<i>List of Figures</i>	ix
<i>List of Tables</i>	xi
<i>Preface</i>	xiii
<i>Introduction</i>	xv

## PART I LIFETIME EARNINGS

1	Lifetime Earnings and Inequality	3
1.1	Earnings over Several Years	6
1.2	The Present Value of Lifetime Earnings	9
1.3	Alternative Approaches	11
1.4	Combining Income and Net Worth	14
1.5	Consumption and Inequality	17
	Notes and Further Reading	19
2	Measuring Wealth in Imperfect Capital Markets	21
2.1	A Basic Two-Period Model	22
2.2	The Isoelastic Utility Function	26
3	Earnings Comparisons between Generations	32
3.1	Cohort and Cross-Sectional Earnings Profiles	35
3.2	All Occupations Combined	37
3.3	Occupational Differences	41
3.4	An Application	43
	Notes and Further Reading	47
4	Lifetime Earnings of Men in Australia	48
4.1	Age-Earnings Profiles	49
4.2	Inequality and the Time Period	55
4.3	Occupational Comparisons	58
	Notes and Further Reading	61

5	Earnings Profiles and Compensation	63
5.1	Constant Earnings	64
5.2	The Use of Earnings Profiles	66
5.3	Some Further Comparisons	74
	Notes and Further Reading	76
<b>PART II EARNINGS OF SCIENTISTS</b>		
6	Cohort and Cross-Sectional Earnings Profiles	81
6.1	The Basic Model	81
6.2	Empirical Results	84
	Notes and Further Reading	90
7	Variations in Earnings and Responsibility	91
7.1	Measuring Responsibility	93
7.2	Earnings and Responsibility	96
7.3	Age and Earnings	101
8	Earnings and Job Mobility	106
8.1	The Analysis of Internal Processes	107
8.2	The Measurement of Internal Mobility	108
8.3	Changes in Job Duties and Earnings	111
8.4	Mobility and Earnings	118
<b>PART III DEMOGRAPHIC EFFECTS</b>		
9	Financing Pensions in an Ageing Population	127
9.1	Alternative Systems	128
9.2	The Government Budget Constraint	133
9.3	Ageing Populations and the Tax Rate	138
	Notes and Further Reading	147
10	Aggregate Consumption in a Life-Cycle Model	150
10.1	The Treatment of Household Size	151
10.2	Aggregation over Households	153
10.3	Aggregation over Ages	156
	Notes and Further Reading	162

**PART IV TAXATION**

<b>11 Individual Choice and the Tax Structure</b>	<b>167</b>
11.1 Progression and Intertemporal Allocation	168
11.2 Intertemporal and Interpersonal Allocation	174
11.3 Direct and Indirect Taxation in a Two-Period Model	177
<b>12 Revenue and Inequality Neutral Changes in the Tax Mix</b>	<b>182</b>
12.1 Consumption Tax Structures	183
12.2 Transfers and Income Taxation	185
12.3 Changing the Tax Mix	190
Notes and Further Reading	195
<b>13 Changing the Tax Mix and Unions' Wage Demands</b>	<b>198</b>
13.1 Simple Monopoly Unions	200
13.2 Changes in the Tax Mix	203
13.3 Revenue Neutral Changes	205
Notes and Further Reading	209
<b>14 Financing Higher Education and Majority Voting</b>	<b>210</b>
14.1 The Model	212
14.2 Majority Voting	220
Notes and Further Reading	225
<i>Bibliography</i>	227
<i>Index</i>	239

# Figures

---

2.1	Wealth in a two-period model	25
3.1	Cross-sectional and cohort earnings profiles	37
3.2	Alternative profiles of fathers and sons	39
4.1	Projected age-earnings profiles: Australian men aged 20 in 1985/86, with 3% growth	54
4.2	Dispersion of annual and long period earnings: Australian men aged 20 in 1985/86	57
5.1	Earnings profiles and compensation	67
9.1	The means-tested system	141
9.2	A basic pension with value added tax and national insurance contributions	142
9.3	Effective tax rates with no means testing	142
9.4	Marginal and average tax rates with means testing	143
9.5	Marginal and average tax rates with a multi-tax system	144
9.6	A higher average pensioner income: means testing	145
9.7	A higher average pensioner income: a multi-tax scheme	145
11.1	Income tax in a two-period model	170
11.2	Committed consumption in each period	178
14.1	Educational choice and deficit neutrality schedules	215

# Tables

---

3.1	Earnings profiles	45
3.2	Variance profiles	45
4.1	Earnings in various age groups: Australian men 1985–86	51
4.2	Discounted earnings: Australian men aged 20 in 1985–86	55
4.3	Coefficient of variation of annual and long period income: Australian men aged 20 in 1985–86	57
4.4	Contribution of mobility to inequality	58
4.5	Age-earnings profiles	59
4.6	Earnings from age 20 to age 55	60
5.1	Income tax structure: Australia 1986	64
5.2	Income profiles from age 40: 1986 +	71
5.3	Income profiles from age 50: 1986 +	73
5.4	Some comparisons	75
6.1	Earnings profiles: members of the RSC	87
6.2	Earnings profiles: Australian scientists	88
6.3	Regressions using age and calendar date	89
7.1	Responsibility assessment schedule	94
7.2	Linear regressions of annual earnings on responsibility score: 1983	98
7.3	Weighted regressions of $\log(y_m) = \alpha + \beta x$	100
8.1	Percentage earnings changes by reason for change: British chemists (all job changes)	112
8.2	Percentage earnings changes by reason for change: Australian scientists (all job changes)	113
8.3	The ratio of external and internal job changes and experience	114
8.4	Direction of change in responsibility	115
8.5	Distribution of percentage earnings changes resulting from responsibility change	116
8.6	Managerial and administrative work and earnings changes	118

8.7	Regression analysis of current earnings on job mobility	121
11.1	Time profiles of income and taxation	169
11.2	Preferred profiles of income and taxation	173
11.3	A tax-progressivity trade-off	177
12.1	Tax-exempt categories	185
12.2	Estimates of $r(q) = \alpha/(q + \theta)^{\beta}$ for alternative structures	186
12.3	Consumption tax structures (annual expenditure)	186
12.4	Income tax rates and thresholds: Australia 1984-85	187
12.5	Eliminating the top rate of income tax	191
12.6	A revised tax structure	193
12.7	Inequality of net income for revised tax structure	194
14.1	Values of $q$ , $p$ and $t$ for alternative parameter values: majority choice and zero state funding ( $\delta = 1.00$ ; $r = 0.6$ )	222
14.2	Values of $q$ , $p$ and $t$ for alternative parameter values: majority choice and zero state funding ( $\delta = 1.25$ ; $r = 0.6$ )	223
