

# **Terrane Accretion and Orogenic Belts**

**Edited by Evan C. Leitch  
Erwin Scheibner**

**Geodynamics Series  
Volume 19**

**American Geophysical Union  
Washington, D.C.  
Geological Society of America  
Boulder, Colorado**

**1987**

## CONTENTS

- Preface *E.C. Leitch and E. Scheibner* ix
- Stratotectonic Terranes of the Eastern Australian Tasmanides *E.C. Leitch and E. Scheibner* 1
- A Critique of Paleomagnetic Results From Australian Paleozoic Fold Belts and Displaced Terranes *P. W. Schmidt and B. J. J. Embleton* 21
- Terranes of the Wonominta Block, Far Western New South Wales *E. C. Leitch, B. D. Webby, K. J. Mills, and P. Kolbe* 31
- Early Palaeozoic Back-Arc Deformation in the Lachlan Fold Belt, Southeastern Australia: Implications for Terrane Translations in Eastern Gondwanaland *Christopher L. Fergusson* 39
- Terranes of the Tumut District, Southeastern New South Wales, Australia *H. Basden, B. J. Franklin, B. Marshall, and A. E. Walther* 57
- The Eastern Lachlan Fold Belt of Southeast Australia: A Possible Late Ordovician to Early Devonian Sinistral Strike Slip Regime *G. H. Packham* 67
- Contrasting Structural Styles in the Paleozoic Subduction Complex of the Southern New England Orogen, Eastern Australia *Kenneth C. Cross, Christopher L. Fergusson, and Peter G. Flood* 83
- Carboniferous Faunas: Their Role in the Recognition of Tectonostratigraphic Terranes in the Tasman Belt, Eastern Australia *John Roberts* 93
- Biogeographic Significance of Some Ordovician Faunas in Relation to East Australian Tasmanide Suspect Terranes *Barry D. Webby* 103
- South Western Pacific Permian and Triassic Marine Faunas: Their Distribution and Implications for Terrane Identification *N. W. Archbold* 119
- Oroclinal Bending, Fragmentation and Deformation of Terranes in the New England Orogen, Eastern Australia *R. J. Korsch and H. J. Harrington* 129
- Evidence for Sinistral Movement on the Peel Fault System in Serpentinites, Glenrock Station, N.S.W. *Robin Offler and Adrian J. Williams* 141
- Late Palaeozoic and Early Mesozoic Evolution of the New England Orogen in Southeastern Queensland—A Photogeological Study *C. R. Nash* 153
- Provisional Subdivision of Northeastern North Island, New Zealand, Into Tectonostratigraphic Terranes *J. Duane Gibson* 161
- Aspiring Terrane: An Oceanic Assemblage From New Zealand and Its Implications for Terrane Accretion in the Southwest Pacific *R. J. Norris and D. Craw* 169
- Tectonostratigraphic Terranes of the Croisilles Harbour Region, South Island, New Zealand *C. A. Landis and M. C. Blake, Jr.* 179
- Terrane Boundaries and Terrane Displacement in Northern Victoria Land, Antarctica: Some Problems and Constraints *J. D. Bradshaw* 199
- Metamorphism and Deformation in the Bowers Supergroup: Implications for Terrane Accretion in Northern Victoria Land, Antarctica *George M. Gibson* 207

The Mesozoic Tectonostratigraphic Terranes and Accretionary Heritage of South-Eastern Mainland Asia *Michael P. Klimetz* 221

The High P/T Metamorphic Rocks of China *Zh. M. Zhang and J. G. Liou* 235

Accreted Terranes and Mineral Resources of Eastern China *Pow-Foong Fan* 249

Tectonostratigraphic Terranes of the Coastal Region of Southeast China *Yangshen Shi, Lingzhi Guo, Ruishi Ma, Huafu Lu, and Huogen Dong* 259

Mesozoic Terranes in the Japanese Islands and Neighbouring East Asia *Shinjiro Mizutani* 263

Complex Fragmentation of Permo-Triassic and Jurassic Accreted Terranes in the Chugoku Region, Southwest Japan and the Formation of the Sangun Metamorphic Rocks *Teruo Watanabe, Takao Tokuoka, and Takahita Naka* 275

Paleomagnetic Constraint on the Evolution of the Upper Cretaceous Izumi Basin in Shikoku, Southwest Japan *Kazuto Kodama* 291

Preliminary Geophysical Interpretation of the Oceanic Terranes of Interior and Western Alaska: Evidence for Thick Crust of Intermediate Density *John W. Cady* 301

Thermal Maturity of Tectonostratigraphic Terranes Within the Franciscan Complex, California *Michael B. Underwood, M. C. Blake, Jr., and David G. Howell* 307

Basement Fragments, Accreted Tectonostratigraphic Terranes, and Overlap Sequences: Elements in the Tectonic Evolution of the Arabian Shield *Peter R. Johnson, Erwin Scheibner, and E. Alan Smith* 323
