

PROTOCOLS IN PROTOZOOLOGY

TABLE OF CONTENTS

JOHN J. LEE AND ANTHONY SOLDO
EDITORS

A. ISOLATION, CULTURE, NUTRITION AND BIOASSAY

Isolation methods

1. Axenic isolation of diatoms and chlorophytes as food for protozoa. John J. Lee
2. A baited-bloom approach toward the isolation of marine ciliates as potential food for mariculture. John J. Lee, Annette Douglas & Tracy Barry
3. Cloning ciliates and other protozoa using the silicone oil plating procedure. A. T. Soldo
4. Isolation and purification of bacterial symbionts (xenosomes) from axenically cultivated marine ciliates. A. T. Soldo
5. Isolation of endosymbiotic algae from larger foraminifera. John J. Lee

Cultivation methods

6. Cultivation of selected photosynthetic cryptomonads. Thomas A. Nerad & Pierre-Marc Daggett
7. Cultivation of selected colorless cryptomonads. Thomas A. Nerad & Pierre-Marc Daggett
8. Cultivation of photosynthetic dinoflagellates. Thomas A. Nerad & Pierre-Marc Daggett
9. Cultivation of colorless dinoflagellates. Thomas A. Nerad & Pierre-Marc Daggett
10. Cultivation of photosynthetic euglenids. Pierre-Marc Daggett & Thomas A. Nerad

11. Cultivation of osmotrophic euglenids. Thomas A. Nerad & Pierre-Marc Daggett
12. Cultivation of *Isonema* and related flagellates. Thomas A. Nerad & Pierre-Marc Daggett
13. Cultivation of selected photosynthetic chrysomonads. Thomas A. Nerad & Pierre-Marc Daggett
14. Cultivation of Bicosoecids. Thomas A. Nerad & Pierre-Marc Daggett
15. Cultivation of selected prymnesiids. Thomas A. Nerad & Pierre-Marc Daggett
16. Cultivation of selected volvocids other than *Chlamydomonas*. Thomas A. Nerad & Pierre-Marc Daggett
17. Cultivation of selected osmotrophic volvocids. Pierre-Marc Daggett & Thomas A Nerad
18. Cultivation of *Chlamydomonas*. Pierre-Marc Daggett & Thomas A. Nerad
19. Cultivation of selected prasinomonads. Thomas A. Nerad & Pierre-Marc Daggett
20. Cultivation of choanoflagellates. Thomas A. Nerad & Pierre-Marc Daggett
21. Cultivation of *Proteromonas*. Pierre-Marc Daggett & Thomas A. Nerad
22. Cultivation of trichomonads. Pierre-Marc Daggett & Thomas A. Nerad
23. Cultivation of free-living diplomonads. Thomas A Nerad & Pierre-Marc Daggett
24. Cultivation of free-living bodonids. Thomas A. Nerad & Pierre-Marc Daggett
25. Axenic cultivation of *Cryptobia*. Pierre-Marc Daggett & Thomas A. Nerad
26. Axenic cultivation of insect and plant trypanosomatids. Pierre-Marc Daggett & Thomas A. Nerad
27. Cultivation of bacterivorous flagellates. Thomas A. Nerad & Pierre-Marc Daggett
28. Cultivation of *Theratromyxa*. Thomas A. Nerad & Pierre-Marc Daggett
29. Cultivation of bacterivorous freshwater amoebae. Thomas A. Nerad & Pierre-Marc Daggett
30. Cultivation of bacterivorous marine amoebae. Thomas A. Nerad & Pierre-Marc Daggett

