

Essentials of Stem Cell Biology

Second Edition

EDITORS

Robert Lanza
John Gearhart
Brigid Hogan
Douglas Melton
Roger Pedersen
E. Donnall Thomas
James Thomson
Sir Ian Wilmut

AMSTERDAM • BOSTON • HEIDELBERG • LONDON • NEW YORK • OXFORD
PARIS • SAN DIEGO • SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO

Contributors	ix		
Preface <i>Robert Lanza</i>	xv	Part II	
		Basic Biology/Mechanisms	37
Foreword <i>Professor Sir Martin Evans</i> <i>Nobel Laureate</i>	xvii	6. Molecular Bases of Pluripotency <i>Fatima Cavaleri and Hans Schöler</i>	39
Why Stem Cell Research <i>Alan Trounson</i>	xix	7. Stem Cell Niches <i>D. Leanne Jones and Margaret T. Fuller</i>	61
A New Path: Induced Pluripotent Stem Cells <i>Shinya Yamanaka</i>	xxi	8. Mechanisms of Stem Cell Self-renewal <i>Hitoshi Niwa</i>	73
"Stemness": Definitions, Criteria, and Standards <i>Douglas A. Melton and Chad Cowen</i>	xxiii	9. Cell Cycle Regulators in Adult Stem Cells <i>Tao Cheng and David T. Scadden</i>	81
		10. Epigenetic Mechanisms of Cellular Memory During Development <i>Nathan Montgomery, Terry Magnuson, and Scott Bultman</i>	89
Part I		11. Cell Fusion and the Differentiated State <i>Penny Johnson and Peter W. Andrews</i>	105
Introduction to Stem Cells	1	12. How Cells Change Their Phenotype <i>David Tosh and Marko E. Horb</i>	111
1. Pluripotential Stem Cells from Vertebrate Embryos: Present Perspective and Future Challenges <i>Richard L. Gardner</i>	3		
2. Embryonic Stem Cells in Perspective <i>Janet Rossant</i>	13	Part III	
3. The Development of Epithelial Stem Cell Concepts <i>Christopher S. Potten and J. W. Wilson</i>	17	Tissue and Organ Development	117
4. Direct Reprogramming of Somatic Cells to a Pluripotent State <i>Dirk Hockemeyer, Frank Soldner, and Rudolf Jaenisch</i>	29	13. Differentiation in Early Development <i>Susana M. Chuva de Sousa Lopes and Christine L. Mummery</i>	119
5. Clinical Translation of Stem Cells <i>Olle Lindvall</i>	33	14. Primordial Germ Cells in Mouse and Human <i>Anne McLaren and Susana M. Chuva de Sousa Lopes</i>	131

15. Stem Cells in Extraembryonic Lineages <i>Tilo Kunath and Janet Rossant</i>	137	30. Skeletal Muscle Stem Cells <i>Helen M. Blau, Alessandra Sacco and Penney M. Gilbert</i>	249
16. Amniotic Fluid-Derived Pluripotential Cells <i>Anthony Atala</i>	145	31. Stem Cells and the Regenerating Heart <i>Maria Paola Santini, Bhawana Poudel, and Nadia Rosenthal</i>	259
17. Cord Blood Hematopoietic Stem and Progenitor Cells <i>Hal E. Broxmeyer</i>	151	32. Potential of Embryonic and Induced Pluripotent Stem Cell Differentiation Culture for Vascular Biology <i>Jun K. Yamashita, Satomi Nishikawa, and Shin-Ichi Nishikawa</i>	265
18. Neurogenesis in the Vertebrate Embryo <i>Chris Kintner and Naoko Koyano-Nakagawa</i>	157	33. Cell Lineages and Stem Cells in the Embryonic Kidney <i>Gregory R. Dressler</i>	273
19. The Nervous System <i>Lorenz Studer</i>	169	34. Adult Liver Stem Cells <i>Markus Grompe</i>	285
20. Neuronal Progenitors in the Adult Brain: From Development to Regulation <i>Christian Mirescu and Elizabeth Gould</i>	179	35. Pancreatic Stem Cells <i>Yuval Dor and Douglas A. Melton</i>	299
21. Sensory Epithelium of the Eye and Ear: Update of Retinal Stem Cell Research 2003 to the Present <i>Connie Cepko and Donna Fekete</i>	185	36. Stem Cells in the Gastrointestinal Tract <i>Stuart A. C. McDonald, Trevor A. Graham, Adam Humphries, Nicholas A. Wright, Sean L. Preston, Mairi Brittan, and Natalie C. Direkze</i>	307
22. Epithelial Hair Follicle Stem Cells <i>Tudorita Tumber and Elaine Fuchs</i>	189		
23. The Ontogeny of the Hematopoietic System <i>Malcolm A. S. Moore</i>	199	Part IV	
24. Hematopoietic Stem Cells <i>George Q. Daley</i>	211	Methods	329
25. Red Blood Cells <i>Shi-Jiang Lu, Jennifer S. Park, Qiang Feng, and Robert Lanza</i>	217	37. Induced Pluripotent Stem Cell Derivation <i>Junying Yu and James A. Thomson</i>	331
26. Cell Differentiation in the Skeleton <i>Gerard Karsenty</i>	223	38. Characteristics and Characterization of Human Pluripotent Stem Cells <i>Anne G. Bang and Melissa K. Carpenter</i>	339
27. Human Vascular Progenitor Cells <i>Ayelet Dar, Sharon Gerech-Nir, and Joseph Itskovitz-Eldor</i>	227	39. Isolation and Maintenance of Murine Embryonic Stem Cells <i>Martin Evans</i>	345
28. Multipotent Adult Progenitor Cells <i>Catherine M. Verfaillie and Annelies Crabbe</i>	233	40. Isolation, Characterization and Maintenance of Primate Embryonic Stem Cells <i>Michal Amit and Joseph Itskovitz-Eldor</i>	351
29. Mesenchymal Stem Cells <i>Arnold I. Caplan</i>	243		

