Acknowledgements for the First Edition	xiv
1 Introduction	
1 The difference between macroeconomics and microeconomics	1
2 The circular flow of income	4
3 The main macroeconomic aggregates	7
4 Aggregates and large numbers—an advantage of macroeconomics	8
5 Conclusion	10
2 Measuring National Income	
1 Introduction	12
2 Measuring Gross Domestic Product in the modern sector: the product method	13
3 Measuring GDP in the modern sector: the income method	18
4 Measuring GDP in the modern sector: the expenditure method	19
5 Subsistence farming	21
6 Factor cost and market prices	27
7 Imputed income in the modern sector	28
8 Government services	28
9 Domestic Product, National Product and the income of foreigners	30
10 Changing prices	34
11 Making international comparisons of national income	36
12 Comparing the structure of output between countries	40
13 Conclusion	41
3 Excess Demand and Spare Capacity	
1 The link between national income concepts and aggregate demand, supply and income	43

2	Excess demand	44
3	Excess supply	47
4	Feedback effects	48
5	Equilibrium and disequilibrium	50
6	Equilibrium expressed in terms of saving and investment	51
7	Spare capacity and 'unemployment'	54
8	Output and employment	58
4	<i>The Consumption Function</i>	
1	Definition of consumption	61
2	Importance of consumption	62
3	The determinants of changes in private consumption	63
4	Other factors affecting consumption	71
5	The impact of the consumption function $C = a + bY$	73
6	Another way of deriving the multiplier formula	75
7	The multiplier expressed graphically	76
8	Assumptions underlying the multiplier formula	78
5	<i>Government Expenditure</i>	
1	Definition	81
2	Growth	82
3	The control of government spending	83
4	Government spending and tax revenue	86
5	The impact of changes in government spending	90
6	Assumptions behind the multiplier analysis	93
6	<i>Exports and Imports</i>	
1	Definitions	97
2	Determinants of export prices and their effects on income	100
3	Determinants of export volumes and their effects on income	105
4	The determinants of imports	107
5	The impact of changes in the volume of exports	110
6	Conclusion	114
7	<i>Investment</i>	
1	Definition	118
2	Investment as a source of fluctuations	119
3	Theories of investment	121
4	New foreign investors: 'market-protectors'	123
5	New foreign investors: 'non-market-protectors'	127
6	Investment in mining	129
7	Foreign investment: expansion of existing investment	131
8	Locally-owned investment	134
9	The calculation of expected profit	136
10	Investment and interest rates	140
11	The availability of finance	146

12 Conclusion	148
<i>Appendix: Capital stock adjustment and accelerator principles</i>	148
8 Money	
1 Definition	153
2 The creation of money	154
3 Limits on the creation of new bank deposits	157
4 Changes in bankers' cash	161
5 The multiplier effects of a change in bankers' cash	166
6 Bank lending: the impact of imports and taxation	169
7 Time and savings deposits	172
8 Alternative sources of bank liquidity	173
9 Alternative methods of controlling bank credit	175
10 Summary of central bank functions	178
11 Conclusion	182
<i>Appendix: Definitions of government stock, treasury bills, marketability, liquidity; financing a budget deficit by borrowing from commercial banks</i>	183
9 Theories of Money and Monetary Policy	
1 Introduction	191
2 The demand for money	191
3 The quantity theory of money	196
4 The determination of interest rates: industrial economies	200
5 Impact of industrial country interest rates on African economies	202
6 The determination of interest rates: African economies	203
7 Money, interest rates and national income: the <i>IS-LM</i> Model	209
8 Money and national income determination in Africa	213
9 An alternative monetary model (The Polak Model)	216
10 Monetary policy	218
11 Exchange rate policy	221
10 Inflation	
1 Some definitions	229
2 Demand and monetary inflation	230
3 Cost inflation	231
4 Cost inflation: wage increases	234
5 Imported inflation	236
6 The effects of inflation	239
7 The effects of continuing inflation: divergent and convergent inflation	243
8 Devaluation	248
9 Using inflation as a tax	254
10 Controls on prices and incomes	256

11	<i>Theory of Public Finance</i>	
	1 Introduction	260
	2 Allocation: collective goods and merit goods	260
	3 Distribution	263
	4 Stabilisation	267
	5 Automatic stabilisation	268
	6 Growth and development	271
	7 Economic independence	272
	8 Publicly-produced goods	274
	9 Conclusion	276
12	<i>Paying for Government Spending</i>	
	1 Introduction	279
	2 Basic principles of taxation	279
	3 The application of theory	282
	4 Taxation of foreign firms	285
	5 Rural taxation	288
	6 Economic efficiency	289
	7 Tax expectations	290
	8 Financing a deficit—domestic sources	291
	9 Financing a deficit—foreign sources	293
	10 Other ways of 'paying' for collective goods	298
	Index	302