31. Cultivation of *Gymnophrydium*. Thomas A. Nerad & Pierre-Marc Daggett
32. Cultivation and maintenance of benthic foraminifera. John J. Lee & Walter W. Faber Jr.
33. Cultivation of Myxomycotans. Thomas A. Nerad & Pierre-Marc Daggett
34. Cultivation of protostelids. Thomas A. Nerad & Pierre-Marc Daggett
35. Laboratory maintenance cultures of planktonic foraminifera and radiolaria. O. Roger Anderson
36. Cultivation of *Labyrinthula*. Thomas A. Nerad & Pierre-Marc Daggett
37. Cultivation of *Plasmodium*. Thomas A. Nerad & Pierre-Marc Daggett
38. Cultivation of *Toxoplasma*. Thomas A. Nerad & Pierre-Marc Daggett
39. Cultivation of *Babesia*. Thomas A. Nerad & Pierre-Marc Daggett
40. Cultivation of *Stephanopogon*. Thomas A. Nerad & Pierre-Marc Daggett
41. Cultivation of selected karyorelicteans. Thomas A. Nerad, Pierre-Marc Daggett & Eugene B. Small
42. Cultivation of selected heterotrichs. Pierre-Marc Daggett & Thomas A. Nerad
43. Cultivation of *Sorogena*. Thomas A. Nerad & Pierre-Marc Daggett
44. Cultivation of ciliates predatory on other protozoa. Thomas A. Nerad & Pierre-Marc Daggett
45. Cultivation of suctorians. Thomas A. Nerad & Pierre-Marc Daggett
46. Cultivation of *Paramecium*. Thomas A. Nerad & Pierre-Marc Daggett
47. Cultivation of *Paramecium* in chemically defined medium. A. T. Soldo
48. Cultivation of *Tetrahymena*. Pierre-Marc Daggett & Thomas A. Nerad
49. Cultivation of selected hymenostomes. Thomas A. Nerad & Pierre-Marc Daggett
50. Cultivation of scuticociliates. Thomas A. Nerad & Pierre-Marc Daggett
51. Cultivation of selected colpodid ciliates. Thomas A. Nerad & Pierre-Marc Daggett
52. Cultivation of selected peritrichs. Pierre-Marc Daggett & Thomas A. Nerad
53. Collection and cultivation of histophagous ciliates. D. Wayne Coats
54. Cultivation of *Blastocystis*. Thomas A. Nerad & Pierre-Marc Daggett
55. Cultivation of rumen fungi. Nigel Yarlett & Seymour H. Hutner

Preservation of Protozoa

56. Preservation of protozoa: cryopreservation, drying & freeze drying -
General methods and definition of terms. Thomas A. Nerad &
Pierre-Marc Daggett
57. Cryopreservation of Cryptomonads. Thomas A. Nerad & Pierre-Marc
Daggett
58. Cryopreservation of dinoflagellates. Pierre-Marc Daggett & Thomas
A. Nerad
59. Cryopreservation of Euglenids. Pierre-Marc Daggett & Thomas A.
Nerad
60. Cryopreservation of *Isonema* and related flagellates. Thomas A.
Nerad & Pierre-Marc Daggett
61. Cryopreservation of bicosoecids. Thomas A. Nerad & Pierre-Marc
Daggett
62. Cryopreservation of chryomonads. Pierre-Marc Daggett & Thomas
A. Nerad
63. Cryopreservation of prymnesiids. Thomas A. Nerad & Pierre-Marc
Daggett
64. Long term maintenance of volvocids by drying and cryopreservation.
Pierre-Marc Daggett & Thomas A. Nerad
65. Long-Term maintenance of *Chlamydomonas* by cryopreservation and
freeze-drying. Pierre-Marc Daggett & Thomas A. Nerad
66. Cryopreservation of Choanoflagellates. Thomas A. Nerad and
Pierre-Marc Daggett
67. Cryopreservation of *Proteromonas*. Pierre-Marc Daggett & Thomas
A. Nerad
68. Cryopreservation of trichomonads. Pierre-Marc Daggett & Thomas A.
Nerad
69. Cryopreservation of *Giardia*. Pierre-Marc Daggett & Thomas A.
Nerad
70. Cryopreservation of diplomonads other than *Giardia*. Thomas A.
Nerad & Pierre-Marc Daggett
71. Cryopreservation of termite flagellates. Thomas A. Nerad &
Pierre-Marc Daggett
72. Cryopreservation of trypanosomatid parasites of vertebrates.
Pierre-Marc Daggett & Thomas A. Nerad
73. Cryopreservation and freeze-drying of insect and plant
trypanosomatids . Pierre-Marc Daggett & Thomas A. Nerad

