

PHYLOGENIES IN ECOLOGY

A GUIDE TO CONCEPTS AND METHODS

Marc W. Cadotte and T. Jonathan Davies

PRINCETON UNIVERSITY PRESS

PRINCETON AND OXFORD

CONTENTS

Preface ix

- CHAPTER 1** An Entangled Bank: Evolutionary Relationships and Ecological Patterns 1
- 1.1. Systematics and the Diversity of Life 2
 - 1.2. The Origins 3
 - 1.3. “Correcting” Ecological Comparisons 6
 - 1.4. The Emergence of Ecophylogenetics 7
 - 1.5. The Goal of This Book 8
- CHAPTER 2** Building and Using Phylogenies 10
- 2.1. Handling Phylogenies in R 11
 - 2.2. Building Trees 19
 - 2.3. Finding and Adapting Available Trees 31
 - 2.4. Tree Scaling and Rate Smoothing 33
 - 2.5. Conclusion 40
- CHAPTER 3** Phylogenetic Patterns within Communities: Inferring Mechanisms of Ecological Assembly Using Phylogenetic Distances 41
- 3.1. Phylogenetic Distances and Community Assembly 44
 - 3.2. Calculating Community Diversity Metrics 55
 - 3.3. A Note about Phylodiversity Measures—Moving from the Causes to the Consequences of Diversity 65
 - 3.4. Conclusion 66
- CHAPTER 4** Randomizations, Null Distributions, and Hypothesis Testing 67
- 4.1. A Brief History of Randomization Tests in Ecology (or the Simberloffian Shift in Ecology) 72
 - 4.2. How to Build Null Communities 76
 - 4.3. Randomizing Phylogenetic Data 83
 - 4.4. Taking the Pool Seriously 96
 - 4.5. Conclusion 99
- CHAPTER 5** Detecting Patterns of Trait Evolution 100
- 5.1. Phylogenetic Signal 101
 - 5.2. Alternative Models of Trait Evolution 108
 - 5.3. Reconstructing Ancestral States 115
 - 5.4. Conclusion 120
- CHAPTER 6** The Geography of Speciation and Character Displacement 121
- 6.1. Character Divergence and Geographic Overlap 122
 - 6.2. Community-Wide Trait Dispersion 133
 - 6.3. Conclusion 141

| | | |
|-------------------|--|-----|
| CHAPTER 7 | Phylogenetic Diversity across Space and Time | 143 |
| | 7.1. Phylobetadiversity: Measuring Phylogenetic Turnover | 145 |
| | 7.2. The Influence of Spatial Scale on Phylogenetic Patterns | 161 |
| | 7.3. Conclusion | 170 |
| CHAPTER 8 | Speciation, Extinction, and the Distribution of Phylogenetic Diversity | 172 |
| | 8.1. Conservation of the Tree of Life | 172 |
| | 8.2. Macroevolution: Diversification | 181 |
| | 8.3. Conclusion | 194 |
| CHAPTER 9 | Using Phylogenetic Information to Make Better Conservation Decisions | 196 |
| | 9.1. Why Preserve Evolutionary History? | 197 |
| | 9.2. Quantifying Evolutionary History | 201 |
| | 9.3. Prioritizing Species Based on Evolutionary Distinctiveness | 204 |
| | 9.4. Prioritizing Hotspots of Evolutionary Distinctiveness | 207 |
| | 9.5. Applying Conservation Metrics | 208 |
| CHAPTER 10 | Conclusion: Where To From Here? | 209 |
| | 10.1. Predicting Ecology from Evolutionary Patterns | 210 |
| | 10.2. Combining Trait and Phylogenetic Information | 212 |
| | 10.3. Phylogenetic Insights into a Changing World | 213 |
| | 10.4. Where To Go from Here? | 216 |
| | 10.5. Heralding the Ecology-Evolution Synthesis? | 221 |
| | <i>Glossary</i> | 223 |
| | <i>References</i> | 225 |
| | <i>Index</i> | 249 |
