<i>List of Contributors</i>	page vii
<i>Acknowledgments</i>	ix
1 Quaternary mammals and evolutionary theory: introductory remarks and historical perspective	1
ROBERT A. MARTIN AND ANTHONY D. BARNOSKY	
2 A method for recognizing morphological stasis	13
DEBORAH K. ANDERSON	
3 Mosaic evolution at the population level in <i>Microtus pennsylvanicus</i>	24
ANTHONY D. BARNOSKY	
4 Variogram analysis of paleontological data	60
ANDREW P. CZEBIENIAK	
5 Morphological change in Quaternary mammals: a role for species interactions?	71
TAMAR DAYAN, DANIEL SIMBERLOFF, AND EITAN TCHERNOV	
6 Rates of evolution in Plio-Pleistocene mammals: six case studies	84
PHILIP D. GINGERICH	
7 Patterns of dental variation and evolution in prairie dogs, genus <i>Cynomys</i>	107
H. THOMAS GOODWIN	

8	Quantitative and qualitative evolution in the giant armadillo <i>Holmesina</i> (Edentata: Pamphathiidae) in Florida	134
	RICHARD C. HULBERT, JR., AND GARY S. MORGAN	
9	Evolution of mammoths and moose: the Holarctic perspective	178
	ADRIAN M. LISTER	
10	Evolution of hypsodonty and enamel structure in Plio-Pleistocene rodents	205
	LARRY D. MARTIN	
11	Patterns of variation and speciation in Quaternary rodents	226
	ROBERT A. MARTIN	
12	Decrease in body size of white-tailed deer (<i>Odocoileus virginianus</i>) during the late Holocene in South Carolina and Georgia	281
	JAMES R. PURDUE AND ELIZABETH J. REITZ	
13	Short-term fluctuations in small mammals of the late Pleistocene from eastern Washington	299
	JOHN M. RENSBERGER AND ANTHONY D. BARNOSKY	
14	Size change in North American Quaternary jaguars	343
	KEVIN SEYMOUR	
15	Ontogenetic change of <i>Ondatra zibethicus</i> (Arvicolidae, Rodentia) cheek teeth analyzed by digital image processing	373
	LAURENT VIRIOT, JEAN CHALINE, ANDRE SCHAAF, AND ERIC LE BOULENGE	
16	Morphological change in woodrat (Rodentia: Cricetidae) molars	392
