisms	265
	A brief summary	269
	Epilogue	270
	Appendix notes	272
	1.1: The meaning of complexity	272
	1.2: Use of the Theil statistic	273
	2.1: Educational and religious heterogeneity	274
	2.2: Further details on wage and salary inequalities	275
	2.3: The raw material content of consumption at different income levels	283
	2.4: A simulation model of population and economic growth	283

2.5: Statistical notes for Chapter 2	287
3.1: Determination of the skill level of the occupational structure	288
3.2: Calculations of wage rigidity	289
3.3: Other statistical notes for Chapter 3	292
4.1: Statistical notes for Chapter 4	293
5.1: Changes in the ownership of wealth	294
5.2: Detailed results of the volatility tests	297
5.3: Statistical notes for Chapter 5	299
6.1: Financial fragility in the nonfinancial corporate sector	300
6.2: The structure of production units	303
6.3: Trends in executive compensation	306
6.4: More data from the company survey	308
6.5: Statistical notes for Chapter 6	308
7.1: The data set of domestic prices	309
7.2: Further data on concentration ratios	309
7.3: Further comments on price volatility	309
8.1: Internationalization of the U.S. economy	325
8.2: The direction of trade	329
8.3: Additional data on job characteristics and trade	330
8.4: Additional data on competitiveness	332
8.5: Statistical notes for Chapter 8	334
9.1: Particular economic features of the federal governmental sector	335
9.2: Simulation model of the federal governmental sector	337
9.3: Statistical notes for Chapter 9	340
10.1: Values held by managers	341
10.2: The U.S. macroeconomic performance	341
10.3: Additional remarks on alternate scenarios for capitalism	343
10.4: Environmental catastrophes and the economic system	356
 Bibliography	 358