74. Long term maintenance of free-living bodonids by cryopreservation and drying. Thomas A. Nerad & Pierre-Marc Daggett
75. Long term maintenance of microflagellates of uncertain taxonomic affinity by drying and cryopreservation. Thomas A. Nerad & Pierre-Marc Daggett
76. Long term maintenance of large freshwater/terrestrial amoebae by drying and cryopreservation. Thomas A. Nerad & Pierre-Marc Daggett
77. Long term maintenance of free-living amoebae including amoeboflagellates. Thomas A. Nerad & Pierre-Marc Daggett
78. Cryopreservation of scaled and testate amoebae. Pierre-Marc Daggett & Thomas A. Nerad
79. Cryopreservation of *Gymnophyrydium*. Thomas A. Nerad & Pierre-Marc Daggett
80. Cryopreservation of foraminiferans. Thomas A. Nerad & Pierre-Marc Daggett
81. Cryopreservation of *Blastocystis*. Thomas A. Nerad & Pierre-Marc Daggett
82. Cryopreservation and freeze-drying of slime molds. Pierre-Marc Daggett & Thomas A. Nerad

83. Cryopreservation of labyrinthulids. Thomas A. Nerad & Pierre-Marc Daggett
84. Cryopreservation of *Plasmodium*. Thomas A. Nerad & Pierre-Marc Daggett
85. Cryopreservation of *Toxoplasma gondii*. Pierre-Marc Daggett & Thomas A. Nerad
86. Cryopreservation of selected coccidia. Thomas A. Nerad & Pierre-Marc Daggett
87. Cryopreservation of *Pneumocystis*. Thomas A. Nerad & Pierre-Marc Daggett
88. Cryopreservation of *Babesia*. Pierre-Marc Daggett & Thomas A. Nerad
89. Long term maintenance of microsporida by freeze-drying and cryopreservation. Pierre-Marc Daggett & Thomas A. Nerad
90. Cryopreservation of *Paramecium*. Pierre-Marc Daggett & Thomas A. Nerad
91. Cryopreservation of *Tetrahymena*. Pierre-Marc Daggett & Thomas A. Nerad

X

92. Cryopreservation of non-encysting ciliates. Thomas A. Nerad & Pierre-Marc Daggett
93. Long term maintenance of selected encysting ciliates by drying and cryopreservation. Pierre-Marc Daggett & Thomas A. Nerad
94. Cryopreservation of *Stephanopogon*. Thomas A. Nerad & Pierre-Marc Daggett
95. Cryopreservation of prasinomonads. Thomas A. Nerad & Pierre-Marc Daggett

B ECOLOGICAL METHODS

1. Plankton-sampling-freshwater. Bland J. Finlay & Barbara E. Guhl
2. Benthic sampling-freshwater. Bland J. Finlay & Barbara E. Guhl
3. A simple method for obtaining concentrated populations of protists from sediments. Eugene B. Small
4. A simple method for obtaining concentrated populations of protists from sediment water. Eugene B. Small
5. Sampling and enumerating soil protozoa. Stuart S. Bamforth
6. Enumerating soil testate amoebae by direct counting. Erna Aescht & Wilhelm Foissner
7. Enumerating active soil ciliates by direct counting. Erna Aescht & Wilhelm Foissner
8. Enumeration of protists and small metazoans in activated sludge. Hannes Augustin & Wilhelm Foissner
9. Collecting aufwuchs on artificial substrata. J. R. Pratt & R. L. Kepner, Jr.
10. Estimating the species richness of soil protozoa using the "non-flooded petri dish method". Wilhelm Foissner
11. Evaluating water quality using protozoa and saprobity indexes. Wilhelm Foissner.
12. Biomonitoring using protozoans. J. R. Pratt & J. M. Balczom
13. Determination of phagotrophic protist feeding rates *in situ*. Evelyn B. Sherr & Barry Sherr
14. Qualitative study and quantitative analysis of behavior of ciliated protozoa: principles, techniques, tricks. Nicola Ricci
15. Cover slip traps: simple samplers for sessile protists. Eugene B. Small