41. Approaches for Derivation and Maintenance of Human Embryonic Stem Cells: Detailed Procedures and Alternatives	365	41. Neural Stem Cells for Central Nervous System Repair	485
<i>Irina Klimanskaya and Jill McMahon</i>		<i>Rodolfo Gonzalez, Jean Pyo Lee, and Evan Y. Snyder</i>	
42. Derivation and Differentiation of Human Embryonic Germ Cells	381	42. Spinal Cord Injury	497
<i>Michael J. Shamblott, Candace L. Kerr, Joyce Axelman, John W. Littlefield, Gregory O. Clark, Ethan S. Patterson, Russell C. Addis, Jennifer N. Kraszewski, Kathleen C. Kent, and John D. Gearhart</i>		<i>John W. McDonald and Daniel Becker</i>	
43. Growth Factors and the Serum-free Culture of Human Pluripotent Stem Cells	391	43. Use of Embryonic Stem Cells to Treat Heart Disease	507
<i>Alice Pébay and Martin F. Pera</i>		<i>Michael Rubart and Loren J. Field</i>	
44. Feeder-free Culture	397	44. Insulin-producing Cells Derived from Stem Cells: A Potential Treatment for Diabetes	513
<i>Holly Young, Tom Schulz, and Melissa K. Carpenter</i>		<i>Susan Bonner-Weir and Gordon C. Weir</i>	
45. Genetic Manipulation of Human Embryonic Stem Cells	409	45. Burns and Skin Ulcers	523
<i>Yoav Mayshar and Nissim Benvenisty</i>		<i>Edward Upjohn, George Varigos, and Pritinder Kaur</i>	
46. Homologous Recombination in Human Embryonic Stem Cells	417	46. Stem Cells and Heart Disease	529
<i>Thomas P. Zwaka and James A. Thomson</i>		<i>Annarosa Leri, Piero Anversa, and Jan Kajstura</i>	
47. Surface Antigen Markers	423	47. Stem Cells for the Treatment of Muscular Dystrophy: Therapeutic Perspectives	543
<i>Jonathan S. Draper and Peter W. Andrews</i>		<i>Maurilio Sampaolesi and Giulio Cossu</i>	
48. Lineage Marking	429	48. Regeneration of Epidermis from Adult Keratinocyte Stem Cells	551
<i>Andras Nagy</i>		<i>Ariane Rochat and Yann Barrandon</i>	
49. Genomic Reprogramming	437	49. Orthopedic Applications of Stem Cells	561
<i>M. Azim Surani</i>		<i>Jerry I. Huang and Victor M. Goldberg</i>	
50. Isolation and Characterization of Hematopoietic Stem Cells	443	50. Embryonic Stem Cells in Tissue Engineering	571
<i>Gerald J. Spangrude and William B. Slayton</i>		<i>Shulamit Levenberg, Ali Khademhosseini, and Robert Langer</i>	
51. Microarray Analysis of Stem Cells and Differentiation	449	51. Postnatal Stem Cells in Tissue Engineering	583
<i>Howard Y. Chang and Xin Chen</i>		<i>Pamela Gehron Robey and Paolo Bianco</i>	
52. Zebrafish and Stem Cell Research	459	52. Stem Cell Gene Therapy	591
<i>Emily K. Pugach, K. Rose Finley, and Leonard I. Zon</i>		<i>Brian R. Davis and Nicole L. Prokopishyn</i>	
Part V		Part VI	
Applications	467	Regulation and Ethics	599
53. Cancer Stem Cells	469	53. Ethical Considerations	601
<i>Michael Rothenberg and Michael F. Clarke</i>		<i>Ronald M. Green</i>
