Contents

	Series editor's preface	*page* vii
	List of contributors	x
	Introduction and overview *Hervé Moulin, Maurice Salles, & Norman J. Schofield*	1
I	**Historical aspects of social choice**	
1	The first golden age of social choice, 1784–1803 *Iain McLean*	13
II	**Ethical aspects of social choice**	
2	The requisites of equal opportunity *Marc Fleurbaey*	37
3	Social choice of individual and group rights *Peter J. Hammond*	55
4	Population monotonic allocation rules *William Thomson*	79
III	**Algebraic and combinatorial aspects of social choice**	
5	Condorcet efficiency and social homogeneity *William V. Gehrlein*	127
6	Latticial theory of consensus *Bruno Leclerc & Bernard Monjardet*	145
IV	**Geometric aspects of social choice**	
7	Arrow theorems in economic environments *James Redekop*	163

8 Inner consistency or not inner consistency: A reformulation is the answer 187
Donald G. Saari

9 Existence of a smooth social choice functor 213
Norman J. Schofield

10 Dynamical convergence in the Euclidean spatial model 247
Craig A. Tovey

V Social choice and cooperative games

11 Incentives in market games with asymmetric information: Approximate NTU cores in large economies 263
Beth Allen

12 A note on implementation and strong dominance 277
Tilman Börgers

13 Coalition-proof communication equilibria 289
Ezra Einy & Bezalel Peleg

14 Stability of coalition structures and the principle of optimal partitioning 301
Michel Le Breton & Shlomo Weber

15 The holdout game: An experimental study of an infinitely repeated game with two-sided incomplete information 321
Richard D. McKelvey & Thomas R. Palfrey

VI Other applications

16 Exact aggregation under risk 353
William A. Barnett

17 The stochastic dominance ordering of income distributions over time: The discounted sum of the expected utilities of incomes 375
Thierry Karcher, Patrick Moyes, & Alain Trannoy

Appendix: Conference program 409