C FIXATION, STAINING, LIGHT AND ELECTRON MICROSCOPICAL TECHNIQUES

1. Immobilization methods for protozoa. Arthur J. Repak
2. Photomicrography. Arthur J. Repak
3. Attachment of sessile and thigmotatic protozoa to coverglasses.
Bruce F. Hill
4. Protargol staining. Dennis H. Lynn
5. A short procedure for protargol staining. Barry J. Wicklow & Bruce
F. Hill
6. Protargol methods. Wilhelm Foissner
7. The silver carbonate methods. Wilhelm Foissner
8. The "wet" silver nitrate method. Wilhelm Foissner
9. Supravital staining with methyl green-pyronin. Wilhelm Foissner
10. Observing living ciliates. Wilhelm Foissner
11. The "dry" silver nitrate method. Wilhelm Foissner
12. Feulgen staining the nuclei of foraminifera. John J. Lee & Jan
Pawlowski
13. Fixation for immunolabelling of cells and tissue for TEM. Jerome J.
Paulin
14. Freeze drying of cells for scanning electron microscopy. Jerome J.
Paulin
15. Rapid-freezing and freeze substitution of protozoa for transmission
and scanning electron microscopy. Mark A. Farmer
16. General comments on fixation of protozoa and transmission
electron microscopy. Jerome J. Paulin
17. Fixation of protozoa with combinations of glutaraldehyde,
formaldehyde and osmium tetroxide. Jerome J. Paulin
18. Poly-L-Lysine adhesive for cell suspension and reference to other
adhesives used in scanning electron microscopy. Jerome J.
Paulin
19. Preparation of cells for scanning electron microscopy. Jerome J.
Paulin
20. Preparation of samples for scanning electron microscopy. Wilhelm
Foissner
21. Ruthenium red as a stain. Jerome J. Paulin
22. Cytochemical localization of acid phosphatase (lysosomal and
digestive activity marker enzyme). O. Roger Anderson

D MOLECULAR BIOLOGICAL AND GENETIC METHODS

1. Isolating tubulin-free pellicles from protozoa. Norman E. Williams
2. Isolating the cortical cytoskeleton from *Tetrahymena*. Norman E. Williams
3. DNA purification from polysaccharide-rich cells. C. Graham Clark
4. Riboprinting: A molecular approach to the identification and taxonomy of protozoa. C. Graham Clark
5. Use of antibodies as probes in the study of amoebae. Kee J. Kim, Eui Y. Choi and Kwang W. Jeon
6. Cloning and sequencing a myosin gene of *Amoeba proteus*
7. Purification of amoeba mtDNA using the unset procedure. E. R. Hugo, V. J. Stewart, R. J. Gast and T. J. Byers
8. Detection of human serum antibodies reactive with *Acanthamoeba polyphaga* by use of an indirect fluorescent antibody (IFA) test. Pamela B. Sheets, Anthony L. Newsome & Stephen D. Allen
9. Detection of animal serum antibodies reactive with *Acanthamoeba polyphaga* by use of an enzyme-linked immunosorbent assay (ELISA)

APPENDIX FOR PHYSIOLOGICAL AND MOLECULAR METHODS

A. T. Soldo

Commonly used stock solutions and buffers

Concentrated acids and bases

Amino acids

Molecular weight and some optical properties of nucleic acid derivatives

Conversion factors for radioactivity

Characteristics of radionuclides

Common abbreviations

E. EDUCATIONAL EXPERIMENTS AND DEMONSTRATIONS

1. Sources of strains for research and teaching. Pierre-Marc Daggett and Thomas A. Nerad
2. Conjugation in *Tetrahymena thermophila*. Linda A. Hufnagel
3. Special techniques for viewing living protozoa. Karl A. Aufderheide
