MULTIPLE COMPARISONS, SELECTION, AND APPLICATIONS IN BIOMETRY

A Festschrift in Honor of Charles W. Dunnett

edited by

FRED M. HOPPE

Contents

Preface iii

Contributors ix

1 A Conversation with Charles W. Dunnett 1

2 Whither Biometry?
David J. Finney 11

PART A MULTIPLE COMPARISONS

3 Probability Inequalities and Dunnett's Test
Eugene Seneta 29

4 Multiple Comparisons in Split Block and Split-Split Plot Designs
Walter T. Federer and Charles E. McCulloch 47

5 Multiple Comparisons with a Control in Response Surface Methodology: The Problem, Examples, and Relative Efficiency Results
Don Edwards and Ping Sa 63

6 One-Sided Multiple Comparisons of Response Rates with a Control
David R. Bristol 77

7 Distribution-Free and Asymptotically Distribution-Free Comparisons with a Control in Blocked Experiments
John D. Spurrier 97

8 **Plackett's Identity, Its Generalizations, and Their Uses**
Satish Iyengar 121

9 **Some Minimax Test Procedures for Comparing Several Normal Means**
Anthony J. Hayter and Wei Liu 137

10 **Approximate Simultaneous Confidence Intervals**
Joseph Glaz 149

11 **Stepwise Multiple Comparisons of Repeated Measures Means Under Violations of Multisample Sphericity**
H.J. Keselman 167

12 **Where Should Multiple Comparisons Go Next?**
John W. Tukey 187

PART B SELECTION

13 **Performances of Selection Procedures for 2-Factor Additive Normal Populations with Common Known Variance**
Robert E. Bechhofer, David Goldsman, and Mark Hartmann 209

14 **Multi-Factor Extensions of Paulson's Procedures for Selecting the Best Normal Population**
Mark Hartmann 225

15 **The Least Favorable Configuration of a Two-Stage Procedure for Selecting the Largest Normal Mean**
Thomas J. Santner and Anthony J. Hayter 247

16 **A Bayesian Approach to Comparing Treatments with a Control**
Ajit C. Tamhane and G.V.S. Gopal 267

17 **Nonlinear Renewal Theory and Beyond: Reviewing the Roles in Selection and Ranking**
Nitis Mukhopadhyay 293

18 One-Sided Sequential Tests to Establish Equivalence Between Treatments with Special Reference to Normal and Binary Responses
Christopher Jennison and Bruce W. Turnbull 315

19 Subset Selection Procedures for Binomial Models Based on a Class of Priors and Some Applications
Shanti S. Gupta and Yuning Liao 331

20 A Two-Stage Procedure for Selecting the δ^*-Optimal Guaranteed Lifetimes in the Two-Parameter Exponential Model
TaChen Liang and S. Panchapakesan 353

21 A Note on Selection Procedures and Selection Constants
Stefan Driessen 367

22 Sharpening Subset Selection of Treatments Better than a Control
Manfred Horn and Rüdiger Vollandt 381

PART C BIOMETRY AND DESIGN

23 Interim Analyses in Clinical Trials
Peter Armitage 391

24 A New Procedure for Assessing Acute Oral Toxicity
Robert N. Curnow and Anne Whitehead 403

25 Estimating Risks of Progression to AIDS Using Serially Measured Immunologic Markers
Janet M. Raboud, Randall A. Coates, and Vern T. Farewell 415

26 Some Statistical Methods for Followup Studies of Disease with Intermittent Monitoring
Jerry F. Lawless and Ping Yan 427

27 Exact Solutions to the Behrens-Fisher Problem
Baldeo K. Taneja and Edward J. Dudewicz 447

28 An Easy Way to Use Dunnett *t* with SAS Least Squares Means
Spencer M. Free Jr. 479

29 Future Directions for National Health Information Systems
David F. Bray and Robert Lussier 487

30 Concomitants of Order Statistics: Review and Recent Developments
H.A. David 507

31 Residual Plots for Minimal Resolution IV Designs
Peter W.M. John 519

32 An Optimal Stopping Rule for Multinomial Inverse Sampling Problems
Milton Sobel and Pinyuen Chen 531

Publications of Charles W. Dunnett 549

Index 555
