Contents

Preface...........................................................................................................v
Contributors..............................................................................................ix

1 3D Cell Culture: A Review of Current Approaches and Techniques .......... 1
   John W. Haycock

2 Scaffolds for Tissue Engineering and 3D Cell Culture..............................17
   Eleonora Carletti, Antonella Motta, and Claudio Migliarese

3 Tracking Nanoparticles in Three-Dimensional Tissue-Engineered
   Models Using Confocal Laser Scanning Microscopy.................................41
   Vanessa Hearnden, Sheila MacNeil, and Giuseppe Battaglia

4 Using Immuno-Scanning Electron Microscopy for the Observation
   of Focal Adhesion-substratum interactions at the Nano- and Microscale
   in S-Phase Cells ..................................................................................53
   Manus J.P. Biggs, R. Geoff Richards, and Matthew J. Dalby

5 3D Sample Preparation for Orthopaedic Tissue Engineering Bioreactors .... 61
   Sarah H. Cartmell, Sarah Rathbone, Gemma Jones, and L. Araida Hidalgo-Bastida

6 Quantification of mRNA Using Real-Time PCR and Western
   Blot Analysis of MAPK Events in Chondrocyte/Agarose Constructs .......... 77
   David A. Lee, June Brand, Donald Salter, Oto-Ola Akanji, and Tina T. Chowdhury

7 Genetic Modification of Chondrocytes Using Viral Vectors .....................99
   Teresa Coughlan, Aileen Crawford, Paul Hatton, and Michael Barker

8 Stem Cell and Neuron Co-cultures for the Study of Nerve Regeneration .....115
   Paul J. Kingham, Cristina Mantovani, and Giorgio Terenghi

9 Production of Tissue-Engineered Skin and Oral Mucosa for Clinical
   and Experimental Use ........................................................................129
   Sheila MacNeil, Joanna Shepherd, and Louise Smith

10 Three-Dimensional Alignment of Schwann Cells Using Hydrolysable
    Microfiber Scaffolds: Strategies for Peripheral Nerve Repair .................155
    Celia Murray-Dunning, Sally L. McArthur, Tao Sun, Rob McKean,
    Anthony J. Ryan, and John W. Haycock

11 Encapsulation of Human Articular Chondrocytes into 3D Hydrogel:
    Phenotype and Genotype Characterization .........................................167
    Rui C. Pereira, Chiara Gentili, Ranieri Cancedda, Helena S. Azevedo, and Rui L. Reis

12 Micro-structured Materials and Mechanical Cues in 3D Collagen Gels .......183
    James B. Phillips and Robert Brown
