Contents

Contributors	ix
Preface	xi

1 Structure and Functions of Isolated Centrosomes

Michel Bornens

I. Overview	2
II. The Isolated Centrosome	13
III. Future Directions and Prospects	32
References	37

2 Ultrastructure of Centrosome Domains and Identification of Their Protein Components

J. B. Ratner

I. Introduction	45
II. Glycolytic Enzyme and Creatine Phosphokinase Epitopes at Microtubule Organizing Centers	51
III. p34 ^{cdc2} Present at Centrosome, Kinetochore, and along Kinetochore-to-Pole Microtubules	55
IV. Electron Spectroscopic Imaging of Centrosomes	58
V. Summary	63
References	64

3 Function and Formation of Centrioles and Basal Bodies

Gunter Albrecht-Buehler

I. Introduction	70
II. Speculation about the Function of Centrioles and Basal Bodies	75
III. Speculation about the Formation of Centrioles and Basal Bodies	86
IV. Discussion	98
V. Summary	100
References	100

4 Microtubule and Intermediate Filament Patterns around the Centrosome in Interphase Cells

I. B. Alieva, E. S. Nadezhkina, E. A. Vaisberg, and I. A. Vorobjev

I. Introduction	103
II. Centrosome and Microtubules	104
III. Centrosome and Intermediate Filaments	120
References	126

5 Monoclonal Antibodies to Microtubule-Organizing Center Antigens

Ryoko Kuriyama

I. Introduction	131
II. Antibody Probes Specific for Centrosomes	132
III. Monoclonal Antibodies to Microtubule-Organizing Center-Containing Structures	140
IV. Concluding Remarks	155
References	157

6 Role of Centrin in Spindle Pole Dynamics

Andre T. Baron and Jeffrey L. Salisbury

I. The Centrosome as the Division Center of the Cell	167
II. Flagellar Basal Apparatus and Centrosome as Functional, Structural, and Molecular Homologs	168
III. Striated Flagellar Roots and the Pericentriolar Lattice as Structural and Molecular Homologs	173
IV. Centrin-Containing Fiber Systems as Calcium-Modulated Contractile Organelles	177
V. Cell Cycle-Dependent Changes in the Cytoplasmic Organization of Centrin	178
VI. Centrin as a Component of the Cytomatrix	181
VII. Speculations on the Function of Centrin during Mitosis	183
VIII. Conclusions	187
References	187

7 Spindle Pole Body of *Saccharomyces cerevisiae*: A Model for Genetic Analysis of the Centrosome Cycle

Mark Winey and Breck Byers

I. Introduction	197
II. Anatomy of Spindle Pole Body	198
III. Coordination of Spindle Pole Body Cycle with Cellular Behavior	201
IV. Genetic Analysis of the Spindle Pole Body Cycle	208
V. Spindle Pole Body Components	214

VI. Perspectives	215
References	216

8 The Centrosome in Cell Division and Development of *Drosophila*

David M. Glover

I. Introduction	219
II. Maternal Contribution to <i>Drosophila</i> Egg	220
III. Mitosis in <i>Drosophila</i> Embryo	220
IV. Centrosome Duplication in Syncytial Embryos	222
V. Organizational Role of Centrosome in Embryonic Development	224
VI. Centrosome Duplication in Mitotic Mutants	228
VII. Coordinating Biochemical and Genetic Approaches to Understanding Centrosomal Function	230
References	232

9 Control of Centrosome Inheritance in Echinoderm Development

Greenfield Sluder

I. Introduction	235
II. Centrosome Inheritance in Development	239
III. Centrosome Inheritance in Sea Urchin Eggs	240
IV. Centrosome Inheritance in Starfish	244
V. Origin of Centrosomes in Parthenogenetically Activated Eggs	253
VI. Concluding Remarks	254
References	255

10 The Lymphocyte Centrosome

David L. Brown, J. David Knox, and Micheline Paulin-Levasseur

I. Introduction	261
II. The Unactivated Lymphocyte	262
III. The Centrosome and Lymphocyte Activation	268
IV. The Centrosome and Effector Functions	278
References	283

11 The Centrosome in Stationary and Migrating Endothelial Cells

V. I. Kalnins and K. A. Rogers

I. Introduction	287
II. Distribution of Centrosomes in Endothelial Cells	290
III. Microtubules and Polarity of Migrating Cells	294

IV. Position of Centrosomes in Migrating Cells	295
V. Changes in Centrosome Position in Aortic Endothelial Cells Induced to Migrate	297
VI. Significance of the Preferential Orientation of Centrosomes in Endothelial Cells of Aorta and Vena Cava	304
VII. Effect of Cytochalasin B and Colcemid on Centrosome Reorientation	305
VIII. Mechanisms for Reorientation of Centrosomes	306
IX. Polarity and Directional Migration of Cells	307
References	308

12 The Centrosome: Contributions to Cell Form

Mark A. McNiven and Keith R. Porter

I. Introduction	313
II. The Centrosome as an Organizational Template Influencing Cell Form	314
III. Microtubule Organization in Peripheral Cytoplasm	320
IV. Positioning the Centrosome	323
V. Prospective	326
References	327

13 Cell Polarity and Centrosomes

Manfred Schliwa

I. Introduction	331
II. Features of the Centrosome	332
III. Development and Maintenance of Cell Polarity: Three Case Studies	335
IV. Epilogue	344
References	344

Index	353
